MUTUAL LIFE ASSURANCE SCOTTISH PROVIDENT INSTITUTION.

ESTABLISHED
1837.

INCORPORATED
1848.

Head Office: 6, ST. ANDREW SQUARE, EDINBURGH.

ITS DISTINCTIVE SYSTEM of whole Life Assurance offers to Members the advantage of **with profit** rates which differ but little from the non-profit rates usually charged.

Premiums for £100 payable at Death (with right to share in Surplus).

Age next Birthday.	25	30	35	40	45	50	55
During Life	£1 17 5	£2 2 4	£2 8 6	£2 16 6	£3 8 2	£4 8 2	£6 2 3
25 Payments	2 9 8	2 13 11	2 19 3	3 5 11	3 15 11	4 8 8	5 6 8

The **whole Surplus** goes to the Policyholders on a system at once safe and equitable - no share being given to those by whose early death there is a **loss** to the Common Fund.

Endowment Assurance.

SPECIAL CLASS WITH SEPARATE FUND.

Policy-holders in this Class share exclusively in the whole Surplus thereof, and Bonuses are allotted on the compound system.

Annuities.

RATES MAY BE HAD ON APPLICATION.

FUNDS EXCEED : £16,500,000.

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

LONDON: 3, LOMBARD STREET, E.C. 3; WEST END: 17, Pall Mall, S.W. 1.

[811]

To my customers at home and abroad:—

Of the various classes of the best British woollens detailed below, all regular standard goods of the first manufacturers in the country, also of pea and anti-made homespuns, we have an abundant stock. The qualities, the same that have been known to my friends for something like forty years, and will therefore not be confounded with the merchandise offered to the public of late by some large houses at fictitious values. The clearance of many manufacturers and merchants at ruinous rates in consequence of the acute depression during the past year, attributable mainly to the collapse of the foreign exchanges and the reduced purchasing power of the community. No prices can be given as likely to be in force during 1922, but my clients may rest assured they will be adjusted to the current market value, irrespective of cost.—W. B.

SHORT SCHEDULE OF STOCK:

HOMESPUNS—Irish and Scotch, peasant-made from all districts; for country wear, sport, and travelling.

SCOTCH CHEVIOTS; for warm, rough suits, and wraps.

IRISH FRIEZES; for heavy travelling and motoring ulsters.

FLEECES; for warm, soft, woolly overcoats, and capes.

HOMESPUNS; natural cream, brown, grey; and dyed colours.

INDIAN, Homespuns; from Cashmere, Thibet, &c.

IRISH TWEEDS; for hard useful wear; winter and summer.

TWEEDS; for ordinary town wear; various weights.

WORSTEDS; for business and professional wear. Dress suitings

SERGES; navy and black; rough and smooth; all seasons.

CASHMERES; for tropical and semi-tropical wear.

TROUSERINGS; winter and summer weights.

FLANNEL TWEEDS; light and porous; semi-tropical wear.

COSTUME TWEEDS; for ladies' country and town wear.

OVERCOATINGS; light, medium, and heavy.

TRAVELLING RUGS—Irish and Scotch.

SHETLAND hand-knit jumpers, jerseys, jackets, shawls, socks, &c.

SOCKS AND STOCKINGS; hand-knitted; Irish and Scotch.

ORIENTAL SILKS; for thinnest tropical suitings.

Pattern applications must be definite and descriptive of requirements, otherwise delay will result. They can only be sent to the provinces and abroad. **TERMS**.—Cash with order.

A visit to the warehouse is recommended whenever possible in order to view the extent of the stock, handle the goods, judge of their merit, and make a judicious selection.

SHIPPERS, the TRADE, and PUBLIC supplied at prices corresponding to extent of purchase.

None but bona fide correspondence can be attended to.

Warehouse: 31 & 29, GREAT PORTLAND ST., W. I.

Branch: 93, New Bond Street, London, W. I.

Telephone: Langham 2426. (Estd. over 70 years.) T.A.: "SELFHELP, LONDON."

Humber

Motor Cars

Every passing year adds new testimony to the popularity of the Humber Car. There is a general consensus of opinion among motor experts and owner-drivers that a Humber is a typical example of all that is best in motor car design and construction. Every Humber model may be depended upon to give that pride of possession which follows from the ownership of a really high-class car.

Motor Cycles

(4½ H.P. Flat Twin)

The Humber 4½ h.p. Flat Twin Motor Cycle is a machine with a 100% efficiency certificate. Its stamina and flexibility of control are a delight to the rider, and it is one of the few 4½ h.p. machines capable of taking a side-car and passenger without taxing the efficiency of the engine. Its silence is remarkable, and considering the specification, the price is moderate.

Cycles

There are ten different Humber Cycles, and each one is an example of sound British workmanship, scientific design and tested material. From the "Beeston" Humber (as supplied to H.M. King George V.) down to the cheapest model, they are serviceable machines—strong, light, reliable and durable.

Full particulars sent on request.

A decorative border surrounds the text, featuring twelve circular medallions connected by a chain. Each medallion contains a different zodiac sign or a figure representing a month or season. The background of the border is a dense, repeating floral pattern.

ESTABLISHED 1868.

AN

Almanack

For the Year of Our Lord

1922

BY

JOSEPH WHITAKER, F.S.A.

CONTAINING AN ACCOUNT OF THE
ASTRONOMICAL AND OTHER PHENOMENA

A vast Amount of INFORMATION respecting the
GOVERNMENT, FINANCES, POPULATION,
COMMERCE, and GENERAL STATISTICS of
the various Nations of

The World

with special reference to

The British Empire

and

The United States

LONDON

OFFICE: 12, WARWICK LANE,

ST. PATERNOSTER ROW

WHITAKER'S ALMANACK was first published in 1868 (for the year 1869), and since 1887 there have been two editions. For 1922 the Popular Edition (in paper cover with Zodiac design) consists of 802 pages, and is sold for 3s. net; the Half-Bound Edition (in red and green cloth cover) consists of 898 pages, and is sold for 6s. net.

PREFACE TO THE XLIVTH ANNUAL VOLUME.

वित्तिय नमः सन्तानम्

(1922.)

WHITAKER'S ALMANACK

In the 54th Annual Edition of "WHITAKER" an endeavour has been made to supplement the sections in which the general public find the greatest interest at the present time, and special attention has thus been paid to affairs in Ireland, to statistics relating to the Trade and Finances of the United Kingdom, to Foreign Exchanges, to Meteorological Records, and to the results of the Census of the British Empire, while the interest aroused in general historical questions by recent publications has led to the development of the Chronological Notes and to the addition of Chronological Landmarks, which provide in the space of a few pages, an "Outline of History" from B.C. 10,000 to A.D. 1921.

The articles introduced in the preceding year appear to have been received with general approbation, and they have, in consequence, been retained in the present volume; but although extra space has been provided by the enlargement of the editorial sections, it has been found necessary to omit certain articles which were formerly included.

A considerable fall in the price of paper, although unaccompanied by similar reductions in other costs, encourages the proprietors to offer the 1922 "WHITAKER" at a price showing a 20 per cent. reduction on that charged for the 1921 volume. The rebate in the price of the completed work is greater than the saving in the cost of materials used, but the proprietors hope that the favourable commercial outlook will lead to increased sales all over the globe, and thus to a reduction in the "fixed charges" to be borne by each copy of the book.

In spite of the increase in the postal rates there has been no appreciable diminution in the Editor's correspondence from all parts of the world, and many interesting and helpful suggestions have been received during the past year. While acknowledging his indebtedness for the assistance thus obligingly rendered, and soliciting a renewal of the welcome co-operation, the Editor again expresses the hope that correspondence may be posted to reach him not later than October 15th, in order that suggestions may be fully weighed and dealt with to the best advantage.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

January 2. Day breaks at 6h. 7m. Civil twilight ends, 16h. 55m. Night begins, 18h. 5m. The length of the day from Sunrise to Sunset is 7h. 57m.

The ending of Civil twilight is here defined as the time when the Sun's centre is 7° below the horizon. Night begins and Day breaks when it is 18° below.

Jan. 3, 17h. Earth at least distance from the Sun, 91,345,000 miles. Perihelion.

Jan. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 17h. 10' 66".

Jan. 14. Occultation of a Cancri. Magnitude, 4.3. See p. 8x.

Jan. 18. Saturn at a stationary point.

Jan. 18. Saturn in conjunction with δ , 18h. 5m. δ $2^{\circ} 56'$ N.

Jan. 19. Jupiter in conjunction with δ , 18h. 32m. δ $0^{\circ} 49'$ N.

Jan. 21. Mars in conjunction with δ , 18h. 50m. δ $1^{\circ} 34'$ S.

Jan. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 17h. 8' 9".

Jan. 27. Venus in conjunction with δ , 18h. 15m. δ $5^{\circ} 46'$ S.

Jan. 29. Mercury in conjunction with δ , 18h. 57m. δ $3^{\circ} 25'$ S.

Jan. 29. Mercury at greatest elongation, $18^{\circ} 22'$ E.

Uranus, Jan. 1, R.A. 22h. 35m. Dec. $9^{\circ} 47'$ S. Sets 21h. 6m.

Jan. 31, sets 17h. 16m.

Neptune rises Jan. 1, 18h. 58m. Jan. 31, 16h. 56m.

In this month the Mornings increase 55m., the Afternoons 46m.

Constellations near the South meridian at 22h.: Perseus, Taurus, Eridanus, Auriga, Orion, Gemini, Canis Minor, Canis Major.

The 24-hour Clock.—As in last year's ALMANACK, where the system was adopted for the first time, in this issue the hours of the day are numbered from 0 to 23, the hour after midnight being 0, and the abbreviations A.M. and P.M. are not used. This "twenty-four hour" method has been in use in other countries for some years, and in 1919 the Home Secretary appointed a Committee to consider and report as to the advisability of adopting this method in the United Kingdom for official and other purposes. The Committee decided to recommend the scheme. The change from the numeration of former practice is made by adding 12 to the number which indicated the hours from 1 to 11 in the afternoon and evening, so that the second hour after noon is called 13, and that immediately before midnight 23.

MORNING AND EVENING STARS.

☿ MERCURY is invisible at the beginning of January, but may be seen after sunset S. of W. in the last week of the month.

♀ VENUS, being not far from superior conjunction, rises and sets nearly with the Sun.

♂ MARS is a morning star and moves from the constellation Virgo into Libra. Rises about 2 o'clock in the B.E.R. Magnitude + 1.5 to + 1.7.

♃ ♃ JUPITER and ♄ SATURN are in Virgo, and rise about midnight slightly S. of E. At 4 o'clock in the morning these two planets and Mars will lie in a line slanting upwards from the S.E. with the star Spica below and to the left of Jupiter. Magnitude of Jupiter, - 2.7; of Saturn, + 0.6.

The Lords Commissioners of the Admiralty have given instructions that the hours of the day shall be numbered in accordance with this method in the "Nautical Almanac," beginning with the hour for the year 1923. Until that date the astronomical day, which begins at noon, will be used as hitherto, and for that reason in the column "Mean Time at 0 h. Sidereal Time" hours are counted from 0 to 23, beginning at noon.

Twilight.—The illumination of the sky after the Sun has set is due to the reflection of its light to the observer from minute particles of dust, or water, or even of gases in the upper regions of the air. The time given in these pages as the end of Civil twilight is that when daytime occupations cease and the sky is dark enough for stars (not specially the planets and the brightest stars) to appear.

FEBRUARY XXVIII DAYS.

[1922]

Fasts and Festivals. .
Remarkable Days—Events.

SUN'S LONGITUDE 230° 4' 19d. 12h.

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded.

RIISING, SOUTHING, and SETTING of PLANETS at intervals of Seven Days. (Noon = 12 h.)

MORNING AND EVENING STARS.

☿ MERCURY will be above the western horizon for more than an hour after sunset in the first week of the month. Rises in the dawn in the latter half and sets before the Sun.

♀ VENUS rises and sets nearly with the Sun throughout the month.

♂ MARS rises before a o'clock in the E.E. by E. throughout the month. It passes from Libra into Scorpio, and on the morning of the 29th will make a close approach to the third magnitude star β Scorpii. Magnitude of Mars, +1.1 to +0.7.

♃ JUPITER and ♄ SATURN rise in the late evening. Both planets move slowly from left to right among the stars of Virgo. Magnitude of Jupiter, -1.7 to -1.9; of Saturn, +0.2.

spots that may happen to be on the Sun's disc. The second column shows the position of the Sun's axis of rotation as seen on the disc, the figures giving the arc of the Sun's circumference between the North point (which is the intersection of the celestial meridian through the Sun's centre with its edge) and the end of the projection of the axis. The third and fourth columns give respectively the solar latitude and longitude of the centre of the disc (that is of the Earth), the Sun's surface being supposed to be marked with parallels of latitude and meridians, based on the axis of solar rotation. The arc of longitude is an arbitrarily chosen solar meridian, and the direction of measurement is such that the longitude of the western edge is greater than that of the centre. The figures in the fourth column show that with respect to the Earth the Sun turns at the rate of 13° per day, or a whole revolution in $27\frac{1}{4}$ days, which is a mean value free from error.

Mean Longitude of Moon's Ascending Node, March 1, 190° 31' 21".

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4h. 55m. Civil twilight ends 5h. 22m. Night begins 12h. 59m. The length of the Day is 12h. 45m.

Mar. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 56s.

Mar. 10. Occultation of a Cancri. Magnitude 4.7. See p. 82.

Mar. 12. Mercury at greatest elongation. 7° 30' W.

Mar. 14. Saturn in conjunction with ♄, 9h. 51m. 7' 3" N.

Mar. 15. Jupiter in conjunction with ♄, 2h. 43m. 11° 54' N.

Mar. 17-18. Occultation of β Libræ. Mag. 4.4. See p. 82.

Mar. 19. Mars in conjunction with ♄, 2h. 43m. 8° 7' S.

Mar. 21. Sun enters the sign Aries (Spring Equinox), 9h. 49m.

Mar. 25, 17h. Saturn in Opposition. Distance, 793,730,000 miles.

Mar. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 42s.

Mar. 26. Mercury in conjunction with ♄, 1h. 51m. 9° 54' S.

Mar. 28. Annular Eclipse of the Sun. Visible as Partial Eclipse at Greenwich. See p. 80.

Mar. 29. Venus in conjunction with ♄, 1h. 54m. 9° 7' N.

Uranus, Mar. 1. Rises 6h. 54m. R.A. 22h. 45m. Dec. 8° 29' S.

Neptune sets Mar. 1, 6h. 6m. Mar. 31, 6h. 7m.

In this month the Mornings increase 65m; the Afternoons 52m.

Constellations near the S. meridian at 2h. Gemini, Canis Minor, Monoceros, Argo, Lynx, Cancer, Hydra, Leo, Crater.

The Moon on its Back.—There are weather saws and proverbs conveying the idea that the position of the crescent moon relative to the horizon has some effect on, or relation to, the weather. That it will be a "dry moon," if it lies on its back so that it can "hold the water," is the gist of several apothegms; but there are others which imply a connection of an opposite kind. Actually the position depends largely on the latitude, and the young moon will be more and more on its back when setting as we approach the Tropics. The bright or "full" edge of the Moon is that nearest the Sun, and when the line joining the centres of Moon and Sun is nearly vertical, or when the Moon is almost vertically above the point

MORNING AND EVENING STARS.

☿ MERCURY is a morning star, but rises less than an hour before the Sun.

♀ VENUS rises after the Sun, and sets within the hour after Sunset.

♂ MARS rises about an hour after midnight. It is moving from right to left, and will pass 5° north of Antares on March 6. Magnitude, +0.6 to +0.8.

♃ JUPITER rises in the early evening E. by S. It is retrograding in Virgo, with Saturn on its right, and the star γ Virginis between the two planets. Magnitude, -2.9.

♄ SATURN, being in Opposition on the 29th, is then due south at midnight, and is above the horizon from sunset to sunrise. Magnitude, +0.7.

of the horizon where the Sun has set, or will rise, it will be more especially "on its back." In northern latitudes this happens at sunset, when the Moon is young at the end of March, and at sunrise, the Moon being in its last quarter at the end of September. This position of the Moon with respect to the horizon, is therefore periodic and cannot of itself have any influence on the weather, but since the configuration is most in evidence at the time of the equinoxes, some supposed connection may have arisen because of the coincidence in time with the proverbial "equinoctial" gales.

Moon's Phases.—The half of the Moon illuminated by the Sun is continually changing. The half we see is practically always the same, the combined effect being the changing shape of the Moon that is presented. The line of separation on the Moon, between the illuminated and the dark regions, is called the Lunar Terminator.

RAIN FELL IN APRIL, 1922.

on 9 days; total fall 2.26 inches; below the average by 0.96 inch.

Summer Time.—See Note p. 40 and p. 99.

MONTHLY NOTES.

April 1. Refreshment House Licences to be renewed.

5. Dividends on Consols, &c., due. Financial year, 1921-22, for Treasury purpose ends.

9. Fire Insurances must be paid.

Quarter Sessions to be held this week unless otherwise fixed.

24. Parish Councils to hold their annual meeting on or within seven days of this date.

25. Spring Equinox of Venus comes into force.

26. Edinburgh Spring Midday.

Configurations of Jupiter's Satellites at 24h gm.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

April 2. Day breaks at 3h. 35m. Civil twilight ends 19h. 12m. Night begins 20h. 27m. The length of the Day is 12h. 51m.

Apr. 2. Occultation of Aldebaran (mag. 1.2) by the Moon in full daylight. See p. 82.

Apr. 4. Jupiter in Opposition, and at Aphelion. Distance from the Earth 423,750,000 miles.

Apr. 5. Mean time taken by Sun's semidiameter in crossing the meridian 1m. 4.4s.

Apr. 10. Saturn in conjunction with D, 17h. 35m. h 3° 19' N.

Apr. 11. Jupiter in conjunction with D, 2h. 31m. h 1° 15' N.

Apr. 16. Mars in conjunction with D, 4h. 49m. δ 5° 6' S.

Apr. 24. Mercury in Superior conjunction.

Apr. 25. Mean time taken by Sun's semidiameter to cross the meridian 1m. 5.4s.

Apr. 27. Mercury in conjunction with D, 9h. 42m. δ 2° 49' N.

Apr. 28. Venus in conjunction with D, 19h. 22m. δ 4° 13' N.

April 29. Near approach of J to Aldebaran. Soon after sunset the crescent Moon will be seen in the West with this 1st magnitude star below. (See note, p. 54.)

Uranus, Apr. 1. R.A. 22h. 55m. Dec. 8° 0' S.

Neptune sets Apr. 1, 4h. 3m.; Apr. 30, 2h. 5m.

In this month the Mornings increase 6m., the Afternoons 4m.

Constellations near the South meridian at 22h.: Cancer, Hydra, Leo, Leo Minor, Crater, Corvus, Virgo.

Jupiter and Saturn. — Jupiter describes its orbit round the Sun in two months less than twelve years, and in that time makes the circuit of the sky, and is in each of the Zodiacal constellations in turn. Half of these are above, half below the celestial Equator, and when Jupiter is in a southern constellation, it is low in the sky, as seen from a northern latitude, is not above the horizon for long, and is therefore in a disadvantageous position for observation. The planet is now beginning a period of southern declination, being in the following part of Virgo. It will be in Opposition on April 4, and at Aphelion on the same day, so that Jupiter is distant from both Sun and Earth, and this is a faint

MORNING AND EVENING STARS.

☿ MERCURY in Pisces and Aries rises nearly with the Sun throughout the month. It sets after sunset in the W.N.W., in the last week, but scarcely late enough to be visible.

♀ VENUS is an evening star and will be seen in the twilight north of west. Magnitude -2.5. It moves through Aries into Taurus, and will not be far from the Pleiades at the end of the month.

♂ MARS rises about midnight near the S.E. point. It continues to move in the constellation Scorpius, leaving Antares on the right, and is low in the sky. Its brightness is increasing rapidly. Magnitude -0.1 to -0.2.

♃ JUPITER and ♄ SATURN are above the horizon from sunset to dawn, and will be seen due south not very high in the sky in the late evening. They are both retrograding in the constellation Virgo.

Opposition. Saturn was in Opposition last month (March 22), and is not specially conspicuous because it is brightest at Oppositions which happen in December; and its Ring system is at a phase such that it contributes little to the whole brightness. Both planets were in Opposition early in March of last year (1921).

Stellar Magnitude.—The numerical magnitude of a star shows its order in a scale of brightness, the terms of which are in geometrical progression. Stars just visible to the naked eye are of magnitude 6. A 5th mag. is about 100 times, a 4th mag. is a hundred times as bright as a 6th. Capella, which is 1.3 times as bright as 1st mag., are of zero magnitude (nearly). Objects brighter than this are negative, and mag. -1 is 1.6 times as bright as 0. In these pages the brightness of the planets is indicated by magnitude according to this system.

Mean Longitude of Moon's ascending Node, May 1, 187° 17' 0".

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at 24. 42m. Civil twilight ends at 24. 22m. Night begins at 24. 30m. The length of the Day is 144. 42m.

May 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 6. 12.

May 7. Saturn in conjunction with ♃, 23h. 53m. 1/2° 2' N.

May 8. Mars at a stationary point.

May 8. Jupiter in conjunction with ♃, 12h. 5m. 1/2° 26' N.

May 13. Mars in conjunction with ♃, 19h. 7m. 5° 18' S.

May 23. 19h. Mercury at greatest elongation, 22° 37' E.

May 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 7. 7.

May 26. Mercury in conjunction with ♃, 12h. 5m. 5° 20' N.

May 26. Venus in conjunction with ♃, 22h. 39m. 9° 30' N.

Uranus, May 1. R. A. 22h. 57m. Dec. 7° 30' S.

Neptune sets May 1, 2h. 5m. May 31, 2h. 5m.

In this month the Mornings increase 43m.; the Afternoons 43m.

Constellations near the S. meridian at 22h.: Leo, Leo Minor, Crater, Hydra, Corvus, Virgo, Bootes, Libra.

Mars in Opposition.—Mars was last in Opposition on April 22, 1920, the interval between that and the date of the Opposition of this year, which is on June 10, being 76 days. This is exactly the average length of the synodic period, but because of the large ellipticity of the orbit of Mars, there is considerable variation. It may, however, be said generally that Mars is in view in alternate years, being later by two months on successive occasions. Also, because of this ellipticity, the distance and therefore the brightness of Mars varies at different Oppositions, and is brightest at those which happen in August or early September. At the Opposition next after that of this year, which will be on August 23, 1924, Mars will be excessively bright. At the Opposition of this year the planet will be brighter than it has been since the Opposition on September 24, 1899; and it will be brighter than Jupiter was at its Opposition last month.

Mars is far South of the Equator at this Opposition, and will be seen at a disadvantage from northern latitudes. It moves at this time in a south-easterly path in Scorpius, and will

Mean Longitude of Moon's Ascending Node, June 1, 285° 39' Δ.

CONJUNCTIONS, ECLIPSES, AND
OTHER CELESTIAL PHENOMENA.

June 1. Civil twilight ends at 22h. 7m. There is no closed night in this month in the latitude of London. The length of the Day from Sunrise to Sunset on June 1 is 16h. 13m. Its length is nearly 16h. 34m. from the 26th to the 30rd.

June 4. Saturn in conjunction with ♃, 5h. 14m. 1° 3' 8" N.

June 4. Saturn at a stationary point.

June 4. Jupiter in conjunction with ♃, 27h. 48m. 1° 1' 26" N.

June 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 6s.

June 6. Jupiter at a stationary point.

June 9. Mars in conjunction with ♃, 16h. 54m. 3° 7' 44" S.

June 12. Mars in Opposition. Nearest to Earth on June 12, 42,357,000 miles.

June 18. ♁. Mercury in Inferior conjunction.

June 22, 5h. 27m. Sun enters the sign Cancer (Summer Solstice).

June 24. Mercury in conjunction with ♃, 21h. 38m. 0° 23' N.

June 27. Venus in conjunction with ♃, 22h. 32m. 9° 6' 3" N.

June 28. Meteors of a stream connected with Pons-Winnecke comet may be seen.

Uranus rises June 1, 6h. 35m.; June 30 rises, 2h. 0m.

Neptune sets June 1, 6h. 4m. June 30, 22h. 7m.

In this month the Mornings increase nearly 7m. up to the 18th, and then decrease 4m. The Afternoons increase nearly 17m. up to the 26th, and then diminish slightly.

Constellations near the S. meridian at midnight: Corona, Hercules, Ophiuchus, Serpens, Scorpius, Lyra, Aquila, Sagittarius.

The Longest Day. — Though there is but slight difference in the length of the interval between sunrise and sunset on the days about June 21, there is in general one of these days which is a few seconds longer than any other. This is the day on which the Summer Solstice falls, and at the end of a century is June 20 or 21, whilst at the beginning it is a day later, and June 21 or 22 is the longest day. The reason may be briefly stated. Because the Tropical year is not an integral number of days, the solstice falls later in the calendar year by year by six hours, nearly. It is not permitted to be very late because the interpolation of the extra day in leap year brings it back one whole day. This whole day is too much, because the solstice is

MORNING AND EVENING STARS.

☿ MERCURY is an evening star in the early part of the month, but neither morning nor evening star at the end.

♀ VENUS will be seen in the W.N.W. after sunset. Altitude between 10° and 15° at a.s.h.

♂ MARS, now very bright, will be low down in the south at midnight in the first part of the month. It will be seen nearly S.E. in the twilight, and is approaching Antares, which rises earlier. Mag. -2.1 at Opposition on the 12th. (See note p. 42.)

♃ JUPITER will be in the south-western sky in the late twilight at altitude between 25° and 20°. Sets about midnight at the end of the month S. of W. Mag. -1.8 to -1.6. The double-star γ Virginis is about 1° above this planet.

♄ SATURN is to the right of Jupiter. Both planets are now moving from right to left. Mag. +1.2.

later yearly by not quite 6 hours, and hence, on the whole, it falls earlier in the calendar as the century progresses, and the dates of the longest day at the beginning and end are as stated.

The principle holds for all places, but these dates apply strictly to this part of the globe because there are differences depending on latitude and longitude. These can be explained by examples. At the Equator all days are of equal length. This year the Solstice falls in the morning of June 21 (Greenwich), which is there the longest day; but it happens before midnight of June 21 in California, which is the date of longest day in that part of the world.

This acceleration of the date during the century is corrected by the omission of the intercalary day in the centennial year, which puts the date a day forward. But this does more than is necessary, and a further compensation is made by making the fourth centennial year a leap year.

CONJUNCTIONS, ECLIPSES AND OTHER CELESTIAL PHENOMENA.

July 1. Civil twilight ends at 23m. In this month there is no closed night until after the next, when the Sun will be below the horizon at midnight. The length of the Day on July 1 is 16h. 30m.

July 1. Saturn in conjunction with D, 22h. 23m. δ 43° 4' N.

July 2. Jupiter in conjunction with D, 2h. 33m. δ 48° 48' N.

July 2. a.s.h. The Earth at maximum distance from the Sun. Distance, 94,450,000 miles. Aphelion.

July 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 8.4s.

July 6. Mars in conjunction with D, 10h. 11m. δ 8° 30' S.

July 11. 6h. Mercury at greatest elongation, 20° 58' W.

July 17. 3h. Mars at a stationary point.

July 23. Mercury in conjunction with D, 9h. 47m. δ 4° 51' N.

July 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 7.0s.

July 27. Venus in conjunction with D, 12h. 21m. δ 3° 30' N.

July 28. Saturn in conjunction with D, 2h. 23m. δ 2° 13' N.

July 29. Jupiter in conjunction with D, 12h. 0m. δ 0° 11' N.

Uranus rises July 2, 22h. 55m.; July 31, 20h. 57m.

Neptune July 1. R.A., 9h. 7.4m. Dec. 16° 40' N.

Meteors of the Perseid stream begin to appear in July.

In this month the Mornings decrease 34m., and the Afternoons 29m.

Constellations near the S. meridian at midnight: Hercules, Ophiuchus, Serpens, Lyra, Cygnus, Aquila, Delphinus, Equuleus, Aquarius, Capricornus, Sagittarius.

The Blue of the Sky. Light rays striking particles which are smaller than the wave length of the light are scattered or turned aside in all directions. The short waves which compose the blue and violet end of the spectrum are more completely scattered than the long red and yellow waves. Hence light passing through a medium containing a great number of such particles is left with an excess of red, while light emerging laterally has an excess of blue. The greater part of the sky appears blue because the light from it consists mainly of light scattered laterally from minute particles in the atmosphere. The smaller the particles the less intense is the light, but the greater the proportion of it that is blue. When the

MORNING AND EVENING STARS.

☿ MERCURY is a morning star but rises in the late dawn, N.E. by E., and is scarcely likely to be visible.

♀ VENUS is an evening star and sets about 22h. W.N.W. in the first part of the month, W. by N. later. It passes a degree north of Regulus on the 13th. Magnitude, -3.5.

♂ MARS, still bright, will be low down in the S. to S.W. during the late evening. It approaches Antares but reverses its direction of motion after the 17th. Magnitude, -1.8 to -1.2.

♃ JUPITER will be at altitude about 20° in the W.S.W. at 22h. in the first part of the month. It is moving towards the star Spica. Sets before midnight. Magnitude, -1.6 to -1.4.

♄ SATURN to right of Jupiter and about the same altitude, lies between β and γ Virginis. Magnitude, +1.2.

particles are larger the proportion of blue is less as in the whiter sky of a haze. Near the horizon the sky is whiter than at the zenith because the rays of light from that region have passed through a greater thickness of the lower air where large particles are relatively more numerous. Sunset colours are reddish because the rays reaching us directly have lost much of their blue light by lateral scattering. The sky as seen from high mountains and from aeroplanes at a great height is of a deeper but purer blue because there are fewer large particles than at lower altitudes. (From the *Meteorological Glossary*.)

MORNING AND EVENING STARS.

☿ MERCURY is an evening star after the 7th, but sets soon after the Sun, and will not be visible.
 ♀ VENUS may be seen low down south of west in the twilight. It passes from Saturn to Jupiter between the 12th and 27th (see opposite page), and will be near Spica on the 22nd. Magnitude, -3.7.
 ♂ MARS will be seen W. of south in the early evening. Sets in the south-west about 23d. It is moving from Antares, which is on the right. Magnitude, -1.5 to -0.6.
 ♃ JUPITER and ♄ SATURN set in the early evening. They will be seen in the twilight south of west at altitude 15° in the early part of the month; at 20° later. Magnitude of Jupiter -2.3; of Saturn +1.2. On the evening of the 29th Jupiter and Venus with the crescent moon near them may make a striking picture in the early twilight.

Aldebaran. At the present time the position of the orbit is such that the last-named is undergoing a series of occultations visible from Greenwich. There was one in daylight on April 2, and there are others in this year (Aug. 26, Nov. 4, Dec. 3) and next. On other occasions the Moon will be seen near the star (see April 29).

Parallax.—Because the Moon is so much nearer than the stars it is displaced on the background of the sky according to the position of the observer. This displacement is called parallax. For this reason occultations are not simultaneous for all places on the globe. Also the distances between the centres of the Moon and planets at conjunction given on page 3 of each month are as if the objects were seen from the centre of the Earth and require a correction for parallax to show the distances when the objects are viewed from the surface. The Moon is always displaced vertically downwards; by about a degree when near the horizon, and by less at greater altitudes.

Configurations of Jupiter's Satellites at 24h. 30m.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3h. 7m. Civil twilight ends at 3h. 35m. Night begins, 8h. 54m. The length of the Day is 13h. 35m.

Sept. 1. Occultation of σ Sagittarii. Mag. 4.4. See p. 8.

Sept. 4. Uranus in Opposition. Distance, 1,778,000,000 miles.

Sept. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 4.08.

Sept. 15, 23h. Venus at Greatest elongation. $46^{\circ} 24'$ E.

Sept. 20, 11h. Mercury at Greatest elongation. $26^{\circ} 26'$ E.

Sept. 21, morn. Total Eclipse of the Sun. Invisible at Greenwich. See p. 80.

Sept. 22. Saturn in conjunction with γ , 24h. 1m. h $1^{\circ} 24'$ N.

Sept. 23. Jupiter in conjunction with γ , 24h. 7m. γ $1^{\circ} 2'$ S.

Sept. 23. Mercury in conjunction with γ , 24h. 30h. γ $5^{\circ} 29'$ S.

Sept. 23, 20h. 30m. Sun enters the Sign Libra (Autumn Equinox.)

Sept. 24. Venus in conjunction with γ , 24h. 40m. γ $2^{\circ} 48'$ S.

Sept. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 3.96.

Sept. 28. Mars in conjunction with γ , 24h. 14m. γ $8^{\circ} 8'$ S.

Note, Uranus rises Sept. 1, 12h. 50m.; Sept. 30, rises 12h. 54m.; sets 3h. 39m.

Neptune, Sept. 1, R.A. 9h. 16m. Dec $16^{\circ} 1' N$

Venus, which has been gibbous, or larger than half-phase during this year, has half its disc illuminated in the middle of this month.

In this month the Mornings decrease 45m.; the Afternoons 2h. 6m.

Constellations near the S. meridian at 24h.: Lyra, Cygnus, Aquila, Delphinus, Aquarius, Capricornus, Equuleus, Pegasus, Pisces.

The Solar Eclipse of Sept. 21.

—As mentioned on page 80, there will be a total Eclipse of the Sun this month, the phenomenon not being visible in any phase from Greenwich. Totality will be visible from the Indian Ocean, and it has been thought advisable for an expedition to go to that region to repeat the experiment made in 1892 to seek whether the path of a ray of light is deflected when passing through the gravitational field of Sun, in accordance with Einstein's Relativity Theory of Gravitation. The method is as follows:—The stars which surround the Sun are not visible in

MORNING AND EVENING STARS.

♂ MERCURY as last month is an evening star setting in the early twilight, nearly W. at the beginning of the month. W.S.W. later.

♀ VENUS will be at an altitude of about 8° at sunset. It sets about an hour after the Sun throughout the month in the W.S.W. at the beginning and nearly S.W. at the end. Magnitude, -3.9 to -4.2.

♂ MARS is still to be seen in the early evening sky at a low altitude, west of south in the late twilight, and sets in the S.W. This planet is now in Sagittarius. Magnitude, -0.6 to -0.1.

♃ ♃ JUPITER and SATURN set about an hour after sunset 8. of W. Jupiter will be at approximately the same altitude as Venus but farther north. Magnitudes, Jupiter -1.3; Saturn +1.2 to +1.0.

daytime because of the sunlight, but when the sky is darkened during an eclipse they may be photographed. The same group of stars is also photographed in the night sky at some time before or after, and it is expected that the presence of the Sun at the time of eclipse causes small differences in the relative position of the star images on the photograph, which can be detected by measurement. The Sun will be in the constellation Virgo. A list of 22 stars surrounding it has been prepared, which may show the effect, among them being the third magnitude star β Virginis. (Mon. Not. R.A.S. Vol. LXXX. p. 628).

Large telescopes.—The Hooker telescope of the Mt. Wilson Observatory, California, with mirror 100 inches in diameter, is the largest in the world. There is a reflector of 72 inches aperture at the Canadian Dominion Observatory, B.C. The instrument of the same size as this made by Lord Rosse in 1845 is now dismantled, and its parts are in the museum at Kensington.

RAIN FELL IN OCTOBER, 1921,
on 8 days: total fall 0.79 inch; below the
average by 2.05 inches.

MONTHLY NOTES.

October 1. Pheasant shooting begins.—Common
Lodging-houses to be whitewashed in the first
week.

3. Jewish New Year 5682.
5. Dividends due.
9. Various Licences expire.
22. Fire Insurances must be paid.
23. Quarter Sessions begin.
25. Autumn Register of Voters comes into
force.
24. Borough Councillors to be nominated.

Mean Longitude of Moon's Ascending Node, October 1 179° 12' 31".

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4h. 8m. Civil twilight ends at 2h. 23m. Night begins, 10h. 27m. The length of the Day is 11h. 37m.

Oct. 3. 7h. Mercury at a stationary point.

Oct. 4. 7h. Saturn in conjunction with Sun.

Oct. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 4' 32".

Oct. 15. 11h. Mercury in Inferior conjunction.

Oct. 19. Saturn in conjunction with ♀, 16h. 18m. ♀ 2° 5' N.

Oct. 19. Mercury in conjunction with ♀, 21h. 5m. ♀ 2° 38' S.

Oct. 20. Jupiter in conjunction with ♀, 16h. 26m. ♀ 1° 34' S.

Oct. 21. 7h. Venus at Greatest brilliancy.

Oct. 23. Venus in conjunction with ♀, 4h. 43m. ♀ 10° 37' S.

Oct. 23. noon. Jupiter in conjunction with Sun.

Oct. 23. 21h. Mercury at a stationary point.

Oct. 27. Mars in conjunction with ♀, 4h. 53m. ♀ 6° 53' S.

Oct. 31. 2h. Mercury at greatest elongation. 18° 38' W.

Uranus sets Oct. 1, 3h. 35m.; Oct. 31, 1h. 35m.

Neptune rises Oct. 1, 1h. 16m. R.A., 9h. 19' 30m.; Dec., 15° 45' N.

Oct. 31 rises, 11h. 18m.

In this month the Mornings decrease 51m.; the Afternoons 1h. 3m.

The Zodiacal light may be seen before dawn in the latter part of this month, the Moon being absent.

Constellations near the S. Meridian at 22h.: Delphinus, Equuleus, Aquarius, Capricornus, Pegasus, Andromeda, Pisces, Piscis Australis, Cetus.

The Harvest Moon.—It will be seen that the interval between successive entries in the column of Moonrise is only 23 or 24 minutes near Full Moon in this month (Oct. 2-6), which is a less interval than in other parts of the column. This is the phenomenon known as the Harvest Moon, and happens this year in October.

The orbital motion of the Moon causes her to move among the stars rather rapidly from West to East, and she comes to the meridian of any place, or is due South, about 50 minutes later night by night. For this reason alone she would rise later night by night by this amount, but the time of rising (except at places on the Equator) is affected by her distance north or south of the celestial equator. In North latitude she rises earlier, with increased north Dec. There is

MORNING AND EVENING STARS.

☿ MERCURY is neither morning nor evening star in the first part of the month. It rises before the Sun after the 15th, and early enough to be seen by naked eye in the last week of the month E. by S.

♀ VENUS is a bright evening star, being at greatest brilliancy (magnitude -4.3) on the 21st, but sets less than an hour after the Sun in the S.W. Near Antares at the end of the month.

♂ MARS remains in the evening sky much as last month. It is low down in the south in the twilight and sets in mid-evening in the S.W. Magnitude, -0.1 to +0.3.

♃ ♃ JUPITER and SATURN being in conjunction with the Sun as shown on the opposite page are not to be seen this month. Both are in the constellation Virgo and rise in the dawn S. of E. at the end of October.

a certain period in each lunation when the Moon is moving northward rather rapidly, and this causes an acceleration which modifies the 50 minutes' retardation in the time of rising already mentioned, and in a high latitude the difference between time of rising on successive nights at this epoch of northward movement is small. This happens in every lunation, and in general passes unnoticed; but in the September or October lunation it happens when the Moon is full, and then the Moon, full or nearly so, rises about sunset on two or three consecutive nights. This phenomenon is known as the Harvest Moon. The details vary according to circumstances, and in some years the retardation on successive nights is much less than 23 minutes. When the longitude of the Ascending Node is ϵ° it is about 9 minutes in this latitude, and at the present time it is about a maximum. Also, for certain reasons, two Full Moons may have equal claims (compare Sept. 6-8), but the term is always applied to the Full Moon nearest to the Autumnal Equinox.

RAIN FELL IN NOVEMBER, 1920.

on 24 days; total fall, 0.79 inch. Below the average by 1.38 inches.

MONTHLY NOTES.

November 1. Latest day for receiving corrections for Whitaker's Almanack.

- Fox-hunting begins Salmon-fishing with rod and line ends (with some local exceptions).

- Ordinary day of election of Borough Councilors.

- Holiday at London Stock Exchange.

2. Lord Mayor's Day. Mayors and Aldermen

of Boroughs to be elected and Sheriffs appointed.

12. County Sheriffs for next year nominated.

15. Solicitors', notaries', proctors', and sworn

clerks' certificates expire. See Note, Dec. 15.

Configurations of Jupiter's Satellites at 6h 30m

Recommence in conjunction on October 23. The planet is near the Saturnian orbit, therefore above the horizon almost wholly in daylight hours, the satellites will not be visible from the end of September until the end of November.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA

November 1 Day breaks at 5h 01m
Civil twilight ends at 17h 20m
Night begins, 18h 29m The length of the Day is 9h 39m

Nov 4 Venus at a stationary point

Nov 5 Mean time taken by Sun's semidiameter in crossing the meridian, 1m 7.1s

Nov 6 Aldebaran and other stars occulted by the Moon See p 81.

Nov 9 Occultation of A Geminorum Mag 3.6 See p 81

Nov 10 Mercury and Jupiter in conjunction 21h 45m ♀ 0° 47' N

Nov 16 Saturn in conjunction with ♄, 7h 12m ♀ 0° 47' N

Nov 17 Jupiter in conjunction with ♃, 12h 28m ♀ 2° 3' 8"

Nov 18 Mercury in conjunction with ♄, 4h 10m, ♀ 2° 42' 8"

Nov 19 Venus in conjunction with ♃, 12h 30m ♀ 8° 18' S

Nov 25 Mars in conjunction with ♃, 5h 7m ♀ 6° 53' 9"

Nov 25, 6h Venus at Inferior conjunction

Nov 25 Mean time taken by Sun's semidiameter in crossing the meridian 1m 9.4s

Nov 28 Mercury and Venus in conjunction, 12h 54m, ♀ 1° 26' N

Uranus sets Nov 1, 1h 28m, Nov 30 23h 30m

Neptune Nov 1 R A 9h 22m

Dec 15 34° N Rises 23h 14m

Rises Nov 30 21h 20m

In this month the Mornings decrease 49m, the Afternoons 39m

Constellations near the 8 meridian at 22h Pegasus, Pisces, Cetus, Andromeda, Aries, Perseus, Taurus

Shooting Stars—Of all the objects that are seen in the sky the nearest to us are the meteors or shooting stars. These are believed to be small fragmentary bodies moving in space which rush through the earth's atmosphere and then incandesce by friction and are made visible to us. From observation it is found that a shooting star is about 70 or 80 miles above the earth when first seen, and 50 miles at the end of its visible path which may be 40 or 50 miles long and is traversed in a second or so. The rapid shooting stars are believed to be quite small bodies which pulverise, but occasionally bodies of larger size meet our atmosphere, the fragments of which come to earth as meteorites. These bodies congregate in swarms, the individual members of which describe similar orbits, and as they pass through our atmosphere appear to radiate

MORNING AND EVENING STARS.

☿ MERCURY is a morning star situated in the E.S.E. at a low altitude in the dawn, and may be visible in the first week of the month.

♀ VENUS during the greater part of the month sets nearly with the Sun and rises later. It will not be conspicuous, being at Inferior Conjunction on the 25th.

♂ MARS is still low in the S. to S.W. in the early evening. Its time of setting grows later because it is moving eastward and northward. It is now in Capricornus. Magnitude, +0.3 to +0.6.

♃, ♄ JUPITER and SATURN are morning stars rising at the times shown, Jupiter in the E.S.E., Saturn more nearly E. Spica is south of the line which joins them. Magnitudes: Jupiter, -1.3; Saturn, +1.0.

from some one point of the sky by an effect of perspective, and so form a meteor shower. It has been found that the orbits of several meteor streams are identical with those of certain comets, and the conjecture is made that a comet may leave debris along its path which are seen as meteors. On the other hand, since the meteors sometimes precede, it may be that the comet is simply the thickest part of the swarm. The meteors of November, known as the Leonids, are associated with Tempel's comet (1866 I.). This stream gave remarkable displays in 1799, 1833, and 1866, which led to the study of meteoric astronomy, but the expected display in 1899 did not happen. Though the richest portion returns every 33 years, meteors are distributed all round the orbit and a few are seen each year. The Perseid Meteor Shower, which begins in July or possibly in June, and has its maximum in August, is the most interesting and attractive of the year.

Mean Longitude of Moon's Ascending Node, December 1, 175° 57' 17".

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5h. 40m. Civil twilight ends 16h. 45m. Night begins 17h. 57m. The length of the Day is 8h. 9m. From Dec. 18 to 25 the length of the Day is about 7h. 46m.

Dec. 4, morn. Aldebaran will be occulted by the Moon shortly before moonset. See p. 81.

Dec. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 10.3s.

Dec. 6, 19h. Mercury in superior conjunction.

Dec. 13. Saturn in conjunction with ♄, 18h. 45m. ♄ 0° 0' 27" N.

Dec. 14. Venus at a stationary point

Dec. 15. Jupiter in conjunction with ♃, 6h. 6m. ♃ 2° 33' S.

Dec. 16. Venus in conjunction with ♃, 6h. 34m. ♃ 1° 44' S.

Dec. 19. Mercury in conjunction with ♃, 1h. 31m. ♃ 6° 54' S.

Dec. 22, 14h. 57m. Sun enters the sign Capricornus. (Winter Solstice.)

Dec. 24. Mars in conjunction with ♃, 6h. 26m. ♃ 4° 17' S.

Dec. 25. Mean time taken by Sun's semi-diameter in crossing the meridian, 1m. 11.0s.

Dec. 31, 1h. Venus at Greatest brilliancy.

Uranus, Dec. 1. R.A. 22h. 46.3m.; Dec. 8 38' S., sets 23h. 26m.

Dec. 31. sets 21h. 33m.

Neptune, Dec. 1, rises 21h. 16m.; Dec. 31, 19h. 16m.

In this month the Mornings decrease 4m., the decrease continuing throughout the month. The Afternoons decrease 4m. up to the 13th, and then increase 9m. Constellations near the E. meridian at 22h.: Andromeda, Triangulum, Arctus, Cetus, Perseus, Taurus, Eridanus, Auriga, Orion.

The Constellation of Orion.—In the middle of December, Orion, the fine star group which marks the figure of the giant huntsman, is on the meridian at midnight. The three stars which form his belt are well known, and the bright star at the north-east corner—Betelgeuse, the shoulder of the giant, is a variable star whose change of brightness is apparent to the naked eye. In the winter of 1919-20 Betelgeuse was excessively bright, frequently brighter than Rigel at the south-west corner, the brightest star of the configuration. In 1920-1 it was still above its average brightness, but there is little doubt that at some time, which cannot be predicted, it will be again seen as a dull red star in the sky, fainter than Aldebaran as it was in the autumn of 1915. It has lately been estimated

MORNING AND EVENING STARS.

☿ MERCURY rises and sets with the Sun in the first part of the month. It is an evening star at the end, but is not likely to be conspicuous.

♀ VENUS is a morning star, rising in the late dawn in the first week of the month. It rises earlier and will be at Greatest Brilliance on the 31st. Magnitude, -4.4. (On Dec. 1. -3.4.)

♂ MARS lingers in the evening sky setting before 22h. in the W.S.W. It passes from Capricornus into Aquarius. Magnitude, +0.6 to +1.0.

♃ JUPITER is a morning star, and at 6h. in the middle of the month will be due east at altitude 15°.

♄ SATURN is also a morning star rising a hours earlier than Jupiter. It will be in the S.E. about 6h. throughout the month directly above the star Spica. Magnitude, +1.0.

that the diameter of Betelgeuse is more than 200 million miles. Below the belt of Orion is a short row of stars marking his sword. A mistiness may be seen surrounding the upper of these, which is the Great Nebula of Orion, the most glorious object of the heavens as depicted on photographs. The attempts to find its distance give results ranging from 200 parsecs (see p. 25) to ten times that amount; and it is evidently a very distant object, as are many of the stars of this constellation. Their brightness is probably due to their size and physical condition.

The Shortest Day.—December 22 is the shortest day, but the Sun sets earliest by Mean Time on the 13th because the Equation of Time then makes the time of sunset later day by day by about 4 minutes; and after the 13th the southward movement of the Sun does not shorten the afternoon at so great a rate.

BEING THE THIRD YEAR AFTER BISSEXTILE OR LEAP YEAR, AND 13 AND 14 OF KING GEORGE V.

Tidal Constants,

WITH THE RISE OF TIDE AT SPRINGS AND NEAPS.

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at London Bridge, and adding to or subtracting therefrom the quantities annexed.

NOTE.—The time thus found will be Greenwich Time for British; French and Belgian Ports, and Irish Ports, and Amsterdam time for Dutch Ports.

Queensdown	add 3 33	12	9 1/4	Yarmouth (Isle of Wight)	sub. 3 58	7	5 1/4
Ramsey (Isle of Man)	sub. 2 29	20 1/4	16	Ymuden	add 1 4	5 1/4	5 1/4
Ramsgate Harbour	sub. 2 20	15	12	Youghal	add 3 37	12 1/4	9 1/4

EXAMPLE 1.—Required the time of high water at Aberdeen on January 24:

Time of high water at London Bridge 24. 30m. Morn.
 Subtract tide interval 0 50

Time of high water at Aberdeen ... 7 30 Morn.

EXAMPLE 2.—Required the time of high water at Scarborough on January 24:

Time of high water at London Bridge 24. 30m. Morn.
 Add tide interval 2 15

Time of high water at Scarborough ... 11 45 Morn.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be

taken, in which case 24 hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sum "high water at London Bridge" + "tide interval" will exceed 24 hours; in this case the excess will be the time of high water after the midnight following.

EXAMPLE 3.—Required the time of high water at Aberdeen, January 15th a.t.:

Time of high water at London Bridge
 on January 12th 24. 27m. Morn.

+ 24 hours = 24 27
 Subtract tide interval 0 50

Time of high water at Aberdeen, Jan. 15th 23 37 After.

76 Tables for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 60° N. and 60° S.

To use the table: In the horizontal line with the Sun's declination in the first column, and under the required latitude in the heading, there will be found the *local apparent time* of sunset. Subtracting this from 24h. will give the *local apparent time* of sunrise. To obtain from this the local mean time, the quantity in the second column on the second page of each month (which is known as the Equation of Time) appropriate to the day in question must be added to or subtracted from these apparent times of sunrise and sunset, as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator, if the declination North in the first column be considered South, and *vice versa*.

If the times of sunrise or sunset are required for any declination or latitude falling between the arguments in the table, they may be found by simple proportion.

THE TIME OF SUNSET.

The times of sunrise and sunset given in this Almanac are the times when the centre of the Sun's disc is on the visible horizon at sea-level at Greenwich, computed on the assumption that the horizontal refraction is $34\frac{1}{2}'$. It is doubtful whether there is a precise legal definition of sunrise and sunset. The above has generally been adopted as a correct statement, though in some Tables the instant when the upper limb, or edge, of the Sun is on the visible horizon is given as

Declination.		LATITUDE.

the time when the Sun rises and sets. The legal question has been more concerned with the distinction between local sunset and Greenwich sunset, rather than with a precise definition. It has been held by a legal tribunal,

as would be expected, that the word "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question, whether it be stated in local or Greenwich time.

TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR.

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich, to find the Greenwich time of sunrise at the place named in the first column, on the first day of each month. The corrections to be applied on other dates and for other places in the neighbourhood of these may be inferred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich. The sign -, that it is earlier.

If these Tables be considered in conjunction with a map it will be seen that the places at which the Sun rises at the same moment lie in a straight line across the map, the lines for different moments being parallel. The lines change their inclination to the meridian throughout the year. Similarly for the setting.

The corrections from the above Table are always additive to the corrected altitude.

duration is there only 3m. 42s. The eclipse will

duration is there only 3m. 43s. The eclipse will happen about local noon at 4h. 43m. G.C.T. and the Sun will be high in the sky at 78° altitude.

Totality may be seen from Queensland, where its duration will be between 3 and 4 minutes. The central line will pass south of Brisbane.

The circumstances of the Partial Eclipse at various places are as follows :—

	Eclipse begins.	Greatest Phase.	Eclipse ends.	Magn.
	h. m.	h. m.	h. m.	
Mauritius.....	4 44	3 37	4 14	0.38
Bombay.....	4 13	3 10	4 12	0.51
Madras.....	4 15	3 20	4 34	0.55
Perth.....	4 14	5 29	6 40	0.61
Adelaide.....	4 52	6 2	7 6	0.75
Melbourne.....	5 2	6 7	7 6	0.70
Sydney.....	5 7	6 13	7 12	0.86
Wellington.....	5 28	6 15	...	0.68

The following Table gives the times of Disappearance (D) and of Reappearance (R.) of the Satellites of Jupiter at Eclipse that will be visible from Greenwich in the year 1925. The local mean time of the phase for any place other than Greenwich may be found by applying the longitude (in time) to the times given in the Table, adding if the place is *East* of Greenwich, and subtracting if it is *West*. If Standard Time be required the zone difference is to be treated in the same way; or, in other words, the phenomena of Jupiter's Satellites are seen simultaneously from all places where the planet is above the horizon at the time.

From January to the Opposition of Jupiter (April 4) and in November and December the disappearances take place on the Western side. During this period Satellites I. and II disappear by Eclipse and reappear at the Eastern edge. From April to September the eclipse phenomena take place on the East of the planet. Satellites I. and II. disappear by occultation at the Western edge, and reappear after eclipse at the Eastern side in those months.

There are no eclipses of Satellite IV. in the list. In alternate periods of about 3 years this satellite is not eclipsed nor occulted, nor is it seen in transit across the disc of the planet. Since it is far from the primary the 1Vth satellite escapes immersion in the shadow of the latter when its opposition to the Sun, as seen from Jupiter is in the direction at right angles to the line of nodes of the satellite's orbit, or within 45° on either side of this.

II. A Total Eclipse of the Sun in the early morning of September 21 (Greenwich). Invisible at Greenwich. The path of totality begins its course in E. Africa on the Somaliland coast, where the Sun will rise in total eclipse about 3A. G.C.T., crosses the Indian Ocean to the north-west coast of Australia, and ends in the Pacific north of New Zealand. Within this track lie the Maldivé Islands south-west of India, and Christmas Island (long. $105^{\circ} \frac{1}{4}$ E.), south of the island of Java, either of which would provide a suitable observing station for the eclipse. In longitude 105° E. the duration of totality will be a maximum, nearly 6 minutes on the exact central line, but since Christmas Island is near the Northern limit of the band of totality the

The above is a list of the stars of the 6th magnitude (to mag. 6.2) and brighter that will be seen occulted from Greenwich during the year, with the times of disappearance and reappearance. The occultations if seen from other places will be in general, earlier if the place is West, later if it is East. Disappearances usually happen on the East or left-hand side of the Moon, reappearances on the West; the exact position is shown in the fourth and sixth columns, which give the angle from the North Point, or the point of the Moon's disc nearest the North Pole of the heavens, counting towards the East from 0° to 360°. Occultations of Aldebaran on several occasions are to be noted.

ILLUMINATED PORTIONS OF THE DISCS OF MERCURY AND VENUS, 1922.

The position of a star is defined by its Right Ascension and Declination, which are analogous to terrestrial longitude and latitude, and have for their basis the plane of the Earth's Equator and a certain direction in that plane. Because of certain movements of the Earth these co-ordinates are continually changing. These changes are called Precession and Nutation. A star *actually* changes its position by Proper Motion (see p. 84), and *apparently* by Aberration, and in some cases by Parallax, both these causes having a periodic effect of one year. The position of a star as seen in the sky affected in this way is called the Apparent place. The Mean place on January 1, 1925, given in the Table on the opposite page is the Apparent place referred to the Equator of date (that is Precession is taken into account) with the periodic effects eliminated. For purposes of navigation and surveying it is the Apparent place that should be used, and on this page the Apparent places of the Pole star and of some other stars are given.

There are in the list certain stars which are double, or in other words, they have a close companion which may be of approximately the same magnitude as itself, or it may be considerably fainter. In general the Mean place given is that of the brighter star, and the figure affixed to the Greek letter shows whether this is the first or second star in order of Right Ascension. In the case of Castor (α² Geminorum) the second of the components is the brighter, and the place of this is given. Sirius, Procyon, and α Centauri are exceptions, and of these the Mean place given is that of the centre of the orbit, but the Apparent places refer to the brighter star. The apparent places of these three stars and of Altair are affected with a parallax: Sirius, 0.38"; Procyon, 0.33"; α Centauri, 0.75"; Altair, 0.23".

Alternative names: Polaris = α Ursæ Minoris; Aldebaran = α Tauri; Rigel = β Orionis; Capella = α Aurigæ; Betelgeuse = α Orionis; Sirius = α Canis Majoris; Castor = α Geminorum; Procyon = α Canis Minoris; Pollux = β Geminorum; Regulus = α Leonis; Spica = α Virginis; Arcturus = α Bootis; Antares = α Scorpion; Vega = α Lyre; Fomalhaut = α Piscis Australis; Altair = α Aquilæ; Markab = α Pegasi; Achernar = α Eridani; Canopus = α Argus.

The variation of light of Betelgeuse is irregular; its magnitude ranges from about 0.5 to 1.5. α Herculis is a bright red star, said to be variable by early observers; but little, if any, variation has been detected recently. β Lyrae is a variable of distinctive type ranging in brightness from magnitude 3.4 to 4.1 in a period of 13 days, which includes two minima of differing brightness. γ Argus might be considered to be of the Nova class. In the first half of the nineteenth century this star was of the 1st magnitude. By 1870 the light had diminished to about the 7th magnitude, at which it now remains. (For Stellar magnitude, see p. 39.)

THE objects of the sky, Sun, Moon, Planets, Stars, appear to us to be fixed on the interior surface of a hemisphere of which the observer is the centre. Actually the different classes of objects are at very different distances. The stars are the farthest away, and individual stars are at great and very various distances from us, and are themselves separated from one another by equally large distances. The nearest star to the Sun is nearly ten thousand times as far from it as is the planet Neptune. It is the purpose of modern astronomy to investigate the method of distribution of these bodies in space, and their possible movements. There are about 10,000 stars visible to the naked eye in the whole celestial sphere, the number including the cases where two or more faint stars close together combine to form one which is so visible. The number naturally depends on the efficiency of the observing eye and the clearness of the atmosphere, and the estimate will be less generous if stars to magnitude 6.0 and no fainter are included, which is sometimes taken as the limit of naked-eye visibility. The whole number of stars down to this limit of magnitude is 4,300, of which more than 3,000 are visible during the year from latitude 60°. By the aid of the photographic plate objects are detected and recorded which no eye can see, even with the best optical aid. One hundred millions is an under-estimate of the number of stars already photographed, and it may be supposed that this number would be much increased with increased exposure. The Yerkes telescope, whose object glass has 40 inches diameter, will just show stars of the 17th magnitude. A star of magnitude 21 has been photographed.

THE MILKY WAY.

It is believed that the mass of the stars we see as separate entities are arranged in space in a form which may be likened to a watch or lens. In other words, the stellar Universe is considerably flattened on both sides, the median plane being marked out in the sky by the band of star cloud of irregular shape which is seen crossing the sky on a clear night, known as the Milky Way or Galaxy. This follows from star-gauges, or counts, which show that the stars are more dense in the direction of the central plane, called the Galactic plane, than elsewhere. On either side of this the stars lie thick, but the number becomes progressively less as the distance from that plane increases, until at its poles they are relatively few. The Milky Way is seen to consist of clouds of stars distinct from the stars just spoken of, particular classes of star-clusters and nebulae, and stars of peculiar types. Formerly, this Galaxy was pictured as a girdle made of these bodies surrounding the lens-shaped system of stars, and it was a subject for discussion whether certain nebulae and star-clusters were or were not other Universes of the same type. According to a recent view (Shapley 1928) the Universe appears as an enormous all-comprehending unit. The Galactic plane is still a fundamental fact in the Cosmos, and near this lie clusters of nebulae and naked-eye stars. Our Sun and the stars readily visible to us form one of these local systems, and, so far, the scheme is in accordance with the older view, the point of difference being the existence of an actual belt of objects surrounding our special group. The Sun is not precisely at the centre of this group, but is not far distant from it. Any estimate of the size of the Universe

or of its constituent parts is little more than conjecture, but 3000 or 4000 light-years (see p. 85) was formerly taken as a minimum estimate of the length of the radius of the local system in the median plane. The estimates generally made now are much greater than this, and Dr. Shapley suggests 300,000 light years as the diameter of the Universe, which, according to his scheme, includes the distant globular clusters. It is recognised that in the space which comprises the Universe of stars there is dark obscuring matter which has been suggested as the cause of some of the dark patches in the Milky Way. As seen in the sky the Galaxy always passes through the same constellations, sharing with them the diurnal motion, but its direction bears no special relation to the direction of the Ecliptic, Equator, or horizon. Such a relation is not to be expected, for these three planes pertain only to our Sun and Earth, which are minor bodies of the Cosmos of which the Galaxy is a main outstanding feature.

STAR SPECTRA.

Most of the bright stars and many of the fainter have been examined with a spectroscope, and have been divided into classes according to their type of spectrum as indicated by the lines which cross them, the spectral types being named by the letters O, B, A, F, G, K, M, N. The stars of the first two classes, O and B, have spectra characteristic of helium and hydrogen, and have some affinity to planetary nebulae. Stars whose spectra range between A and F—and it is to be remarked that there is no rigorous line of division between the classes—are white or blue stars, and in their spectra broad absorption lines of hydrogen are conspicuous. In the next groups—F to G, and G to K—lines characteristic of metals appear, fine but numerous, and the stars of this class are yellow. The spectrum of our Sun falls within the group F to G. The characteristic of the spectra of the remaining classes, M (and N), is the existence of a considerable number of flutings, and the stars are red. Antares, Betelgeuse, and a Hercules are notable stars in sub-classes of this type. (See Table opposite.)

STELLAR EVOLUTION.

It is realised that the spectrum of a star shows not only the materials of which it is composed but also its physical condition. Stars of the M type are of low temperature, whereas those of A and B are hot stars. This has led to hypotheses of stellar evolution, but whereas it has been supposed that each star passed through stages from hot to cold as indicated by the order of spectra shown above, a recent theory affirms that a star begins its existence as a large cool body (Giant star Type M) and after increasing in temperature and density through the types K, G, F, A, B, passes with diminishing temperature and decreasing volume in reverse order through the types to become a Dwarf Star of the M type. This theory, which resembles in some respects one propounded by the late Sir Norman Lockyer, is in its present form the result of researches on stellar masses and magnitudes by Prof. H. N. Russell, of Princeton, U.S.A.

STELLAR MOTION.

Many, if not all, of the so-called Fixed Stars are gradually changing their positions relative to one another, the movement of each star being called its Proper Motion. Consideration of these proper motions has led to the conclusion that

The last columns show the intrinsic brightness compared with that of our Sun, which is taken as a star of apparent magnitude -26.75 on the stellar scale. α Centauri, δ Cygni.—The components of these are combined. There is a small star near α Centauri which is probably a member of the same system. Recently a star of the 12th magnitude has been found with a large proper motion and a large parallax, which may be added to this list (Van Maanen's star).

they are in part due to an actual movement in space of the star itself, but in part to the movement of our own Sun, which causes an apparent motion of the star in the opposite direction, this latter being called the star's parallactic motion. In this way, it has been found fairly conclusively that the Sun, and with it the Earth and planets, is moving through space with a speed of 19.5 kilometres per second towards a point on the celestial sphere not far from the bright star Vega, speaking roughly, but there are differences in the determinations of the position of this point. The Proper Motions of Stars of spectral type F and G are found to be much larger on the whole than those of other types, and it is therefore to be supposed that these classes are nearest to us. It has already been mentioned that our Sun is of this spectral type.

DISTANCE OF THE STARS.

Though it has been said in an earlier paragraph that estimates of this kind are conjectural, it is found possible in some cases to measure the immense distances that separate the stars from us with some precision. The direct method of determination of a star's parallax, as this quantity is called, consists in measuring the minute difference of direction of the star as seen from opposite points of the Earth's orbit, which is now usually done by photographing the star and its surroundings at appropriate epochs and finding by measurement the change of position of the stars with relation to its neighbours. A spectroscopic method of finding parallax has recently been evolved. It is found that the absolute magnitude of a star, or the amount of light that it emits, irrespective of its distance, is shown by the intensity of certain lines in its spectrum, and comparison of this absolute magnitude with the magnitude as observed—which naturally depends upon the distance of the star—gives a value of the parallax. Both these methods are now being pursued with vigour, and it may be said that the distances or parallax of nearly three thousand individual stars are now known. If by any means it is possible to find out the mean

parallactic movement (see *Stellar Motion*) of a group of stars the mean parallax or distance of this group follows from a simple computation. In other words the space through which our Sun travels, which is about twice the diameter of the Earth's orbit in a year, is taken as the base-line with which to measure the distance of the stars.

If a sphere be assumed round the Sun as centre with a radius of a hundred billion miles, there are within it, so far as is known, about 20 stars. The nearest of these is the bright star α Centauri and its companions. The immense distances of the stars are measured in terms of the space that light moves through in one year as unit, which in miles is 6 followed by 12 zeros, or the parsec is taken as unit, which is $3\frac{1}{2}$ times the light year and is represented roughly by a followed by 13 zeros. A short list of some of the nearest stars is given above. It will be seen that this comprises some of the faint stars which are therefore of small intrinsic luminosity (Dwarf). On the other hand in the list of bright stars in the adjoining list there are some which are very distant, and these must therefore be intrinsically of great magnitude (Giant).

SIZE OF THE STARS.

Even the largest of the stars is too remote to show an appreciable disc in any telescope as do the planets. By utilizing an optical principle long since proposed by Fizeau, and elaborated independently by Michelson later, it has been possible to obtain some remarkable results with the large telescope of the Mount Wilson Observatory. With a special apparatus known as an interferometer it has been found possible to measure the angular diameter of Betelgeuse, the well-known red star in Orion, as $0''.047$, and adopting $0''.000$ as the parallax of the star, which is apparently not far from the truth, the diameter of the star arrived at is 215 million miles. The diameter of Arcturus measured in the same way was found to be 29 million miles. These are probably among the largest stars in the sky, and there are few so large that the instrument may be applied to them with success.

The times given are approximately and tend to be later than the middle of minimum phase.

VARIABLE STARS.

Although the stars generally shine with unchanging brightness, there are some among them which are exceptions to this rule, and of these Algol, the star β of the constellation Perseus, is the best known. In general this star is of about the second magnitude, but at stated intervals of something less than three days it fades away to between third and fourth magnitude, remains so for about 20 minutes, and then regains its light. The whole eclipse occupies about 10 hours. The approximate times when this star will be at minimum in the months when it is suitably placed for observation are given in the table above. The position of Algol is given by R.A. 3^h , 37^m , Declination $40^\circ 39' N$.

There are variable stars of types other than the Algol. The Cepheid variables have an average period of about 7 days, and the rise from minimum to maximum takes only about one-third of the whole period, so that the decrease of light is more gradual than the increase. Stars of the β Lyra type pass from minimum to minimum in about 6½ days, but are not of the same brightness at all minima, the alternate being equal. There are variable stars of long period (about 330 days) of which Mira Ceti is the most famous and others more capricious in their variation whose peculiarities can scarcely be summarized.

The variation of stars of the Algol type is believed to be caused by the partial eclipse of the bright star by a dark companion which moves in an orbit round it. A secondary minimum that has been noted in the period of variation of Algol can be accounted for by this theory. The variation of the Cepheid variables, on the other hand, is supposed to be due to a pulsation or periodic swelling and contraction of the star. It has been found that the period of δ Cephei, the typical star of this class, is diminishing very slowly, if at all, and from this fact an inference has been drawn which assigns a thousand million years, at least, as the order of the time that we may suppose this star and therefore all stars have existed. *British Association, 1921.*

NEW OR TEMPORARY STARS.

The phenomena known as "Novae" or "New" Stars can scarcely be classed as variable stars, for the rise to maximum, so far as is known, occurs only once in their history. Generally the Nova appears in the place of a star of faint magnitude, already catalogued or photographed, which blazes out into conflagration in the space of a

few days or hours. The great brilliancy is almost as short-lived as the increase in light, and then follows a fall, more or less steady, and in a few months the object emits, perhaps, 1 per cent of its light, whilst in a decade it has fallen to its original condition and luminosity. As these changes go on the spectrum undergoes equally remarkable variations. The few observations that have been made during the increase of brightness show a spectrum of the ordinary type crossed by dark lines which are much displaced from their normal position. Just as the maximum light is reached the spectrum is full of bright bands flanked by dark lines on the side of the shorter wave length towards the violet. The lines of hydrogen are most conspicuous, but helium is present, and other bands can be identified with enhanced lines or lines which are produced in the laboratory when metallic vapour is very strongly excited to luminosity by a powerful electric spark. Later on as the light begins to fall the characteristic nebular lines in the green and violet make their appearance and become the most conspicuous feature of the spectrum while the other lines fade away. At a still later stage the spectrum resembles that of the nucleus of a planetary nebula or of one of the Wolf-Rayet stars which are found here and there in the Milky Way. There are records of the appearance of these temporary stars as early as 134 B.C. There were none between 1690 and 1848, but, since the latter date there have been 22 visible to the naked eye as under. With the exception of the second, all have been in the region of the Milky Way. Novae which have not been of naked eye visibility are not infrequently found on photographs.

STAR CLUSTERS AND NEBULÆ.

Among the other apparently solitary stars we may notice groups of stars gathered close together, sometimes easily separable into individual stars, others that can only be separated in the most powerful telescopes, and some that appear as unresolvable patches of light; the latter are called nebulae, and were aptly described by Sir William Herschel as "shining fluid." A short list of the more interesting of these various objects is given herewith.

No. in New General Catalogue.	Messier's or Herschel's Number	R.A. 1900.	Declination 1900.	Constellation.	Appearance.
224	M 31	0 38	+40 50	Andromeda ...	Very brilliant oval nebula, visible to naked eye.
508	M 33	1 29	+29 38	Andromeda ...	A large nebula.
869 & 884	H VI. 33, 34	2 15	+56 45	Perseus	Fine double cluster, visible to naked eye.
1952	M 1	5 30	+22 0	Taurus	The well-known "Crab Nebula" of Lord Rosse.
1976	M 42	5 31	-5 27	Orion	Large and splendid nebula, visible to naked eye.
2009	M 37	5 47	+32 30	Auriga	A fine cluster of stars.
2070	5 39	-69 19	Dorado	Great "Looped" nebula—visible to naked eye.
2168	M 35	6 4	+24 20	Gemini	Magnificent cluster of stars.
2632	M 44	8 35	+20 15	Cancer	Called "Praesepe," or the "Bee Hive"—visible to naked eye.
3372	10 42	-59 16	Argo	Great nebula surrounding η Argus.
5194	M 51	13 26	+47 35	Canes Venatici	Brilliant spiral nebula.
5272	M 3	13 38	+28 45	Canes Venatici	Splendid cluster of stars.
6205	M 13	16 39	+36 35	Hercules	Very fine cluster of stars, visible to naked eye.
6494	M 23	17 52	-19 0	Ophiuchus	Fine cluster of stars.
6543	H IV. 37	17 59	+66 35	Draco	Bright planetary nebula.
6720	M 57	18 51	+32 55	Lyra	Beautiful ring of bright nebulosity.
6853	M 27	19 56	+22 30	Aquila	Large nebula formed like a "Dumb-Bell" or "Hour-Glass."
7089	M 2	21 29	-1 10	Aquarius	Splendid globular cluster of stars.
7078	M 15	21 26	+11 49	Pegasus	Magnificent cluster of stars.

Besides the obvious separation into these two classes there is further subdivision. There are loose clusters of stars of which the Pleiades is the best known example, and there are globular clusters whose character is sufficiently described by the name. Among the nebulae there are some which present a nearly uniform disc of light and are known as planetary nebulae, and analogous to these are some which are dark in the centre and are called annular or ring nebulae. But beyond this the spectroscope divides the nebulae into two great classes. The first spectroscopic observation of a nebula, made by Huggins in 1864, showed a spectrum of one bright line only, which indicated that these bodies, or at least some of them, are constituted of glowing gas. Later investigation showed that the spectra of some nebulae are continuous, from which it may be inferred that these are in a later stage of progress, assuming the evolution of celestial bodies from a primitive nebula. The nebulae with continuous spectrum are called "white" nebulae, in distinction to those with bright line spectra, which are "green" or gaseous. Photography has brought the means of studying the number and form of these objects in great detail, and it is found that the white nebulae are as a rule of a spiral form, and that there are many thousands of them. The gaseous green nebulae are in a small minority. The great nebula in Andromeda is a notable example of the spiral class. Its spectrum is perfectly continuous, unmarked by any lines or bands, either bright or dark, and its shape is that of a convoluted mass seen edgewise. The position of these bodies and the method of their distribution in space brings problems for solution. Referring to the shape of the Stellar Universe of which the Milky Way marks the median plane, as mentioned in a previous note, the nebulae seem in general to avoid the Galaxy and are found to congregate in the region of the galactic poles, especially of the

northern. The globular clusters lie almost exclusively in one hemisphere of the sky, whose centre lies in the Milky Way near the constellation Sagittarius, whilst the star clusters other than globular lie closely along the Galaxy. Whether the Spiral nebulae are "Island Universes" or aggregations of stars similar to, but quite outside of the local aggregation of which our Sun is a member, or whether they form a part of the latter, has been much discussed. Herbert Spencer argued that because the stars and nebulae seem to avoid one another, they must, therefore, be parts of one system, or otherwise there would not be such a complete separation.

The Solar System.

THE Sun is one of the millions of stars that make up the Universe, and, so far as human knowledge goes, is not unlike many of the stars we see in magnitude and constitution. It is surrounded by a family of smaller bodies of which our Earth is one, and the Solar system, which is only a minute detail in the structure of the Universe, is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The Solar or Planetary system consists of the Sun, with eight major planets and a thousand minor planets, or asteroids, circulating round him at varying distances in oval-shaped orbits. Six of the major planets have smaller bodies circulating around them, so that each forms a separate system, but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals, since they move in elongated elliptical orbits of which the Sun is at one focus are also members of the Solar system, but shine partly by their own light.

The plane of the Ecliptic in which the Earth moves round the Sun (see p. 97) is used as a fundamental plane of reference. The other planets move, at varying distances from the Sun, in planes inclined but little to the plane of the Ecliptic, and describe orbits in periodic times which are connected with the distances by a certain relation known as Kepler's 3rd law. The squares of the periodic times vary as the cubes of the semi-major axes. Following are given brief notes on each of the bodies which make up the Solar system, with details of their sizes, distances from their primary, and periodic times in tabular form. The time of rotation about the axis, or the length of the day of the planet, is added where this is known.

THE SUN.

The surface of the Sun presents a mottled appearance, and on it black spots appear sporadically. The nature of these is not known with certainty, but it was formerly supposed that they are at a lower level than the surrounding surface, the photosphere, though some modern views assert that spots are due to a central uprush. They are apparently signs of some solar activity which influences the magnetism of the Earth, for the coincidence in time between certain variations of terrestrial magnetism and of magnetic storms on the earth with the appearance of sun-spots is too marked to be fortuitous. It is suggested that the connection is made by stream-like emanations of corpuscles from the Sun which envelop the earth. The spots vary in size and number, and their total area reaches a maximum about every eleven years. They seldom appear more than 30° of latitude from the solar equator, north or south, and the spotted regions converge towards that equator as the time of minimum approaches. A record is kept of the appearance and positions of the spots on the solar disc, and from these positions the latitude and longitude of the spots on the Sun's surface (Heliographic) can be computed. Elements necessary for this computation are given on page 8 of each month. The Sun rotates on its axis in about 25 days 8 hours, which is shown by the apparent movement of the spots. They cross the visible disc from the eastern to the western edge in 13 or 14 days, the average period of the Sun's rotation with respect to the

Earth being $27\frac{1}{4}$ days, because of the orbital movement of the Earth in the interval. Like Jupiter, the Sun appears not to rotate as a whole, the period of rotation being different in different latitudes. The Equator makes a sidereal rotation in less than 25 days, whereas the period for latitude 35° is nearly 27 days. The number and size of the spots in 1897 continued to decline, but a large group of spots quite on the Solar Equator in May was a feature of the year.

DATES OF SUN-SPOT MAXIMA AND MINIMA.

Maxima.		Minima.	
1805.2	1870.6	1810.6	1867.2
1816.4	1883.9	1833.3	1878.9
1829.9	1894.1	1833.9	1880.6
1837.2	1906.1	1843.5	1901.7
1848.1	1917.7	1856.0	1913.1
1860.1			

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon in a total solar eclipse, certain red prominences are seen projecting from the Sun's edge, which consist of masses of glowing hydrogen gas arising from the chromosphere. Sometimes these are of remarkable shape and extend to enormous heights, occasionally being detached from the body of the Sun. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscope. Another appendage to the Sun outside the chromosphere, called the Corona, can only be seen during total eclipses. The lower portion of the corona consists of a pale green light containing hydrogen, the upper is a beautiful mass of silvery white light, in form of feather-like plumes, with dark spaces between, which have been traced from the Sun's edge to a distance as great as twice the Sun's diameter. Occasional streamers of the corona have been traced to a greater length than this. The corona does not retain a constant form, but appears to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots. Solar eclipses are only seen total at places where the shadow of the Moon falls, and an eclipse is partial at localities off this line of totality, because the change in the observer's position puts the Moon out of the direct line joining her to the Sun. Total eclipses of the Sun are rare in this country. There will be an eclipse in June 1897 which will be momentarily total from a track running across North Wales and North-West Yorkshire. Last year an annular eclipse (when the Sun's disc was not quite covered, but a ring of light was left round the eclipsing Moon), was seen from a region in the North of Scotland. The chief eclipse of this year is the Total Solar Eclipse in September which it is proposed to observe from a station in the Indian Ocean (see p. 58).

MERCURY.

Mercury is the nearest planet to the Sun, and the smallest in the system. Because it moves in an orbit between the Sun and the Earth this planet can never be seen far from the former body, and is sometimes to the West, sometimes to the East of the Sun. In the former case Mercury appears as a morning star and in the latter as an evening star. The extremes of these apparent excursions are technically known as Elongations, and the times and distances,

measured by the angle included between the lines which join the Earth to the Sun and the planet respectively, are given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these Elongations to vary considerably, and they may be as small as 16° or as large as 29° . The period of revolution round the Sun—in other words, Mercury's year—comprises 88 solar days, and he turns on his axis either in the same time, and therefore always presents the same face to the Sun, like the Moon with respect to the Earth, or in about 25 hours. Mercury shows phases to the Earth—like the Moon in her first quarter if the elongation be in the East, and like her last quarter if in the West.

VENUS.

Venus, which is nearly twice as far from the Sun as Mercury, is almost exactly the same size as the Earth. Her apparent movement with respect to the Sun is similar to that of Mercury, except that, being farther from the Sun, and nearer to the Earth than her smaller neighbours, the angles of Elongation exceed those of Mercury, and extend to 47° . The disc of Venus is not telescopically interesting, for owing to her dense cloud-laden atmosphere very few markings are visible, and this renders a determination of her axial rotation uncertain. By some astronomers her day is believed to be very nearly equal to that of the Earth, whilst others have concluded that it is equal to the year of Venus, or, in other words, that the planet always presents the same face to the Sun. Venus has epochs of great brilliancy when she appears as a beautiful crescent like the Moon when about 5 days from New. Such epochs will occur in the current year in October and December. The brightness is not the same at all the maxima, for this varies periodically and the morning maximum in December of this year is a specially bright one.

MARS.

Mars, the first planet whose orbit is exterior to that of the Earth, is a little larger than Mercury and considerably smaller than Venus and the Earth. Details of his distance and period will be found in the table. Mars is in opposition at intervals of about two years, because it moves at a rate not greatly different from that of the Earth, and will be in this configuration, and therefore conspicuous in 1902 (see p. 42). Mars, like Mercury and Venus, exhibits phases, but in a much less degree than those planets. His disc departs from exact circular form, or is gibbous only to the extent of one-eighth of its diameter. The other superior planets are too far away to show any very appreciable phase, though traces of it are sometimes to be detected in Jupiter.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable his rotation period to be well ascertained; there are, besides, white spots at the poles of rotation. These are supposed to consist of snow, and when it is summer to the Martians in the northern hemisphere, the white spot about that pole dwindles considerably in extent, if it does not disappear entirely, which it does rarely. The remainder of the disc is divided into greyish and ruddy areas, which have been called seas and lands. The Maria are not now generally considered to be oceans, but are usually regarded as marshes or areas covered with some sort of

vegetation. These areas are seen to change their colour and intensity with the Martian seasons very much as our vegetation would appear to do if viewed from a celestial neighbour. Certain fine, dark, straight markings seen across the ruddy areas have been named "canals," perhaps a little unfortunately, as it has been taken to imply that they are of manual construction, but for this there is no sufficient evidence or proof (see p. 43).

MINOR PLANETS.

Between the orbits of Mars and Jupiter a large number of small planets have been discovered, and every year a considerable number are added to the list. At present the total number known is about a thousand, and there may still be thousands awaiting detection. The four largest, found in the early years of the 19th century, are—Ceres, 485 miles; Pallas, 304 miles; Juno, 128 miles; and Vesta, 243 miles in diameter. Vesta is the brightest though not the largest. In recent years the discoveries have been of much smaller objects, and it is probable that some of them are not more than from 10 to 20 miles in diameter, and are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably, and an average may be taken as 1,600 days, or $4\frac{1}{2}$ years. Some of the orbits are very oval, and the inclination of their planes to the Ecliptic has considerably different values. The inclination of Pallas is 35° , whilst that of Juno is only 12° . One of these small bodies, named Eros, at some oppositions approaches nearer to the Earth than Mars does at any time, and this affords a good opportunity for determination of the solar parallax. Oppositions happen at intervals of about $2\frac{1}{2}$ years, the circumstances being very different at the different occasions. There was one in September, 1901, when Eros was distant about 60 million miles; there will be another and a more favourable one in 1904, and there will be a very close approach at the opposition in 1931.

JUPITER.

The next planet in order from the Sun, Jupiter, is the largest in the system, and has a diameter eleven times that of the Earth. Its density, however, is only $\frac{1}{4}$ th that of the latter. On viewing Jupiter through a telescope it will be seen that the disc is not circular, but its form, an oblate spheroid, is believed to be due to the rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree. Jupiter has four principal satellites about the same size as our moon, which were the first celestial objects discovered with the telescope, Galileo having observed them in the year 1610. The planes of their orbits are but slightly inclined to that of Jupiter about the Sun, and in consequence these bodies which shine by the light of the Sun, are eclipsed every Jovian lunation, except Satellite IV., which escapes under some circumstances (see p. 39).

THE GREAT RED SPOT ON JUPITER.

This may be considered the most remarkable and the best observed planetary feature of modern times. There is record of an observation of a spot by Hook in 1664, which may have been an early appearance of this, but the first modern observation was by the Rev. W. R.

Dawes when he figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1837. It came again into prominence in 1878 and the following years. A curious bay or hollow on this belt has been visible since 1831; and if we accept this as identical with the one now intermittently perceptible (which includes the red spot), then the rotation of this object during the 83½ years from 1831 to 1918 was $ph. 55m. 26.9s.$ from more 76,000 rotations.

In the early months of 1899 the great red spot and its immediate surroundings underwent some surprising changes. The bay or hollow in the S. side of the southern equatorial belt disappeared, and the red spot seemed almost obliterated. The south tropical disturbance, visible since 1801, consisting of an extensive dusky marking reaching halfway round the circumference of Jupiter, and situated in the usually bright zone between the southern side of the south equatorial belt and the south temperate belt, apparently disappeared. The apparition of 1899-20 was again remarkable. The features mentioned above, the Bay, the Red Spot Hollow, and the S. Tropical disturbance, had all reappeared, and the Red Spot, though without its colour, was well defined and of abnormal length.

At the opening of the year 1922 the position of the latter object will be approximately 116° , or a little more than 3 hours, preceding the zero meridian (System II.) of Jupiter, and if the previous motion is continued, the values above given will increase at the rate of about $4''$, or 6½ minutes per month. There is much to repay a careful study of the portion of Jupiter's surface referred to through adequately powerful telescopes. The transits of the zero meridian (II.) of the planet on various dates in 1922 will be as under in astronomical time:—

1922.	n	m.	1922.	n	m.
Jan. 3.....	19	27	May 1.....	16	38
" 24.....	21	46	" 7.....	11	37
Feb. 5.....	21	39	" 28.....	13	56
" 20.....	19	1	June 2.....	13	5
Mar. 6.....	20	32	" 9.....	13	53
" 31.....	16	7	" 28.....	14	37
Apr. 4.....	19	23	July 3.....	13	46
" 21.....	18	28	" 27.....	13	43

The times for other dates may be found by adding periods of $ph. 55m. 40s.$

Note.—Two systems are in use for defining the positions of markings on Jupiter. In System I., which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as $ph. 50m. 30s.$ System II. applies to the Temperate Zones, and in this the time of rotation is $ph. 55m. 40.63s.$

It is to be remembered that in March, 1922, the Red Spot will come to the Central Meridian of Jupiter about $3h. 8m.$ before the times given in the foregoing list, and that this interval of the precedence of the spot will probably increase by about $6\frac{1}{2}$ minutes per month. The motion of the spot is, however, not uniform, but irregularly variable, so that prediction of its true place can be only approximate.

SATURN.

The sixth major planet in order from the Sun is unique in appearance because of its encircling ring-system, which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of three bright rings and an inner dusky ring through which the

body of the planet can be seen. The rings appear to be flat annular discs of extreme thinness, inclined at an angle of 26° to the plane of the Ecliptic, and it is shown that neither of them can be a coherent mass or in one piece, either solid or liquid, as in that case it would be difficult to account for their stability. They probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Of the three bright rings the middle is the brightest. Twice during Saturn's period of revolution of $29\frac{1}{2}$ years, the plane of the Ring passes through the Sun's centre, which happened in 1907 (July 26) and in 1921 (April 12). Belts like those on Jupiter, but of not so pronounced a character, are seen on Saturn. His figure shows a bulging at his equator, the ratio of the polar to the equatorial diameter being as 14 to 15.

Saturn has ten satellites, situated outside the rings; some of the former are visible in telescopes of low power. Titan, the largest, is about one and a half times the size of our moon, whilst Iapetus is about the same size as our satellite. The tenth satellite, Themis, has been observed once only since its discovery.

URANUS.

Discovered by William Herschel at Bath in 1781, this planet is only just visible to the naked eye. In a telescope Uranus may be distinguished from the stars around by his disc, which is obvious though less than $4''$ in diameter, and by the quality of his light, which is less piercing than that of the stars. Very little is known about his surface markings, but a rotation period of 10 hours 49 minutes has been inferred from the observed variability of his light, which has been supposed to be due to some specially reflective spot coming into the Sun's rays. A determination of the rotation period by the spectroscopic method agrees with this. Uranus will be favourably situated for observation in the autumn months in 1922.

NEPTUNE.

This planet, placed on the confines of the Solar system, is a small telescopic object of about the 8th magnitude. He will occupy a position in the E. part of Cancer, and may be observed with best effect in the early months of this year.

THE MOON.

Neither Mercury nor Venus, so far as is known, has a satellite; the one satellite of the Earth is the Moon, which is quite familiar to us. The mean distance of the Moon from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. When viewed through a telescope, charts of very great accuracy can be made of her surface, as she has no appreciable atmosphere to obscure the more delicate markings. Only one side of the Moon is seen, and from this fact we infer that she must turn on her axis in the same time that she moves round the Earth. As there is no sign of water or vapour on the disc, and consequently no atmosphere, the surface must be exposed to the most violent changes of temperature: in the lunar day of half a month it must be heated to a very high temperature, and in the other half subjected to cold equal to that of interstellar space. Her diameter is rather more than 2,160 miles, and her rate of motion through the firmament $23' 20' 35''$ per day and $32' 58''$ per hour. Thus she travels over

a space slightly exceeding her own diameter in one hour. The actual time she takes to move around the Earth is *syn.* 7h. 43m. 11^s.4, but the time from one New Moon to another is *syn.* 29d. 12h. 44m. 3s. When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. A small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater-pits.

Prof. W. H. Pickering has recently been making some interesting investigations with reference to supposed "seasonal changes occurring in certain lunar craters." He finds distinct evidence that this takes place in regard to various objects which he has specially studied. He admits, however, that the explanation of such phenomena are difficult, though vegetation appears to be a less improbable theory than any other. Sir W. H. M. Christie supplemented Prof. Pickering's observations of these changes, and papers detailing the results may be consulted in Monthly Notices, R.A.S., Vol. LXXXI., pp. 451 and 460 (1921).

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon and causes a lunar eclipse, which may be either total or partial as in the case of solar eclipses, but there is the difference that the phase for lunar eclipse is the same for all observers where the Moon is above the horizon at the time. The obscuration of the Moon's disc is hardly ever complete, but because the Sun's light is scattered by the clouds in the Earth's atmosphere, the Moon appears usually as a copper-coloured disc, the precise shade being different at different eclipses. It will be understood that solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon.

In a note on page 62 it is explained why the Full Moon, near the time of the Autumnal Equinox, rises at nearly the same time, about sunset, on several consecutive evenings. Because in earlier times it was thought that this was specially ordained to facilitate the ingathering of the crops the phenomenon was called the Harvest Moon. The Full Moon which follows is called the Hunter's Moon.

A FEW OF THE CHIEF LUNAR FORMATIONS.

Wedge-shaped Valley of the Alps.—Near the central line of disc, towards the north, a cleft 83 miles long and 3½-5½ miles broad.

Apennines.—An extensive mountain range somewhat similar to terrestrial features. Visible to naked eye when projecting into the dark part of the disc. Length, 450 miles; highest summit (Huygens) reaches 18,000 feet.

Aristarchus.—A lunar crater in N.E. quadrant. The brightest object on the Moon. This crater is visible as a luminous spot when all the surrounding region is involved in shadow.

Mare Crinum.—A dark grey oval plain visible to naked eye near W.N.W. limb of Moon. Extends 280 miles N. to S. and 354 miles E. to W. Well seen five days after new or a few days after full.

Mare Serenitatis.—Lies S. of the Moon's centre, and extends over 428 miles. A nearly circular dark plain. Contains a crater, Linne, formerly suspected of change. This *mare* is visible to naked eye.

Clavius.—One of the finest craters on the Moon, and about 142 miles in diameter. Situated on S. limb.

Tycho.—Towards S. limb. Has been called "the metropolitan crater of the Moon." A fine crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it, and they are very conspicuous at the time of full moon. In its region (S. limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb.

COMETS.

In addition to the planets, there are other interesting objects belonging to the Solar system, called comets. Some of these revolve in elliptical orbits, and return at intervals, which in the case of those that have been observed range from 3½ to nearly 80 years, whilst a few other computed orbits show periods as large as a million years. Other comets move in parabolic courses and apparently do not repeat their visits to the Sun.

Comets revolving around the Sun in comparatively limited times are not very numerous, but our knowledge of them is constantly becoming more comprehensive and accurate. These small returning comets revolve in periods from 3½ to 9 years, and deserve special notice, as their orbits are well known and predictions of their reappearances can be accurately made in many cases.

Their paths extend outwards to the position where Jupiter performs his revolution, and from this circumstance they are termed Jovian comets.

ELEMENTS OF THE SOLAR SYSTEM.

	Mean Distance from Sun.		Sidereal Period.	Synodic Period.	Inclination of Orbit to Ecliptic.	Diameter.	Mass compared with Earth.	Period of Rotation on Axis.

Neptune ♆	30.07	2,793.4	164 260	367½	1 47	24,823	27	?

The following are the approximate dates when some members of this family should return to perihelion in 1922 and 1923, but the actual appearance of several of them is doubtful:—

	Expected Return.	Period in Years.	Name of Comet and Year of Discovery
1922.	April	5'398...	Barnard 1884
	June	6'366...	Taylor 1915
	September	6'453...	Perrine 1896
	October ...	6'480...	Daniel 1909
	November	6'480...	Spitaler 1890
	November	5'456...	Brorson 1846
1923.	May	6'647...	Giacobini 1896
	June	6'208...	Coggia 1873
	December	7'418...	Denning 1894
	December	8'534...	Swift 1880

The comets of this class move in elliptic orbits not much inclined to the Ecliptic. Without exception they travel in *direct* courses, and in these respects present an analogy to the planets, but of those that move in very long ellipses, or parabolas, about two-thirds have a retrograde (westerly) motion.

There are other families of comets, none so large as the Jovian, named respectively from the planets Saturn, Uranus and Neptune, for reasons similar to that given above. Halley's comet belongs to the Neptunian family.

The most probable date for the return of Di Vico's comet of 1846 was November 1921, but as the period is uncertain by a or 3 years a later return is possible. It is therefore possible that it may re-appear in 1922.

The periodic comets, Pons-Winnecke and Encke, were observed at their return in 1921, and two non-periodic comets were discovered (up to Nov. 1). A bright object observed at the Lick Observatory on August 7, near the Sun when setting, might have been a comet. There is slight corroboration of this observation in England.

In the life of a comet the tail sometimes appears to undergo very rapid and curious changes. From examination of the spectrum of the head, comets appear to consist of carbon in various forms, and cyanogen has also been detected. Secondly, there are bright metallic lines due to sodium, magnesium and iron which appear only when the comet is near perihelion, and in some cases have become very strong upon close approach to the Sun. The spectrum of the tail shows certain characteristic bands that

are due to carbon monoxide of very low density. Generally a continuous spectrum is shown as a background to the bright lines, from which we infer that a part of the comet's light is due to reflected sunlight. Comets' tails are generally directed away from the Sun, as if acted upon by some repulsive action—perhaps light.

METEORS.

Another class of objects which belong to the Solar system are the meteoric streams, giving rise to occasional showers of meteors, falling

dant as to form striking phenomena. The year 1926 was notable because of a remarkably abundant and previously unknown stream on June 28, which had a distinct connexion with Pons-Winnecke's periodical comet, the orbits being nearly the same. This comet returned to perihelion on June 22, 1921, but the attraction of Jupiter had so disturbed the comet's orbit that it passed outside the earth's path by about two million miles, and the expectation of a brilliant meteoric shower was not realized. Some fine meteors were, however, observed on June 27, 28, and the few following nights at Bristol and Stowmarket. They were directed from radiant points in Draco, nearly conforming with that of particles radiating from Pons-Winnecke's comet, and probably were derived from that object. Meteorites are composed of terrestrial elements, iron, chromium, magnesium, and nickel being in large proportion.

DURATION OF LIGHT AND DARKNESS.

THE second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or on the period of moonlight and sunlight during the twelve hours from 18h. to 6h. These small diagrams have four divisions, each representing three hours, and a division is left unblackened if the moon or the sun is above the horizon for at least half of the period represented. The diagrams used for the greater part of the year

are  which scarcely require explanation. In the summer when the sun is above the horizon for more than half the first and last intervals, these reduce to 

EXAMPLES.—From Jan. 10–Jan. 15 1922, there is moonlight from 18h. till 6h. (approximately), but from Jan. 23–Jan. 29 there is no moonlight.

APPARENT DIMENSIONS OF SATURN'S OUTER RING, 1922.

Date.	Major Axis.	Minor Axis.	Date.	Major Axis.	Minor Axis.	Date.	Major Axis.	Minor Axis.	Date.	Major Axis.	Minor Axis.
Jan. 7	40' 33"	+ 4' 74"	April 13	43' 64"	+ 3' 33"	July 18	37' 81"	+ 2' 58"	Oct. 22	35' 36"	+ 5' 72"
Feb. 8	42' 49"	+ 4' 77"	May 15	42' 09"	+ 2' 70"	Aug. 19	36' 28"	+ 3' 72"	Nov. 23	36' 47"	+ 6' 79"
Mar. 12	43' 80"	+ 4' 20"	June 16	39' 50"	+ 2' 59"	Sept. 20	35' 50"	+ 4' 67"	Dec. 25	38' 15"	+ 7' 74"

This table gives the angular dimensions of the outer limit of Saturn's outer Ring as seen from the Earth. The + sign shows that the North side of the Ring is presented to the Earth throughout the year.

Time Signals by Wireless Telegraphy.

IF a stone is dropped on a still sheet of water, there will proceed from the point where it falls a wave which will travel away in a widening circle. The wave will gradually diminish as it goes farther away until at last no perceptible undulation will remain. If stones be dropped continuously at regular intervals, say of one second, waves will follow one another, with equal spaces between consecutive waves. This distance between the crests of the waves is the wave-length and depends on the rate at which the stones are dropped, combined with the rate at which the waves leave the centre of disturbance. The distance to which the wave

On May 5 and 6 the moon sets before 3A. but the diagram given is the same as for night of full-moon.

THE AURORA BOREALIS.

This phenomenon is more terrestrial than celestial, and this paragraph, with that which follows, would have been more suitably placed in a later section. It sometimes happens that an unusual luminosity is seen in the northern sky in the form of streamers, arches, and condensations, and it is desirable to record the varying phases and times of these features. Its chief manifestations recur at fairly regular intervals of about eleven years, and seem to be associated with magnetic disturbances and Sun-spots, which have similar periods. The aurora is sometimes regarded as showing the outer limit of our atmosphere, and its height has been determined. The general result is that the elevation of an aurora is between 50 and 200 miles. The great majority are about 60 miles high, and there are few above 200 miles. There is some suggestion that, with magnetic storms, the period of their appearance follows that of the Sun's synodic rotation (27½ days). On March 22, 1920, there was a very extended group of spots at the middle of the Sun's disc, a magnetic storm, and splendid display of aurora during the night. A similar coincidence occurred in 1921 (May 14).

THE ZODIACAL LIGHT.

This is an appearance which is little understood, and therefore deserves the attention of observers. It shows as a band of faint light which stretches up splendidly from the Sun before sunrise in the autumn months and after sunset in March. It may be the manifestation of a widely scattered appendage of the Sun or a vast concourse of slightly reflective meteoric systems. It has been asserted that it is a mere atmospheric effect, but this is not consistent with some of the chief features of its appearance. That it has a celestial origin seems certain, but its true nature is not clearly distinguishable on the evidence before us.

travels before dying out depends on the violence of the disturbance.

Similarly, the transmitting instrument at a wireless station disturbs the ether, and the waves in the ether, resulting from the disturbance, travel in widening circles which become less marked as they go until no perceptible undulation remains. The sending station can set the distance which separates successive waves as it pleases by using apparatus which fixes the number of times per second at which the ether shall be disturbed. It cannot control the rate at which the waves travel from their source, which is the same as the speed of

light, 186,000 miles per second, but it can set the wave-length on which it shall transmit its signals to suit its own convenience, and the distance to which a wave travels before dying out being dependent on the amount of energy employed is also within the control of the sending station.

Though the circles of waves which emanate from the various sending stations all over the world overlap and intersect, which may appear to result in disastrous confusion, nevertheless each train of waves continues regardless of other trains and its wave-length remains unaltered. With a 400-metre wave-length the waves follow each other as rapidly as 750,000 a second, whilst

the crests of the waves from Annapolis (wave-length 17,000 m.) pass the aerial at a rate of considerably less than 20,000 a second. A receiving instrument can only operate if adapted to some particular set of circumstances, and must be attuned to the particular wave-length of the sending station that it is desired to receive.

* It is perhaps necessary to say that this does not refer to the action of the sending key. From the sending station a continuous train of waves is sent out and actuates the receiving instrument at a distant station properly tuned, so long as the transmitting key at the sending station is held down. By manipulating that key the continuous train is broken up into short and long pieces (dots and dashes).

WIRELESS TIME-SIGNALS THROUGHOUT THE WORLD.

	Wave Length.	G. C. T. of Signals (approximately).		Description of Signals *

San Francisco	2,400	6	20	Dots every second from 2h. 59m. 0s. to 3h. 59m. 49s., omitting second 29 and last 5 of each minute. Dash at 6h. 0m. 0s. (signal).
Arguello Point	1,512	20	0	
San Diego	2,400	20	0	
Balboa (Panama)	7,000	10	18	
Valparaiso	2,000	1	0	Dots every second, 2h. 59m. 0s. to 2h. 0m. 0s., omitting second 29 and last 5 of each minute.

* For more complete descriptions of these signals reference may be made to the Admiralty publication "List of Lights, Time-Signals, Wireless, &c." Part I.

* When signals are sent twice in the day as indicated in the third column, or when the description applies to more than one place, the times in this column are to be read, *mutatis mutandis*.

† Signal A consist of 12 a series of dashes (—) from 20h. 42m. 0s. to about 20h. 42m. 59s. with a (.) at 20h. 42m. 0s. (first time signal). (a) and (b) similar series of (—) and (—) from 20h. 42m. 0s. and 20h. 42m. 0s. respectively, with dots for time signals at 20h. 42m. 0s. and 20h. 42m. 0s. The beginning of the dot (about 1 sec.) being the time.

† Signal B are in accordance with the resolution of the International Time Conference of 1928 and consist of a series of the letter Z (Morse — —) from 2h. 59m. 0s. to 3h. 59m. 0s., followed by letter O (—) ending 3h. 59m. 0s. (preparatory signal); a series of the letter N (—) the dot being made at every tenth second of the minute 3h. 59m., followed by 5 ending 3h. 59m. 0s. and a series of letter O (—) ending with O at 2h. 0m. 0s. The last two series are time signals, and the end of the third dash of the O gives the time.

In all other cases in above list when the signal is a Dash, the beginning gives the time.

Meteorological Summary (British Isles), 1920-1921.

THE shape of our Earth is that of an oblate spheroid, or a solid of revolution whose meridian sections are ellipses not differing much from circles, whilst the sections at right angles to these are circles. The length of the Polar axis, according to a recently accepted determination (Hayford) is 7,900.0 miles and the diameter of the Equatorial circle 7,926.7 miles. The suggestion has been made that the Equator is not an exact circle, but the supposed deviation from circularity was small, and the fact has not been proved. The mean density of the Earth is 5.5 times that of water. The Earth moves round the Sun in a plane which passes through the Sun's centre, or, to write with more precision, the centre of gravity of the Earth and Moon moves in this plane, and the Earth revolves round this centre not remaining precisely in the plane. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of $23\frac{1}{2}^\circ$, and because of this inclination the Sun in the Northern hemisphere is high in the sky in the Summer months and low in the Winter. It is this tilt which causes the seasons, because the high altitude of the Sun in Summer makes the days longer and the Sun's rays fall more directly at a place in the Northern hemisphere. The case is reversed for the Southern hemisphere. The dates when the Sun is in the line of intersection of the planes of the Equator and Ecliptic are called the Equinoxes, and on these dates day and night are of equal duration all over the globe. The Sun and Earth are surrounded on all sides by the stars, and because the Earth moves round the Sun, the Sun appears to change its position with respect to the stars during the year, and different sets of stars are seen in the sky at midnight in Summer and Winter. The average velocity of the Earth in its orbit is $18\frac{1}{2}$ miles a second, and it moves more slowly in July than in January. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time. Because the Earth moves round the Sun in the same direction as it rotates on its axis, the length of a solar day is more than the length of a rotation by about four minutes (see p. 99). It has been shown almost conclusively in recent years that the axis of rotation is not a fixed line in the Earth, but that its extremity, or the North Pole of the Earth, moves in a rough spiral curve about the pole of figure at a distance of a few feet from it.

THE TIDES.

The Tides of the Ocean are rightly attributed to the attractive influence of the Moon on the Oceans, modified by a similar influence of the Sun but of less amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it might be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences, but these are very greatly modified by the land formations of our globe, and the prediction of the tides for any port depends mainly on the results of observation. A series of observed times and heights of the tide having been compiled and analysed, the analysis will show that the complete tidal movement can be represented by the combination of a series of periodic terms, and when these terms are each carried forward to some future date

their recombination gives the predicted tide. The mean level of the sea remains practically constant, but small changes have been detected which may be assigned to various causes. Taking the mean sea-level as datum, high water is at its highest (springs) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide exactly with the times of these phases of the Moon, but occur later, the interval being known as the *age* of the tide—thus, at London Bridge, the highest or spring tide occurs $2\frac{1}{2}$ days after New or Full Moon, and the neap tide is similarly delayed. The difference of height of spring and neap tides is the most apparent of the periodic differences which make up the whole tidal variation. Besides this there are differences due to the varying distance of the Moon from the Earth, and when the Moon is at or near perigee at New or Full the tide is specially high. There is a slight difference in the heights of the spring tide at New and Full Moon, and also in the height of the neap tide at the respective quarters, but these and other small periodicities are not appreciably noticeable at some ports.

TERRESTRIAL MAGNETISM.

A phenomenon of the Earth, the origin of which is obscure, but on which some light has been thrown by recent investigations, is known as Earth magnetism. Its best known manifestation is its effect on the needle of a mariner's compass, which, except for the variations to be immediately described, points continually northward. The north point indicated by a compass needle is not, except in particular cases, the north point shown by astronomical observations; in other words, the needle does not point to the North Pole of the axis of rotation of the Earth, but makes an angle with the terrestrial meridian. This angle is called the Magnetic Variation, or, more generally, Magnetic Declination, and differs in different parts of the world and even over limited tracts of country. Along a line from the north of Norfolk through Greenwich to Chichester the declination is the same as at Greenwich. Along a parallel line through Dover the West declination is at present about a degree less; from Newcastle to Plymouth it is about $1\frac{1}{2}^\circ$ greater; whilst at Dublin the declination West is 3° or 4° greater than at Greenwich. Observations of magnetic declination are made and charted to show the amount of this magnetic element over our globe, and from such charts it appears that there are two points or regions which may be considered as directive centres, and are known as the Magnetic Poles. At these places a freely suspended magnetised needle would stand vertically. They do not coincide with the terrestrial Poles, nor are they exactly antipodal. The position of the North Magnetic Pole is about latitude 73° , longitude 100° W.; the South is in latitude 72° , longitude 150° E., but these positions apparently undergo secular change. The magnetic declination at any place changes gradually year by year, and its amount observed in or near London at certain epochs is given in the table on p. 98. That the compass needle does not in general point true north and south,

but that it is inclined a certain amount east or west, and that the amount varies with the locality was recognised among western nations by the end of the 15th century, Columbus being credited with the discovery. That there is a secular change in the magnetic declination, or that the amount at any place changes slowly year by year, was discovered by Gellibrand in 1634.

Magnetic Declination at London.

Year.		
1580	11	15 East.
1665	1	30 West.
1765	20	0 West.
1800	24	0 West.

In 1859 the westerly declination at (Greenwich was about $24^{\circ} 25'$, which was probably its maximum. Since then it has been moving slowly eastward. The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only. The figures for 1901 are approximate.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich	Mean Inclination or Dip of Needle at Greenwich.
1900	$0^{\circ} 59' 0''$	1846	$67^{\circ} 8' 5''$
1910	$15^{\circ} 41' 2''$	1855	$66^{\circ} 52' 6''$
1916	$14^{\circ} 46' 9''$	18494	$66^{\circ} 52' 7''$
1917	$14^{\circ} 37' 0''$	18477	$66^{\circ} 52' 0''$
1918	$14^{\circ} 27' 7''$	18468	$66^{\circ} 52' 3''$
1919	$14^{\circ} 18' 2''$	18455	$66^{\circ} 53' 2''$
1920	$14^{\circ} 8' 7''$	18455	$66^{\circ} 53' 0''$
1921	$13^{\circ} 59' 0''$	1846	$66^{\circ} 53'$

The dip is the angle that a delicately poised needle constrained to move in a vertical plane under the action of magnetism only will make with the horizontal plane.

The declination varies during the 24 hours, for the needle makes a small excursion in the morning from East to West, and returns, the range at Greenwich being about $2\frac{1}{2}'$ in summer and $7'$ in winter. The needle occupies its mean position in the morning about 10h., and again about 12h., throughout the year. It reaches its most westerly position about 14h., and its most easterly position during the night or early morning according to season of the year. The inclination or dip also varies in a similar manner to the declination. Since these variations of the magnetic elements are mainly confined to the hours of daylight, are much greater in summer than in winter, and are evidently affected by changes in the solar activity—for the variation is larger at times of Sun-spot maximum than at minimum—it may be concluded that they are in some way dependent on solar radiation, and it is suggested that the ionisation of the upper atmosphere by the Sun, which causes it to be highly conducting, may produce the effect.

MAGNETIC STORMS.

Besides these diurnal movements and their periodic variations, the magnets recording the three elements sometimes make sudden and violent oscillations which may continue for several hours. Such an occurrence is known as a Magnetic Storm, and is accompanied by spontaneous electric earth-currents, which, if unusually violent, cause hindrance to the working of cable and telegraph systems. These storms

begin suddenly, and practically simultaneously all over the Earth. There was a magnetic storm of great violence and of long duration in May, 1901, at a time when a group of spots was to be seen on the Sun. There are many examples that show storms and spots to be contemporaneous, and there is a theory not finally accepted that magnetic storms are caused by the direct action of electrified particles which are driven into space by solar action. Dates of previous magnetic storms of some violence are: Nov. 17, 1882; Feb. 13-14, 1892; Oct. 31, 1903; Sept. 25, 1909; August 9, 10, 1917; August 11, 1919 (with no accompanying spot); and March 22, 1920.

GRAVITY.

The law of attraction or universal gravitation affirms that two bodies exert on one another an attraction directly proportional to their masses and in inverse ratio to the square of the distance between them, and since this is so the terrestrial mass exerts an attraction upon all the bodies at its surface. The combination of this attraction with the (so-called) centrifugal force due to the rotation of the earth produces a resultant force which is known as gravity. The direction of this force is the vertical.

It is found by experiment that the force of gravity (generally indicated by the letter g) is different in different latitudes. At the Pole the force exceeds that at the Equator by rather more than a two-hundredth part, or, in other words, a person who weighs 200 lbs. at the Equator by a spring balance would weigh by the same balance 201 lbs. at the Pole.

The experiments consist in finding the time of oscillation of the same pendulum in different latitudes, the time being smaller as g is larger. A pendulum which makes a swing in exactly one second is longer at places where g is large.

The following table gives the relative values of the force of gravity and the length of the seconds pendulum at various places— g is the acceleration due to gravity in centimetres per second, l is given in centimetres.

	g .	l .
Equator	$978^{\circ} 05'$	$99^{\circ} 097$
Latitude 45°	$980^{\circ} 63'$	$99^{\circ} 359$
Greenwich	$981^{\circ} 21'$	$99^{\circ} 418$
Edinburgh	$981^{\circ} 60'$	$99^{\circ} 457$
Pole	$983^{\circ} 33'$	$99^{\circ} 622$

EARTHQUAKES.*

Earthquakes, or earth tremors, are believed to be due to some form of fracture caused by the breakage of the Earth's substance under a growing strain, when the strain has passed the breaking point. This gives rise to waves which are propagated through the solid substance to distant parts of the Earth, and vertically upwards to the surface, sometimes with disastrous effects. The point where the fracture occurs and the earthquake originates is called the seismic centre, or origin, or focus. That part of the Earth which is vertically above this centre is called the epicentre. The waves transmitted through the Earth may come to the surface hundreds, or even thousands, of miles from the epicentre, and the times of arrival are recorded. The first indications on the seismograph are made by longitudinal waves (P), which are followed after an interval by direct transverse waves (S) in approximately the same path. From the length of the interval between the appearance of the (P) and the (S) waves, the distance of the origin is inferred.

Greenwich Mean Time.

Time, in the abstract, is measured by the distance described by a moving body, or machine, when the velocity of the same is sustained with perfect uniformity. Our rotating Earth is the moving body used to measure time, and a solar day is the duration of a complete rotation of the Earth round its axis with respect to the Sun, which is rather longer than a rotation with respect to the stars because the Earth moves round the Sun in the same direction as it rotates on its axis. The speed of the Earth's rotation is itself uniform, but the length of the solar day is affected, first by the movement of the Earth in its orbit round the Sun, which is not always at the same rate because of the ellipticity of the orbit, and also by the circumstance that the axis about which the Earth rotates is not perpendicular to the plane of that orbit. Clocks are adjusted to an average or mean solar day which is of uniform length and is divided into 24 equal hours. This is the basis of Mean Solar Time.

A unit and method of measurement having been established, it is necessary to choose a zero. The zero adopted is the instant when a fictitious body known as the Mean Sun, which is sometimes before, sometimes behind the real Sun in its apparent diurnal journey round the Earth, is on some chosen meridian. The meridian chosen being that which passes through some particular place, the time is called the Local Mean Time of that place. Usually some standard meridian, such as that of Greenwich, is chosen, and the time of that meridian is used throughout a whole country, and hence the expression Greenwich Mean Solar Time, or, more usually, Greenwich Mean Time arises (see Zone Standard Time, p. 100).

Apparent Solar Time.

The time shown by a sundial is affected by the two causes mentioned, which make the length of a solar day not uniform. This is called Apparent Solar Time, and differs from Mean Solar Time by the Equation of Time which is given in the second column of page 2 for each month, and is to be used according to the precept in the heading.

The Astronomical Day.

For purposes of Astronomy the day begins at noon, and the hours following noon are numbered successively from 1 to 23. There is therefore no use of the letters A.M. and P.M. in astronomical tables, but January 1st. 22^h. is the equivalent of January 21st. 10^h. a.m. in ordinary parlance, and January 2nd. 0^h. in astronomy is recognised as being January 2nd. 0^h. p.m. of ordinary life. In its early years the calculations of the Nautical Almanac were made for Apparent Noon, or the moment when the True Sun is on the meridian of Greenwich, and this is still done in some special cases, but at present the abbreviation G.M.T. indicates the time of a day which begins at Mean Noon, except when otherwise stated.

The use of a day of 24 hours beginning at noon for astronomical purposes is of great antiquity, but proposals have frequently been made for the unification of the astronomical and civil day, and in 1909 the Lords of the Admiralty, after consultation with the Royal Astronomical Society, decided to take this step. They have directed that a day beginning at midnight should be substituted for the Astronomical Day

in the *Nautical Almanac*, beginning with the edition for 1909. A day of 24 consecutively numbered hours beginning at midnight has already been used in various publications, and was adopted last year (1908) for the first time in this *Almanac*. This is generally called Greenwich Civil Time, and is indicated by the letters G.C.T.

Sidereal Time.

A sidereal day is the duration of a complete rotation of the Earth round its axis with reference to the stars. This is of uniform length, and is divided, like the mean solar day, into 24 equal hours, which are shorter than a solar hour by about 9^h 83 seconds of mean time. As the sidereal day is about 4 minutes shorter than the mean solar day (see page 79), it begins earlier day by day by about that amount. The instant of the beginning of the sidereal day in G.M.T. is given on p. 2 of each month. In actual observatory practice time is measured, and the standard clock is regulated, by this rotation of the Earth with respect to the stars, and Mean Solar Time is derived from Sidereal Time by computation (see below). The error and rate of the sidereal clock are found by observing the instant it shows when certain stars, known as Clock Stars, cross the meridian or are due south, and comparison of this with the known time of transit (star's R.A.) will give the error of the sidereal clock. Comparison of the mean solar clock with the sidereal clock will show the error of the former. The same result might be arrived at directly by observing the instant by the Mean Time clock when the star crosses the meridian.

Ex.—To find the Mean Time which corresponds to 12^h. 57^m. 53^s. Sidereal Time on Aug. 15:

"Summer" Time.

In the spring of 1916 the Government adopted as a war-measure the principle of a scheme proposed by Mr. William Willett about the year 1907 and an Act was passed, known as the Summer Time Act (1916), the first clause of which runs: "During the prescribed period in each year in which this Act is in force the time for general purposes in Great Britain shall be one hour in advance of Greenwich Mean Time." A committee appointed to consider the working of the Act in 1915 reported in its favour, and Summer Time has been used in the following periods in accordance with an Order in Council issued in each year:—

1916.	May 21 st . 2 ^h .	to Oct. 1 st . 2 ^h .
1917.	April 28 th . 2 ^h .	to Sept. 17 th . 2 ^h .
1918.	Mar. 24 th . 2 ^h .	to Sept. 30 th . 2 ^h .
1919.	Mar. 30 th . 2 ^h .	to Sept. 29 th . 2 ^h .
1920.	Mar. 28 th . 2 ^h .	to Oct. 24 th . 2 ^h .
1921.	April 2 nd . 2 ^h .	to Oct. 31 st . 2 ^h .

The hour being Greenwich Civil in each case. (In 1920 the ending of the period was postponed for four weeks in view of a possible "strike" in the coal-mining industry.)

IN the year 1880 it was enacted by statute that the word "time," when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian. There are other examples of the adoption by nations of the time of their own capital as the Standard Time of the country, but since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now nearly all the countries of the world use as Standard the Time of some meridian which differs from that of Greenwich by a multiple of 15°, and therefore differs from Greenwich Mean Solar Time by an integral number of hours, either fast or slow. In a few cases differences including a half hour have been adopted.

The countries in which Standard Time has been adopted according to this scheme are given in the accompanying table. In the large territories of the United States and Canada it has been found expedient to adopt five different standard times, the territories being divided into five by meridians, 7½° on either side of the five central meridians. This arrangement is not strictly adhered to, because towns and cities near the dividing lines adopt which of the two times is the more suitable to railway or local requirements. The same plan is followed in Brazil, which is divided into three zones, and in these the time, 3 hours, 4 hours, or 5 hours slow on Greenwich, is adopted as standard respectively.

Fast or Slow on
Greenwich Time

12	hrs. F....Fiji Islands.
11½	" F....New Zealand.*
11	" F....New Caledonia and dependencies, Caroline Is., east of 154° E., Marshall Is.
10	" F....Victoria, New South Wales, Queens- land, Tasmania, New Guinea, Bismarck Archipelago, Caroline Is., Marianne Is. (except Guam).
9½	" F....South Australia.
9	" F....Japan, Corea, Yap (Caroline Is.).
8	" F....Port Arthur, East China, Hong Kong, Philippine Is., Formosa and Pescadore Is., North Borneo and Labuan, Macao, Portuguese Timor, West Australia.
7	" F....French Indo-China, Siam, Fede- rated Malay States, Straits Settle- ments.
6½	" F....Burma.
5½	" F....India (except Calcutta and Portu- guese India), Ceylon.
5	" F....Chagos Archipelago, Portuguese India.
4	" F....Mauritius, Seychelles, Réunion.
3	" F....French Somaliland, Madagascar, Italian Somaliland, Aden.
2½	" F....British East Africa.
2	" F....Turkey, Greece, Bulgaria, Rou- mania, Russia (time of Pulkovo 2 hours 1 minute fast on Green- wich), Egypt, Rhodesia and Union of South Africa, Portuguese East Africa, Cyprus, Finland.
1 hr. F....	Sweden, Norway, Denmark, Ger- many, Luxembourg, Austria, Hungary, Switzerland, Italy, Roumania, Serbia, Malta, Czecho- Slovakia, Tunis, Nigeria, French Equatorial Africa, Cameroons.

Fast or Slow on
Greenwich Time.

	Belgian Congo, Portuguese West Africa, South-West Africa, Angola, Libya, Serbia.
Greenwich ...	Great Britain, Ireland, France, Bel- gium, Spain, Portugal, Farøe Is., Gibraltar, Algeria, St. Thomas and Princes Is., Ivory Coast, Dahomey, Morocco, Bathurst (Gambia), Gold Coast (Jan.-Aug.).
1 hr. S....	Iceland, Madeira, French Guinea, Senegal, Portuguese Guinea, Li- beria, Sierra Leone.
2 hrs. S....	Azores, Cape Verde Is., Fernando and Trinidad Is. (Brazil).
3	" S....Eastern Brazil.
4	" S....New Brunswick (East), Nova Scotia, Quebec (East), Prince Edward Is., Porto Rico, Trinidad, the Leeward Is., Grenada, Guade- loupe, Tobago, Martinique, St. Lucia, St. Vincent, St. Pierre, Central Brazil, the Argentine Republic, Uruguay, French Guiana.
4½	" S....Venezuela.
5	" S....Quebec, Ontario to 82° 30' W., New Brunswick, Eastern Zone of the United States, Jamaica, Bahama Is., Peru, Panama, Western Brazil.
6	" S....Central Zones of Canada and United States, Honduras.
7	" S....Mountain Zones of Canada and the United States.
8	" S....British Columbia, California, Nevada, Oregon, Washington.
9	" S....Yukon, Alaska.
10	" S....Low Archipelago, Marquesas, Aus- tral and Society Is.
10½	" S....Sandwich Is.

The time 2 hours fast on Greenwich is called East-European, that 1 hour fast is called Mid-European. The time appropriate to Eastern Canada, 4 hours slow on Greenwich, has been called alternatively Maritime, Inter-Colonial, and Atlantic Time. The standard times in use in the other four zones of the North American continent are called respectively Eastern, Central, Mountain, and Pacific Time.

It will be inferred from the above table that when it is noon at Greenwich on any day of the week, it will be midnight of that day in the Fiji Islands, but half-past one in the morning of that same day in the Sandwich Islands, so that the calendar and times as kept at the two places will differ by nearly a day, though they are separated by a comparatively short distance.

THE DATE OR CALENDAR LINE.

The line where the change of date occurs as adopted by the British Admiralty is a modification of the 180th meridian, and is drawn so as to include islands of any one group of the same side of the line, or for political reasons. The line is indicated by joining up the following eight points:—

- (1) Lat. 60° S., long. 180°.
- (2) " 51½° S., long. 180°.
- (3) " 45½° S., long. 174½° W.
- (4) " 15½° S., long. 174½° W.
- (5) " 5° S., long. 180°.
- (6) " 48° N., long. 180°.
- (7) " 24½° N., long. 170° E.
- (8) " 65° N., long. 169° E.

Then through the centre of Bering Strait to a point lat. 70° N., long. 180°.

* It is proposed that the time of New Zealand shall be altered to 2½ hours fast on Greenwich.

THE AGE OF THE EARTH.

VARIOUS estimates have been made of the Age of the Earth, which were formerly based on unscientific processes. The scientific investigations of geologists and ethnographical research showed the inaccuracy of computations, which gave the year 4004 B.C. for the "Creation of the World" (Ussher); 3760 B.C. (Jewish Chronology); 4773 B.C. (Julian Epoch); or 5508 B.C. (Era of Constantinople). From the assumption that the Sun's heat is sustained solely by contraction of its bulk Lord Kelvin deduced 20,000,000 years as the time during which it has existed, but this period is much too short to be accepted by geologists as the Age of the Earth. The discovery of radio-active substances brought a new factor into consideration, and it has been lately estimated that as the abode of life (Lord Rayleigh, *Brit. Assoc.*, 1922) a moderate multiple of 1,000,000,000 years is the possible and probable duration of the earth's crust.

GEOLOGICAL PERIODS.

The periods of stratification of the Earth's crust are classified by geologists as shown below, each period having sub-divisions:—

- I. AZOIC ("Without Life"), containing no trace of life in any form. The duration of this period probably far exceeded that of all the remaining divisions together.
- II. Eozoic ("Dawn of Life"), characterized by the first appearance of animal life.
- III. PALÆOZOIC ("Old Life") or PRIMARY, containing traces of extinct animal life:—
 - i. Cambrian, exemplified in Wales (Cambria), Cumberland, etc.—the earliest group which possesses a connected suite of fossils.
 - ii. Ordovician, exemplified in North Wales and named after the ancient British tribe (Ordovices) inhabiting the region.
 - iii. Silurian, named after the ancient British inhabitants (Silures) of S.E. Wales.
 - iv. Devonian or Old Red Sandstone, from the prevalence of the system as a marine formation in Devonshire.
 - v. Carboniferous, including Coal Measures, Millstone Grit and Mountain Limestone.
 - vi. Permian, from the Russian province of Perm, where these strata are widespread.
- IV. MESOZOIC ("Middle Life") or SECONDARY, with intermediate forms of animal life:—
 - i. Triassic, from the three (tri-) divisions of the type formation in Germany.
 - ii. Jurassic, typically displayed in the Jura Mountains.
 - iii. Cretaceous, from the chalky nature of its representatives where first studied.
- V. CENOZOIC ("New Life") or TERTIARY, containing forms of existing life:—
 - i. Eocene, the dawn or beginning of new forms of life, i.e., existing species.
 - ii. Oligocene, containing a few still existing species.
 - iii. Miocene, containing a minority of existing species—less than 50 per cent.
 - iv. Pliocene, the fossil remains show a majority of still existing species.
- VI. QUATERNARY ("Fourth in Order") or POST-TERTIARY:—
 - i. Pleistocene or Glacial, the greatest number of the remains are those of still existing species. Period of last Great Ice Age.
 - ii. Recent or Post-Glacial.

Definite dates cannot be assigned to most

periods, but G. de Geer has shown that scarcely 9,000 years ago the site of Stockholm was beneath the ice-sheet (VI. I.). Traces of human life are first found in V. iv.

THE ANTIQUITY OF MAN.

Pithecanthropus erectus (Erect Ape-man).—Remains of a skull and of a thigh bone were found in 1891 and 1892 by Professor Dubois, at Trinil, Java. These are held to be remains of a creature of Pliocene times (see Geological Period, ante), about midway between the Orangutan and Man in development.

Homo Heidelbergensis (The Heidelberg Man).—A lower jaw was discovered near Mauer, Heidelberg, in 1907. This is held to be that of a primitive man of the earliest Pliocene Period. The difficulty of assigning dates to the Heidelberg or Trinil remains is shown in the conflict of authority, as one estimate gives 240,000 years (Rutot) for the whole, and another gives 700,000 years (Sturge) for a portion only of the Pliocene Period.

The Piltown Skull.—Discovered in 1912 at Piltown, Sussex, and ascribed to primitive man (Eo-anthropos) of early Palæolithic times.

Neanderthal Man.—Remains of a skull and parts of a skeleton found in 1856 in the Neanderthal Ravine, near Dusseldorf, Rhenish Prussia, and others found at Spy, Belgium, in 1884, are held to represent the oldest known dolichocephalic (long-headed) race in Europe, living about 50,000 years before the Christian Era.

Homo primigenius.—Discoveries of interred human remains at Combe Capelle, Dordogne, France (1909), at Brüh and Britton, Moravia, and at Galle Hill, Northfleet, Kent (1895) are held to be those of human beings of late Palæolithic times, from 35,000 to 15,000 B.C.

STAGES OF CIVILIZATION.

The terms employed by ethnologists cover periods which reach to the more recent geological divisions of time and extend to the present day. They are periods, not of time, but of culture, and are of local application only, there being no universal synchronous sequence in all parts of the world. This may be better understood when it is remembered that while races of Europe, Asia and America had reached the Iron Age of development long before the 18th century, A.D., there were races in Oceania still in the Palæolithic (or at least Neolithic) stage at the time of Cook's voyages. Dates appended to the various stages are necessarily conjectural and they are based on parallel discoveries of remains of extinct or still existing animal life.

The Stone Age.—The ancestors of primitive man are held to have adopted the use of stones of a suitable size for defence against predatory mammals and for the slaughter of animals for food, while primitive man made such instruments more effective by sharpening them to a rough point. The earliest period is known as *Eolithic*, or Dawn of the Stone Age, and this period may have extended to 600,000 years B.C. Weapons of a later period, known as *Palæolithic*, or Old Stone Age, show gradual developments, from the chipped, leaf-shape forms, known as *Chellean* (from Chelles, Seine at Marne, France), and employed, perhaps, from 400,000 to 100,000 B.C., to later and more effective flint points, arrow-heads and spear-heads, flat on one side, known as *Mousterian* (from Le Moustier, where many such implements and other remains were found). The Mousterian period is held to have lasted until about 20,000 B.C., when *Neolithic*,

or New Stone Age, weapons, polished and less crudely fashioned, were brought into use for a further period of about 5,000 years. In the Stone Age the burial of the dead was influenced by the primitive nature of the implements available for digging, the graves being only large enough to contain a body huddled together in a cramped position.

Cultivation of the Soil.—Cultivation is believed to have followed the interment of the dead about 25,000 B.C., and rendered possible the political (polis = city) organisation of mankind. There appears to have been a definite centre of Western Civilization at Nippur (and elsewhere in Mesopotamia) no later than 6,000 B.C., and in Egypt, under the first of the Pharaohs (Menes), about 5,000 B.C. It is not yet known if a similar degree of Eastern civilization had been reached in China, or elsewhere, during (or before) that of Mesopotamia and Egypt.

The Bronze Age.—Intercommunication of races introduced a knowledge of the malleable properties of copper, while the spread of commerce distributed tin from Saxony and Cornwall among the races of Europe and Asia. Implements of cast bronze superseded the more primitive polished stone weapons, while utensils and ornaments of the same alloy replaced those of wood or horn or bone. The designs and decorations of the Bronze Age suggest that this stage of culture was introduced into Europe from Asia, and it must therefore be dated for the East far earlier than for the West, over a period ranging from 5,000 to 3,000 B.C. The Bronze Age appears to have been marked by the cremation of human remains, in place of mere burial in a constricted position.

The Iron Age.—Implements of cast bronze were in turn superseded by those of hammered iron at varying dates—in China, Chaldaea, Assyria and Egypt about 4000 B.C.; in South-Eastern Europe about 3000 B.C.; spreading over the rest of Europe from 1000 B.C. to 500 A.D., by which time the use of hammered iron was known throughout Scandinavia and in Ireland. It is possible that the Eastern civilization discarded the use of bronze and adopted that of iron even before the West had reached the Bronze Age, and while the remoter parts were still in the Palaeolithic Age. With the Iron Age was re-introduced interment of human remains, in place of Bronze Age cremation, but the bodies were laid at full length in the ground and not huddled up as in the Stone Age. The later Iron Age has developed into the Steel Age, and the transition from iron to steel marks a stage in the progress of civilization at least as great as that from the Bronze to the Iron Age.

EPOCHS AND CALENDARS.

Abyssinians.—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, commencing at 1 again upon the completion of each cycle. Their first year began on 29th August, 284 A.D. (See also "Coptic," post.)

Armenians.—The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 26th July, 552 A.D.

Assyrian or Babylonian.—In the eighth century B.C. the Babylonians commenced a chronology with the era of the founder of their Empire. Their epoch corresponds to 25th February, 747 B.C.

Biblical.—The Christians of Western Europe

made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century (1650) James Ussher, Archbishop of Armagh, published his *Annales Veteris Testamenti*, and Ussher's Notation was afterwards printed in marginal notes to the Authorised Version of the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

Christian.—The Christian year was first adopted in Italy in the sixth and was accepted by England in the eighth century. The years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*) and A.D. (*Anno Domini*), the conventional abbreviation A.D. signifying *Anno Domini*, "In the year of the Lord." The correlative dates of the epoch are the 4th year of the 124th Olympiad, the 753rd year from the Foundation of Rome, 2760 A.M. (Jewish Chronology), and the 4714th year of the Julian Period. The date of the Nativity of Christ does not in fact correspond with 1 A.D., but is placed in an earlier year from B.C. 4 to B.C. 9. A "Christian Era Calendar," giving the days of the week of any year in the Christian Era, was given on pp. 98-9 of the 1921 issue.

Coptic.—In the Coptic Calendar, which is used by part of the population of Egypt and Ethiopia, the year is made up of 12 months of 30 days each, followed, in general, by 5 complementary days. Every fourth year is an Intercalary or Leap-year, and in these years there are 6 complementary days. The Intercalary year of the Coptic Calendar immediately precedes the Leap-year of the Julian Calendar. The Era is that of Diocletian or the Martyrs, the origin of which is fixed at A.D. 284, August 29 (Julian date). A Coptic Calendar for the year 1638 and part of 1639 is appended:—

Year 1638.	A.D. 1921.	Year 1638.	A.D. 1922.
Tut	Sept. 11	Bunah	June 8
Bahah	Oct. 11	Abib	July 8
Hatur	Nov. 10	Maeri	August 7
Kihak	Dec. 10	Complement-	
	A.D. 1922.	ary days ..	Sept. 6-20
Tubah	Jan. 9	Year 1639.	
Amshir	Feb. 8	Tut	Sept. 11
Barmahat	March 10	Bahah	Oct. 11
Barmudah	April 9	Hatur	Nov. 10
Bashuns	May 9	Kihak	Dec. 10

Hindu.—In addition to the Muhammadan reckoning there are four eras used in India. The principal astronomical system was the *Kaliyuga Era*, which appears to have been adopted in the fourth century A.D. It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B.C. The year 1922 A.D. is, therefore, the year 1979 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D. 78, was probably founded by Kanishka (whose year was widely extended), and is in general use. The year 1922 A.D. is 1844 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The Buddhists reckoned

from the death of Buddha in 543 B.C. (the actual date being 477 B.C.); and the epoch of the *Jains* was the death of Vardhamana, the founder of their faith, in 527 B.C.

Japanese and Chinese.—Japan in 1872 and the Chinese Republic in 1912 adopted the calendar of Western Europe.

Jewish.—In the fifteenth century the Jews adopted as their epoch the Creation of the World, which was placed in a year called in the Christian chronology 3760 B.C. Thus the year 1922 A.D. is *Annuus Mundi* 5682-3 in the Jewish Calendar. A calendar for 5682-5683 is appended:—

(A.M. 5682 and part of A.M. 5683.)

A.M. 5682.	A.D. 1922.
Tishri 1 Rosh Hashanah (New Year) Oct. 3

" 25 Hanuca, Dedication of the Temple. Dec. 15	
Tebet 1 New Moon " 20	
" 10 Fast of Tebet " 29	

Note.—All Jewish Sabbaths and Festivals begin the previous evening at Sunset.

Macedonian.—The epoch was the occupation of Babylon by Seleucus Nicator in 321 B.C., and this system of chronology prevailed in all Greek countries until the Middle Ages, and was adopted

by the Jews until the fifteenth century. It is extant among certain nomadic Arab tribes.

Muhammadian.—The Muhammadian Epoch is the Hijra (Flight of Muhammad) from Mecca to Medina in 622 A.D. The first day of the first month of the Muhammadian Era corresponds to 16th July, 622 A.D. The year 1922 is therefore 1340-1 of the Hijra, a calendar for which year is appended:—

Year of Hijra	A.D. 1922.
1340	
Muharram 1 September 4	
Saphar October 4	
Rabia I November 2	
Rabia II December 2	
Jomada I December 31	
	A.D. 1922.
Jomada II January 30	
Rajab February 28	
Shaaban March 30	
Ramadan April 28	
Shawwal May 28	
Dulkaada June 26	
Dulheggia July 26	
1341	
Muharram August 24	
Saphar September 23	
Rabia I October 22	
Rabia II November 21	
Jomada I December 20	

Olympiads.—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia, in Elis, once in four years; the intervening years being the first, second, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Choroebus, 776 B.C.

Persian.—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yazdgerd III. to the throne on 10th June, 632 A.D. The year 1922 is, therefore, 1291 of the Parsees. The New Year begins on 21st March.

Roman.—Roman historians adopted as an epoch the Foundation of Rome, which they signified by the abbreviation A.U.C., *Ab (anno) Urbis Condite* (From the year of the founded city). This epoch is believed to fall in the year 753 B.C. The Calendar as we know it was a Roman institution; it was revised and reformed in 46 B.C. by Julius Caesar, who added months named "Julius" and "Augustus" before the former seventh month, and thus caused *Septem- Octo-, Novem- and December* to become the 6th, 10th, 11th and 12th months. It remained unchanged in the British Dominions until the year 1752 A.D. (See "Old and New Style," post.) In the Roman (Julian) Calendar the days of the month were not counted onward from the beginning, as with us, but three fixed points were taken, and the intervening days were said to be so many days before the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and (3) the Ides, which always fell eight days after the Nones. After the Ides the days were reckoned as being so many "before the Kalends of the next month" or *ante-diem-Kalendas*, the last day being called the day before the Kalends of the next month, thus Dec. 31 would have been *Pridie Kalendas Januariæ*.

CHRONOLOGICAL TERMS.

The Day, Week and Month.—Measurements of time are based on the time taken by the earth to rotate on its axis; by the moon to revolve round the earth; and by the earth to revolve round the sun. As these motions are not exactly commensurable with one another, it has been necessary to adopt average or mean intervals of time for ordinary use. Of these the first is the *Day*, which commences at midnight and is divided into 24 hours of 60 minutes, each of 60 seconds. The hours are counted from midnight up to 12 at noon, and again from noon up to 12 at midnight, except when the *Twenty-four Hour* reckoning is employed. The 24-hour reckoning ignores A.M. and P.M., and the hours are called 1 to 24 from midnight to midnight.

For the *Astronomical Day* see p. 99.

With the *Jews* and *Muhammadans* the day begins, not at midnight, but at sunset on the previous day, and the hours between sunset and midnight belong to the *succeeding* day in the Jewish and Muhammadan calendars.

The Week is a period of 7 days.

The Month in the ordinary calendar is approximately the twelfth part of a year, but the length of the different months varies as follows:—

January, March, May, July, August, October, and December have each 31 days.

April, June, September, and November have each 30 days.

February has 28 days, except in leap year, when it has 29 days.

The *Jews* and *Muhammadans* use the *Lunar Month*, based on the length of time that the moon takes to revolve round the earth. The month commences, not at true new moon, but at sunset of the day when the new moon is first seen after sunset. The length of the lunar month varies, and the Jewish and Muhammadan months have sometimes 30 and sometimes 29 days.

The Equinoctial or Tropical Year is the time that the earth takes to revolve round the sun from equinox to equinox, which is 365.2422 mean days. The *Calendar Year* consists of 365 days, but every year the date of which is divisible by 4, without remainder, is *Leap Year* and consists of 366 days, except the last year of each century that is not divisible by 400 without remainder (e.g. the years 1800 and 1900 had only 365 days). The extra day in every fourth year was added by Julius Caesar in order to reconcile the Tropical and Calendar years, and four Julian years thus contained 1461 days. There was therefore an error amounting to 3.12 days in 400 years, which was partly remedied by the omission of 3 days in every 400 years under the reform of 1582 (see "Old and New Style" post).

The *Muhammadan year* always consists of twelve lunar months, and is sometimes 354 and sometimes 355 days in length.

Old and New Style.—Towards the close of the 16th century there was a difference of 10 days between the tropical and calendar years (see above). In 1582 Pope Gregory ordained that Oct. 5th should be called Oct. 15th, and that only every fourth (instead of every) end-century year should be a leap year. This change was adopted by Italy, France, Spain, and Portugal in 1582; by Russia, the German Roman Catholic States, Switzerland, Holland, and Flanders on Jan. 1, 1700; Poland 1766, Hungary

1807, the German and Netherland Protestant States and Denmark 1700, Sweden (gradually) by the omission of eleven leap days, 1700–1740, the British Dominions (which included the then North American Colonies) in 1752, by the omission of eleven days (Sept. 3 being reckoned as Sept. 14). This "Western" Calendar was adopted by Japan in 1873, China in 1912, Bulgaria in 1925, Soviet Russia in 1927, and by Yugo-Slavia and Rumania in 1929. The difference between the Old and New Styles since 1900 is 13 days (12 days after 1700, 12 days after 1800 and 13 days after 1900).

New Year's Day.—The Civil year in the British Dominions (exclusive of Scotland) commenced with March 25, "Lady Day" or "The Feast of the Annunciation," until 1752. But on and from 1752 the civil year has commenced with Jan. 1. The Old Style reckoning is still maintained to some extent by the British Treasury, and certain dividends are payable at the Bank of England on the Old Style Quarter Days, while the "Financial Year" is still reckoned as commencing on "Old Lady Day," April 5. Scotland in 1600 changed New Year's Day from Mar. 25 to Jan. 1. On the Continent, Jan. 1 was adopted as the first day of the year by Venice in 1522, Germany in 1544, Spain, Portugal and the Roman Catholic Netherlands in 1556, Prussia, Denmark and Sweden in 1559, France 1564, Lorraine 1579, Protestant Netherlands 1583, Russia 1745, Tuscany 1751.

Golden Number, so called from its importance in calculating the date of Easter, is the number of any year in a lunar cycle of nineteen years. It contains (approximately) 235 lunations, in which period the Moon returns to the same apparent position with regard to the Sun, so that new and full Moons occur at the same dates in the corresponding year of each cycle.

Easter Day is the first Sunday after the *Paschal Full Moon* (i.e., the full moon which happens upon, or next after, March 21; if that full moon occurs on a Sunday, Easter Day is the Sunday after). A Table of Easter Days from 1761 to 2000 A.D. will be found on p. 77. A bill was introduced in Parliament in 1921 to regulate the date of Easter, and under this regulation Easter Day would fall each year on the second Sunday in April.

Epat.—The age of the Moon at the commencement of the year, thus indicating the difference between the solar and lunar cycles.

Solar Cycle.—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Julian Period.—"A period of 7980 Julian years, proposed by Joseph Scaliger in 1582 as a universal standard of comparison of chronology, consisting of the product of the number of years in the solar and lunar cycles and the cycle of the indiction (28 × 19 × 15)." — *New English Dictionary*.

Roman Indiction.—A period of fifteen years, instituted by the Emperor Constantine in A.D. 313 for fiscal purposes.

The Dominical Letter is one of the first seven letters of the alphabet, A–G, which are used in succession to denote the Sundays (Lord's Day) in a particular year. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1–Feb. 29, the second from March 1–Dec. 31. A Table of Dominical Letters from 1761 to 2000 A.D. will be found on p. 77.

TOTAL	388,810,000	748,200,000	149,921,000	112,935,000	38,000,000	52,925,000	1,446,491,000

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the *Equator* is 7,926½ English miles, and at the *Poles* 7,900 English miles. The *Equatorial Circumference* is 24,901·8 English miles, divided into 360 Degrees of Longitude, each of 69·17 English (or 60 Geographical) miles; these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by *Parallels of Latitude*, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION.

Continent.	Area in Square Miles.	Estimated Population.
Europe	3,750,000	400,000,000
Asia	17,000,000	910,000,000
Africa	11,500,000	180,000,000
North America ..	8,000,000	120,000,000
South America ..	6,800,000	38,000,000
Oceania	3,450,000	8,000,000
Polar Regions ...	5,000,000	...
	55,500,000	1,645,000,000

The British Empire extends over the largest area (14,220,000 sq. miles); Russia is the second largest country (8,400,000 sq. miles); France is third, with 4,336,000 sq. miles; China extends over 4,300,000 sq. miles; the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq. miles, and Brazil 3,220,000 sq. miles.

THE RACES OF MANKIND.†

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows:—

Division.	Area.	Estimated Number
Mongolian ..	Asia	655,000,000
Caucasian ..	Europe & Orient ..	645,000,000
Negro	Africa	190,000,000
Semite	North Africa	82,000,000
Malayan	Australasia	52,000,000
Red Indian ...	America	23,000,000
		1,645,000,000

* The Earth is a Sphere, with a Northern and Southern Hemisphere; the Ocean surface is called the *Hydrosphere*, and the gaseous envelope the *Atmosphere*. The science concerned with the study of the Earth's crust is *Geology*, with the measurement of its surface *Geodesy*; the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Ornography*. The study of the Races of Mankind is *Ethnology*, and of their location *Ethnogeography*. The study of extinct organic life is *Paleontology*, and of existing life *Biology*.

An aircraft with a constant speed of 100 miles an hour would take nearly 25 years to reach the Sun. The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (44,648 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 68,000 miles an hour (1,632,000 miles in 24 days, 6 hours, 8 minutes).

† It has been estimated that the Earth can maintain a population of 4,000,000,000, a total which will be reached about A.D. 2220, at the present rate of increase.

OCEAN AREAS AND DEPTHS.

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas); but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each:—

Name.	Area of Basin (sq. miles).	Greatest Depth (feet).
Pacific	63,986,000	Off Mindanao, 32,089
Atlantic	31,530,000	Porto Rico Trench, 31,366
Indian	28,350,000	Sunda Trench, 22,968
Arctic	5,541,600	North Polar, 13,200
Malay	3,137,000	Kei Trench, 21,342
Central American	1,770,170	Caribbean, 20,568
Mediterranean	1,145,000	Pola Deep, 12,276
Behring	878,000	Buldir Trough, 13,422
Okhotsk	582,000	Kurile Trough, 10,554
East China	480,000	about 10,500
Hudson Bay	472,000	about 1,500
Japan	405,000	about 10,200
Andaman	305,000	about 11,000
North Sea	221,000	Skaggerak, 1,998
Red Sea	178,000	20° N., 7,254
Baltic	158,000	about 12,000

THE HIGHEST MOUNTAINS.

Name.	Range.	Height in Feet.
Everest	Himalayas	29,002
Godwin-Austen (K 2)	"	28,250
Kanchanganga I. ...	"	28,146
" II. ...	"	27,803
Makalu	"	27,790
Tengri Khan	Thian Shan	24,000
Chumalhari	Himalayas	23,944
Aconcagua	Andes	22,868
*Sahama	Bolivia	22,349
Illimapu (Sorata)	Andes	21,490
Illimani	"	21,031
Chimborazo	"	20,498
Lulliallaco	"	20,243
McKinley	Alaska	20,300
Kilima Njaro	German E. Africa	19,780
*Cotopaxi	Andes	19,612
Mount Logan	Rockies	19,539
Licancabur	Andes	19,521
*Mount Elias	Rockies	19,500
Elburg	Caucasus	18,526
Demavend	"	18,464
Tollma	Cordilleras	18,380
El Petra	Andes	18,045
Charles Louis	New Guinea	18,000
*Popocatepetl	Mexico	17,540
Maipo	Andes	17,421
Chimkapetl	Mexico	17,360
*Sagay	Beaudo	17,124
Kongtan Tau	Caucasus	17,096
Konyu	Brit. E. Africa	17,040
Ararat	Armenia	16,916
Ruwenzori	Uganda	16,800
Kasbek	Caucasus	16,546
Mont Blanc	Alps	15,781

* Volcanoes. In addition to those marked, Vesuvius, St. and Stromboli in Europe, Erebus and Terror in the Antarctic, Meadand Skaptar Jökull in Iceland, Mauna-Loa, Kea and Hualalai in Hawaii, Tombora in Japan, and Le Soufrier and La Pelée in the West Indies.

THE LARGEST ISLANDS.

Name of Island.	Ocean.	Area in Sq. Miles.
Greenland (Danish)	Arctic	87,300
New Guinea (Brit.-Neth.)	Pacific	330,000
Borneo (Brit.-Netherlands)	"	280,000
Baia Land (British)	Arctic	230,000
Madagascar (French)	Indian	228,000
Sumatra (Netherlands)	"	160,000
Great Britain	Atlantic	88,603
Honshiu (Japan)	Pacific	87,500
Celebes (Netherlands)	Indian	72,000
Prince Albert, &c. (British)	Arctic	60,000
South Island, N.Z. (British)	Pacific	58,500
Java (Netherlands)	Indian	48,400
North Island, N.Z. (British)	Pacific	44,500
Cuba (Independent)	Atlantic	44,000
Luzon (U.S.A.)	Pacific	41,000
Newfoundland (British)	Atlantic	40,200
Iceland (Danish)	"	40,000
Ellesmere (British)	Arctic	40,000
Mindanao (U.S.A.)	Pacific	37,000

A considerable number of vessels, which are not yet completed, appear in the Register Book and are therefore included in this Table.

Vessels trading on the Caspian Sea, and Wood vessels trading on the Great Lakes of North America, are not included.

In the absence of satisfactory information, the records of most of the Sailing vessels belonging to Greece, Turkey, and Southern Russia, are omitted from the Register Book and therefore do not appear in this Table.

Japanese Sailing vessels are not recorded in Lloyd's Register Book without record of flag. (a) Ex-German steamers of 200 tons gross and above, the heading of which is not yet known, and a number of ex-Austro-Hungarian vessels inserted in the Register Book as being registered at Fiume or ports south of Fiume.

(b) Vessels registered at Danzig and Memel. (c) Some other vessels regarding which no definite information has been received up to the time of going to press.

The League of Nations.

ONE of the results of the War of 1914-1918 was the formation of a League of Nations, with a Covenant, and a Charter of XXVI Articles.

The High Contracting Parties agreed to the Covenant in order to promote International Co-operation and to achieve International Peace and Security, by the acceptance of obligations not to resort to War

"by the prescription of open, just and honourable relations between Nations;

by the firm establishment of the understandings of International Law as the actual rule of conduct among Governments;

and by the maintenance of justice and a scrupulous regard for all Treaty Obligations in the dealings of Organized Peoples with one another."

The territorial integrity and existing political independence of all members of the League is guaranteed by Article X of the Covenant. In case of any dispute between members, likely to lead to a rupture, they will submit the matter to arbitration or enquiry, and agree not to resort to war until three months after the award by the arbitrator or the report by the Council, such award to be made within a reasonable time, and such report to be made within six months of the submission of the matter in dispute. Any member resorting to war in disregard of these rules shall be deemed to have committed an act of war against all the remaining members of the League, who undertake to subject the aggressor to the severance of all intercourse and trade or financial relations, while the Council of the League shall recommend to the Governments concerned what effective force shall be contributed by each to protect the covenants of the League.

In the event of a dispute between a member of the League and a State which is not a member (or between States that are not members) invitation shall be made to the State or States that are not members to accept membership, with its privileges and obligations. If the invitation be refused, and the State that is not a member resort to war against a member of the League, such State shall be deemed to have made war on every member of the League and shall be so dealt with. If the invitation be refused by States that are not members, the Council shall take such steps as may be possible to avert hostilities and to settle the dispute.

Article XXIII provides for securing fair and humane conditions of labour for men, women and children in the countries of members, and in those in which members have commercial and industrial relations, and provides for the just treatment of natives; for the suppression of the "White Slave" traffic; for the supervision of the traffic in opium and dangerous drugs, and in arms and ammunition; for the freedom of communications and trade between members, and for the prevention and control of disease.

The formation of the League was very largely the work of Woodrow Wilson, President of the United States of America 1913-21, but his action in committing the United States to participation in the League was repudiated by the Foreign Relations Committee of the Senate of the U.S. and was not endorsed by the electors in the Presidential Election of 1920.

The Council of the League consists of representatives of the British Empire, France, Italy

and Japan, together with representatives of four other members of the League selected by the Assembly of Representatives of the members of the League. Any member of the League not represented on the Council shall be invited to send a representative to sit as a member of the Council during the consideration of matters specially affecting the interests of that member of the League.

The original members of the League were the Signatories of the Treaty of Peace at Versailles on behalf of the Allies, June 28, 1919, such signatories being indicated by an asterisk (*) in the following list, but the *United States*, *Ecuador* and *The Hedjaz* (whose representatives signed the Treaty) did not send delegates to Geneva, while the *Argentine* representatives withdrew, after protesting against the provisions of Article X of the Covenant.

The following Nations were represented at the First Assembly of the League of Nations at Geneva, Dec., 1920.

*Argentina	*Greece	*Peru
*Australia	*Guatemala	*Poland
*Belgium	*Haiti	*Portugal
*Bolivia	*Honduras	*Rumania
*Brazil	*India	Salvador
*British Empire	*Italy	*Siam
*Canada	*Japan	Spain
Chile	*Liberia	Sweden
*China	Netherlands	Switzerland
Colombia	*New Zealand	*Union of South Africa
*Cuba	*Nicaragua	*Uruguay
*Czecho	Norway	Venezuela
Slovakia	*Panama	*Yugo-Slavia
Denmark	Paraguay	
*France	Persia	

Any fully self-governing State, Dominion or Colony, not named as an Original Member, may become a member of the League if its admission is agreed to by two-thirds of the Assembly.

Albania, Austria, Costa Rica, Finland and Luxemburg were admitted to membership during the Geneva meeting of Dec., 1920, and Esthonia, Latvia and Lithuania at the meeting of Sept., 1921.

Any member of the League may, after two years' notice of its intention to do so, withdraw from the League, provided that all its international obligations, and all its obligations under the Covenant, shall have been fulfilled at the time of its withdrawal.

In July 1921 the League had a membership of 48 States and an expenditure of £1,062,500, towards which Great Britain contributed £52,000.

In Oct. 1921, the Council of the League determined the question of the boundaries of Upper Silesia, referred to the League by the Supreme Council of the Allies.

President (1921), M. Paul Hymans.
Secretary-General, Hon. Sir Eric Drummond, K.C.M.G., C.B. (and entertainment allowance £6,000) £4,000
Financial Director, Sir Herbert B. Ames, LL.D.
Director, International Labour Office, M. Albert Thomas.

LEAGUE OF NATIONS UNION, 25, Grosvenor Crescent, S.W. 1.—President, Viscount Grey of Fallodon, K.G.; General Sec., J. C. Maxwell Garnett.

† Argentina withdrew, after admission.

NOTES.—† Died in office. § Assassinated. (a) Elected as VICE-President.

GEORGE III. was the eldest son of Frederick, Prince of Wales (eldest son of George II.), and of Princess Augusta (youngest daughter of Frederick, Duke of Saxe-Coburg-Gotha). His Majesty was born at Norfolk House, St. James's Square, June 4, 1738; succeeded to the Throne Oct. 25, 1760; married Princess Charlotte (daughter of Charles, Duke of Mecklenberg-Strelitz); and was crowned with her on Sept. 22, 1761. The government was carried on, from Feb. 5, 1811, until the death of King George III., by his eldest son George, under the title of *Prince Regent*. King George III. died at Windsor, Jan. 29, 1820. his issue being:—

1. GEORGE IV. George Augustus Frederick, *Prince of Wales*, born Aug. 12, 1762, married Princess Caroline of Brunswick, succeeded to the Throne, Jan. 29, 1820, and died without surviving issue June 26, 1830.

2. Frederick, *Duke of York and Albany*, born Aug. 16, 1765, married Princess Frederica of Prussia, was for many years Commander-in-Chief of the Army, and died without issue Jan. 5, 1827.

3. WILLIAM IV. William, *Duke of Clarence*, born Aug. 21, 1765; was Lord High Admiral of England; married July 11, 1818, Adelaide, daughter of George, Duke of Saxe-Meiningen, by whom he had two daughters, who predeceased him; succeeded to the Throne, June 26, 1830, and died June 20, 1837.

4. Charlotte, *Princess Royal*, born Sept. 29, 1766, married Frederick, King of Wurttemberg, and died without issue.

5. Edward, *Duke of Kent*, born Nov. 2, 1767, married Princess Victoria (daughter of Francis, Duke of Saxe-Coburg, and widow of Charles, Prince of Leiningen), died Jan. 23, 1820. Their Royal Highnesses had issue a daughter, Princess Victoria, born May 24, 1819, who succeeded to the Throne as QUEEN VICTORIA, June 20, 1837.

6. Augusta, born Nov. 8, 1768, died unmarried Sept. 22, 1840.

7. Elizabeth, born May 22, 1770, married Frederick, Landgrave of Hesse, and died without issue Jan. 10, 1840.

8. KING OF HANOVER. Ernest, *Duke of Cumberland*, born June 5, 1771, married Frederica (daughter of Frederick V., Grand Duke of Mecklenberg-Strelitz), succeeded as King of Hanover June 20, 1837 (on death of William IV., owing to the exclusion of Queen Victoria by the provisions of the Salic Law), died Nov. 28, 1851.

9. Augustus, *Duke of Sussex*, born Jan. 27, 1773, died without succession April 24, 1843.

10. Adolphus, *Duke of Cambridge*, born Feb. 24, 1774, married Princess Augusta (daughter of Frederick, Landgrave of Hesse), see below.

11. Mary, born April 25, 1776, married William Frederick, *Duke of Gloucester*, died without issue April 30, 1857.

12. Sophia, born Nov. 3, 1777, died unmarried May 27, 1848.

13. Octavius, born Feb. 23, 1779, died May 3, 1783.

14. Alfred, born Sept. 22, 1780, died Aug. 26, 1782.

15. Amelia, born Aug. 7, 1783, died unmarried Nov. 2, 1820.

DESCENDANTS OF H.R.H. ADOLPHUS, DUKE OF CAMBRIDGE, born Feb. 24, 1774, died July 8, 1850.

1. H.R.H. Prince George, *Duke of Cambridge*, born March 26, 1819, Field-Marshal, Commander-in-Chief of the British Army, 1856-1859, died without succession March 17, 1904.

2. H.R.H. Princess Augusta, born July 19, 1822, married the Grand Duke of Mecklenberg-Strelitz.

ANNUITIES TO THE ROYAL FAMILY.

The annuities payable to Their Majesties and to the members of the Royal Family are known as the *Civil List*, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000. The Select Committee appointed on June 24, 1920, reported on July 7, and made the following recommendations, which were adopted by the House of Commons:—

Their Majesties' Privy Purse	£120,000	Queen Alexandra	£70,000
Salaries of Household	125,800	Princess Christian	6,000
Expenses of Household	193,000	Princess Louise (Duchess of Argyll)	6,000
Works	20,000	Duke of Connaught	25,000
Royal Bounty	13,200	Duchess of Albany	6,000
Unappropriated	8,000	Princess Beatrice	6,000
		King Edward VII.'s Daughters	12,000
	£470,000		

IN a broad sense this heading is commonly taken as identical with that of the House of Lords, although there are close upon 130 holders of titles of long-standing nobility who are not members of the Upper House of Parliament, their peerages being those of Scotland or Ireland only. But there are about an equal number of Peers of those kingdoms who possess additional titles which constitute them members of the House of Lords, these titles being in a majority of instances, though very far from all, inferior to those by which they are generally known. The full details as to each are given under his leading title, and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed: a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE."

Contractions.—S. or I. appended to the date of creation denotes a *Scottish* or *Irish* title; the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation. A † appended to S. or I. implies that the Peer is an elected Representative to the House of Lords. For the mark ° see heading to Marquesses; b., signifies born; s., succeeded; m., married; w., widower or widow; div., divorced; M., minor.

COMPLETE LIST OF THE PEERS.

ROYAL DUKES (3).—*Style*, His Royal Highness the Duke of —. *Addressed as*, Sir, or more formally, May it please your Royal Highness.

Courtesy Titles borne by Eldest Sons of Dukes, &c. 147

*From this list it will be seen that "Lord Aberdour" is the heir to the Earldom of Morton (see p. 134) and that "Viscount Curzon, M.P.," is the eldest son of Earl Howe (see p. 133): * the titles borne by second heirs are also given, e.g. Earl of Burlington, eldest son of the Marquess of Hartington, heir apparent of the Duke of Devonshire.*

Usher of the Black Rod, Samuel Murray Power, C.B.

THE ORDER OF MERIT (1802)—O.M. Ribbon, Blue and Crimson.

This Order confers no precedence, but authorizes the holders to place its designating initials next after those denoting membership of Grand Cross of the Order of the Bath. It is designed as a special distinction for eminent men and women—without in itself conferring a knighthood. The Order is limited in numbers to 24, with the addition of foreign honorary members. Membership is of two kinds, Military and Civil, the badge of the former having crossed swords, and the latter oak leaves. Membership is designated by the suffix O.M., which is authorized to follow the first class of the Order of the Bath and to precede the letters designating membership of the inferior classes of the Bath and all classes of the remaining Orders of Knighthood.

MILITARY MEMBERS.

Admiral of the Fleet Rt. Hon. Sir Edward Hobart Seymour, G.C.B., C.V.O.

Field-Marshal Rt. Hon. Earl French, K.P., G.C.B., C.V.O.

Admiral of the Fleet Rt. Hon. Viscount Jellicoe, G.C.B., C.V.O.

Field-Marshal Rt. Hon. Earl Haig, K.T., G.C.B., C.V.O., K.C.I.E.

Admiral of the Fleet Rt. Hon. Earl Beatty, G.C.B., C.V.O., D.S.O.

CIVIL MEMBERS.

Rt. Hon. Viscount Morley of Blackburn, F.R.S.

Rt. Hon. Viscount Bryce, F.R.S.

Thomas Hardy, Litt.D., LL.D.

Rt. Hon. Sir George Otto Trevelyan, Bart.

Sir Edward Elgar, Mus. Doc.

Sir Joseph John Thomson, F.R.S.

Sir Archibald Geikie, K.C.B., F.R.S.

Rt. Hon. Viscount Haldane, K.T.

Rt. Hon. Arthur James Balfour.

Rt. Hon. David Lloyd George.

HONORARY MEMBERS.

Field-Marshal Prince Yamagata.

Admiral Count Togo.

Field-Marshal (Marshal of France) Ferdinand Foch.

Marshal Joseph Jacques Césaire Joffre, G.C.B.

Secretary and Registrar. Col. Hon. Sir Henry Charles Legge, C.V.O.

ORDER OF THE COMPANIONS OF HONOUR (1917)—O.H.

Ribbon. Carmine, with Gold Edges.

This Order consists of one Class only and carries with it no title or precedence, but ranks after the 1st Class of the Order of the British Empire, i.e., Kts. Grand Cross (Mil. and Civ. Div.). The number of awards is limited and is open to both sexes.

THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Ribbon. Red, with Blue Edges.

Bestowed in recognition of special services in action of commissioned officers in the Navy, Army and Royal Air Force. The members are Companions only and rank immediately before the 4th Class of the Royal Victorian Order. A Bar may be awarded for any additional act of service.

THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S.O.

Ribbon. Crimson, with Blue Centre.

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service, and consists of the **SOVEREIGN**, the Prince of Wales, and Companions (not exclusively male) to a number not exceeding 700, of whom 250 may belong to the Home Services, 200 to the Indian (200 European and 100 Indian) and 250 to the services of Dominions, Colonies and Protectorates.

THE ROYAL ORDER OF VICTORIA AND ALBERT (for Ladies)—V.A.

Ribbon. White Moiré.

Instituted in 1862, and enlarged in 1864, 1865, and 1880, but no fresh conferments are now made.

THE IMPERIAL ORDER OF THE CROWN OF INDIA (for Ladies)—C.I.

Instituted 1876.

Ribbon. Light Blue, with White Edges.

THE ORDER OF ST. JOHN OF JERUSALEM.

Ribbon. Black.

The Order had its origin in Jerusalem and Acre, as an international lay confraternity for the relief of crusaders, and was later sovereign in Rhodes and in Malta, where its Knights kept galleys and galleons, to attack the Barbary Corsairs and to prevent the spread of Turkish rule in the Mediterranean, from 1530 till 1798. The work of the British Order is the control of the St. John's Ambulance and Brigades, and of the British Ophthalmic Hospital, Jerusalem. **Sovereign Head and Patron.** H. M. King George V.; **Grand Prior.** H. R. H. Duke of Connaught, and Strathmore; **Chancellor-General.** Lord Stanmore, **Chancellor-General.** the "Knights of Justice" and selected "Chaplains," "Knights of Grace" and "Esquires." There are also "Ladies of Justice," "Ladies of Grace," and Esquires. These distinctions are notified in the *London Gazette*, but do not confer any rank or title.

Knights Grand Cross and Grand Commanders, and Knights Commanders

OF THE BATH, STAR OF INDIA, ST. MICHAEL AND ST. GEORGE, INDIAN EMPIRE,
ROYAL VICTORIAN ORDER AND KNIGHTS AND DAMES OF THE BRITISH EMPIRE

For Knights Bachelor, see pp. 172-176.

METEOLOGICAL NOTES AND RECORDS.

BRITISH ISLANDS: The maximum temperature of the air recorded in the shade at 4 feet above the ground is 100° Fahr. This was observed at Wilton House, Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The lowest temperature of the air recorded in the shade at 4 feet above the ground is—28° Fahr., or 5° below freezing point, at Blackadder, Berwickshire, on Jan. 17, 1881.

The greatest rain/fall in a day was at Bruton, Somerset, when 9.35 inches fell in the 24 hours ended 9 a.m., June 29, 1907. This rainfall is equal to 935 tons of water per acre.

The total rain/fall for a year at Stations in the British Islands during the 30 years 1884 to 1913

ranged from 240.05 inches at the summit of Ben Nevis in 1898 to 12.02 inches at Chatteris, Cambs, in 1884.

The maximum wind-velocity on record in the British Islands was recorded at Quilly, west coast of Ireland, on Jan. 27, 1900, when a gust exceeded the rate of 120 miles per hour.

GENERAL: The maximum temperature on record of the air in shade is 134° Fahr., observed at Greenland Ranch, California, on July 10, 1913.

The wettest station in the world is generally allowed to be Cherra Poonjee in Assam, where the total fall for the year has exceeded 55½ inches. From June 15 to 16, 1896, 12½ inches was collected, or an average daily fall of 23 inches. On one of these days, June 14, 40 to inches fell in 24 hours.

Knights Bachelor.

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1861 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1567 and obtaining the uniform registration of every created Knight. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are:—*Principal*, Sir Henry Pellatt, Kt., c.v.o.; *Vice-President*, Sir William Bull, Kt., m.p.; *Hon. Registrar*, Sir Harry North; *Clerk*, H. Wheelbourn; *Registry and Library*, a Mitre Court, Temple, E.C. 4.

A LIST OF THE GENTLEMEN WHO HAVE RECEIVED THE HONOUR OF KNIGHTHOOD.
(Exclusive of such as have afterwards received the higher honour of K.C.B., etc., q.v.)

- Abdul Hussain Sahib, Khan Bahadar, Sir
Abdur Rahim, Hon. Sir
Acland, Sir K. B. Dyke, c.c.
Acton, Hon. Sir Edward.
Acworth, Sir Wm. Mitchell
Adams, Sir John Ooole.
Adkins, Sir Ryland, c.m.p.
Adleck, Sir J. Orulston, m.p.
Aikins, Sir James A. M.
Aird, Sir John.
Aitken, Sir Robert.
Alcazar, Sir Hy. Albert, m.c.
Alexander, Sir Sidney K.
Allen, Sir H. Montagu, c.v.o.
Allen, Sir Harry B., m.d.
Allen, Sir Hugh P., m.m.d.
Allen, Sir Thomas Wm.
Allison, Sir Robt. Andrew.
Allison, Sir Charles.
Ambalawanan Kanagasabai, Sir.
Ames, Sir Herbert Brown.
Anderson, Sir Arthur Robt., c.i.e., c.b.e.
Anderson, Sir George.
Anderson, Sir John.
Anderson, Sir Robert N.
Anderson, Sir Wm. M. A., m.p.
Andrews, Prof. Sir Fredk. William, f.r.s.
Angier, Sir Theodore V. S.
Anthony, Sir John.
Arbuthnot, Sir Geo. Gough.
Archibald, Sir William F.
Armstrong, Sir Charles H.
Arnold, Sir Th. Walker, c.i.e.
Arthur, Sir Allan.
Ashdown, Sir (Curtis) George.
Ashley, Sir W. J.
Ashutosh Chaudhuri, Hon. Sir.
Ashutosh Mukarji, Sir, c.s.i.
Aske, Sir Robt. W., r.d., l.d.
Aspinall, Sir J. Audley F.
Aschbury, Hon. Sir Jn. Mair.
Atkin, Rt. Hon. Sir J. Richard.
Atkins, Sir Ivor A., m.s.d.
Atkinson, Sir Wm. Nicholas, i.s.o., l.d.
Atlay, Sir Wilfred.
Avery, Hon. Sir Horace E.
Aylling, Hon. Sir Wm. Bock.
Ayar, Hon. Sir T. Jheagaraja.
Ayyar Sadashiva.
Baddelley, Sir John James.
Bailey, Sir Rowland, c.m., i.s.o., m.v.o.
Bailhache, Hon. Sir Clement M.
Baines, Sir Athelstane, c.s.i.
Balas, Sir Frank, c.m.m., m.v.o.
Baker, Sir Augustine F.
Baker, Sir John, m.d.
Baker, Sir Wm. Frederick.
Baldwin, Sir Harry, m.s.c.s.
Balfour, Sir Graham.
Ballantine, Sir Henry.
Bam, Sir Pieter Canius van Blomestein Stewart, c.s.e.
Banatvala, Col. Sir Hormasjee Eduljee, c.s.i.
Bancroft, Sir Squire R.
Bandarawala, Sir Solomon Dias, c.m.o.
Banerjee, Sir Surendra Nath.
Bankes, Rt. Hon. Sir Jno. Eldon.
Banner, Sir J. S. Harmood, m.p.
Barber, Sir Edward F.
Barclay, Sir Thomas, l.l.s.
Barclay, Sir Thomas.
Barker, Capt. Sir D. Wilson.
Barker, Sir Francis H.
Barker, Col. Sir Fras. W. J.
Barker, Sir Fredk. E.
Barnes, Sir Frederic Gorell.
Barnley, Br.-Gen. Sir John, m.p.
Barr, Sir James, c.s.m., m.d.
Barran, Sir Rowland H.
Barrett, Sir Wm. Fletcher, f.r.s.
Barrow, Sir Samuel.
Bartlett, Sir Herbert Folgerston, i.s.o.
Barton, Lt.-Col. Sir Hy. B.
Barton, Sir John George, c.s.
Barton, Sir William, m.p.
Bachelor, Hon. Sir Stanley L.
Bates, Rt. Hon. Sir Richard L., f.r.s.
Bates, Sir George W.
Beachcroft, Sir Melville.
Beaman, Sir Frank O. O.
Bean, Sir George.
Beard, Sir Lewis.
Beardell, Sir William A.
Beattie, Rt. Hon. Sir Andrew.
Beattie, Sir Jno. Carruthers.
Beauchamp, Sir Sidney.
Beaufort, Sir Leicester P.
Beaumont, Hon. Sir William Henry.
Beck, Hon. Sir Adam.
Beck, Sir A. Cecil T., m.p.
Beck, Sir Raymond.
Bedford, Lt.-Col. Sir Charles H., l.d., m.s.
Begbie, Sir James.
Beharrel, Lt.-Col. Sir John Geo., d.s.o.
Behrens, Sir Charles.
Beilby, Sir George Thos., f.r.s.
Bell, Sir James, c.v.o.
Bell, Sir James.
Bennett, Sir Courtenay W., c.i.e.
Bennett, Sir F. Sowerby.
Bennett, Sir Thos. J., c.i.e., m.p.
Bennett, Sir Wm. Fletcher.
Benson, Sir Frank R.
Benson, Sir J. Hawtrej, m.d.
Berry, Sir Geo. Andrea, m.s.
Berry, Hon. Sir Wm. Bisset.
Bertram, Brig.-Gen. Sir Alexander.
Bertram, Sir Anton, k.c.
Bethell, Sir Thomas Robert.
Bewin (Dadabhoj) Mehta, Sir.
Bhalachandra Krishna Bhatwadekar, Sir.
Biggar, Sir Edward Coey.
Bigs, Maj. Sir Arthur W.
Biles, Sir John Harvard.
Binning, Sir Arthur Wm.
Binod, Chandra Mitra, Sir.
Binay Krishna Basu, Sir.
Bisai Babudur, c.i.e.
Bird, Sir Alfred Fredk., m.p.
Bird, Sir Henry Dusey.
Bird, Sir James.
Bird, Sir William B. M.

* Table of Precedency in the United Kingdom.

The Sovereign.	All other English Bishops, according to their seniority of Consecration.	Eldest Sons of Knights in order of their Fathers.
The Prince of Wales.	Five above State Officers if Barons.	<i>M.V.O. (5th); M.E.</i>
Younger Sons of the Sovereign.	Secretaries of State, if of the degree of a Baron.	Younger Sons of the younger Sons
Grandsons of the Sovereign.	Barons, in same order as Dukes.	Baronets' younger Sons.
Sovereign's Brothers.	Treasurer of H.M.'s Household.	Younger Sons of Knights in the same order as their Fathers.
Sovereign's Uncles.	Comptroller of H.M.'s Household.	Naval, Military, and other Esquires by Office.
Sovereign's Nephews.	Vice Chamberlain of Household.	
Ambassadors.	Secretaries of State under the degree of Baron.	
Archbishop of Canterbury.	Viscounts' eldest Sons.	Women take the same rank as their husbands or as their eldest brothers; but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brother's wives.
Lord High Chancellor.	Earls' younger Sons.	Daughters of Peers marrying Peers of lower degree take the same order of precedence as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness.
Archbishop of York.	Barons' eldest Sons.	Merely official rank on the husband's part does not give any similar precedence to the wife.*
Prime Minister.	Knights of the Garter if Commoners.	
Lord Chancellor of Ireland.	Privy Counsellors if of no higher rank.	
Lord President of the Council.	Chancellor of the Exchequer.	
Speaker of the House of Commons.	Chancellor of the Duchy of Lancaster.	
Lord Privy Seal (if of Barons rank).	Lord Chief Justice of England.	
Five following State Officers if Dukes:	Master of the Rolls.	
(1) Lord Great Chamberlain (on duty)	The Lords Justices of Appeal and President of the Probate Court.	
(2) Earl Marshal.	Judges of the High Court.	
(3) Lord Steward.	Viscounts' younger Sons.	
(4) Lord Chamberlain.	Barons' younger Sons.	
(5) The Master of the Horse.	Sons of Life Peers	
Dukes, according to their Patents of Creation:	Baronets of either Kingdom, according to date of Patent.	
1. of England; 2. of Scotland; 3. of Great Britain; 4. of Ireland;	Knights (Grand Cross of the Bath. G.C.B.; G.C.M.G.; G.C.I.E.; G.C.V.O.; G.E.)	
5. Those created since the Union.	Knights Commanders of the above Orders.	
Eldest sons of Dukes of Blood Royal.	Knights Bachelors.	
Five above State Officers if Marquesses.	Judges of County Courts and Judges of the City of London Court.	
Marquesses, in same order as Dukes.	Serjeants at law.	
Dukes' eldest Sons.	Masters in Lunacy.	
Five above State Officers if Earls.	C.B.; C.S.I.; C.M.G.; C.I.E.; C.V.O.; C.M.E.; d.s.o.; m.v.o. (4th); c.m.e.; l.s.o.	
Earls, in same order as Dukes.	Eldest Sons of younger Sons of Peers.	
Younger sons of Dukes of Blood Royal.	Baronets' eldest Sons.	
Marquesses' eldest Sons.		
Dukes' younger Sons.		
Five above State Officers if Viscounts.		
Viscounts, in same order as Dukes.		
Earls' eldest Sons.		
Marquesses' younger Sons.		
Bishops of London, Durham and Winchester.		

* For fuller tables (and for Scottish and Irish Precedency) see Introduction to "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE," a companion volume, price 2s. net.

THE VICTORIA CROSS. *1856.*

Ribbon, Crimson for all Services.

FOR CONSPICUOUS BRAVERY. INSTITUTED 26th January, 1856.

Instituted in 1856, on the close of the Crimean War, and extended to civilians who had borne arms against the Indian mutineers. In 1912 the decoration was extended to the Indian Army. A bar may be awarded for any additional act of gallantry.

A list of surviving recipients.

The Distinguished Service Cross.—1914.—D.S.C.—In substitution for the conspicuous Service Cross, 1901, is designed for bestowal on all officers of the R.N. below the rank of Lieutenant-Commander

The Military Cross.—1915.—M.C.—Awarded to Captains, Lieutenants, and 1st class Warrant Officers in the Army and Indian and Colonial Forces.

The Distinguished Flying Cross.—1918.—D.F.C.—Designed for bestowal upon officers in the Royal Air Force for acts of gallantry when flying in active operations against the enemy.

The Air Force Cross.—1918.—A.F.C.—Instituted as preceding, but for acts of courage or devotion to duty when flying, although not in active operations against the enemy.

The Military Medal.—1915.—M.M.—Awarded to non-commissioned officers and men for individual or associated acts of bravery in the field. In exceptional circumstances the Medal may be awarded to women of all nations.

The Distinguished Service Medal.—1914.—D.S.M.—Is designated for chief petty officers, petty officers, men, and boys of all branches of the R.N.; to non-commissioned officers and men of the R.M.A.; and to all other persons holding corresponding positions in His Majesty's Service abroad, for distinguished conduct in war.

The Distinguished Flying Medal.—1918.—D.F.M.—and the **Air Force Medal**, for warrant and non-commissioned officers and men for equivalent services as for D.F.C. and A.F.C.

The Conspicuous Gallantry Medal.—C.G.M.—Is bestowed upon warrant officers and men of the R.N.

The Distinguished Conduct Medal.—D.C.M.—Awarded to warrant officers, non-commissioned officers, and men of the Army.

The Volunteer Officers' Decoration.—V.D.—Was an honour for rewarding the meritorious services of officers of the force in question, who must have been in commission and have served twenty years.

The Territorial Decoration.—T.D.—Established in 1908, is restricted to commissioned officers of twenty years' good service in the Territorial Force, and not holders of the Volunteer Decoration. Similarly a **Territorial Long Service Medal** has been substituted for that formerly awarded to Volunteers.

The Royal Red Cross.—R.R.C.—For ladies, founded 1889, is a distinction conferred upon ladies of any rank or nation who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war.

The Order of Mercy.—Both sexes; was established in 1899 in connexion with the League of Mercy, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London, &c.

The Indian Order of Merit.—Instituted in 1899, as a reward for personal bravery, to Indian officers and men.

The Kaiser-i-Hind Medal.—Was founded in 1900, and is a reward for any person, of either sex, who shall have rendered useful service in or for India.

The Albert Medal.—Dates from 1866, with extensions in 1877 and 1897, and is a recognition of acts of gallantry performed by any person whatever—"For Gallantry in Saving Life at Sea or 'on Land'."

* All the above vacate office on a change of Government.

Premiers, Principal Secretaries,

Premiers and Secretaries of State.—The inability of George I. to understand the English language made his attendance at meetings of the Cabinet "useless and irksome, and allowed the appearance of a Prime Minister, for his example has been so consistently followed as to have become a settled custom." In 1720 the office of Prime Minister was officially recognized. The first men-

tion of a King's Secretary of State is under Henry III. In 1233, owing to press of work in France, two Secretaries were appointed, and until 1792 two seems to have been the normal number. From 1688 to 1702 one of the two dealt with matters pertaining to the Northern States of Europe, the other with matters pertaining to the Southern States, Home, Irish, and Colonial business. In

1792 the former became Foreign and the latter Home Secretary, still retaining Irish and Colonial business. The Home Secretary was also responsible for the Secretary at War, who, though not a Secretary of State, directed the movements, payment, and civil control of the Army. In 1794 a Secretary of State for War was appointed to manage all military business, and in 1801

he was given the control of the Colonies. In 1804 the War Secretary was relieved of Colonial business, and a fourth Secretary of State was appointed for the Colonies. In 1821 the Secretary of State for India was appointed, and in 1828 the Royal Air Force was constituted, with a Secretary of State as President of the Air Council.

THE third Parliament of King George V. was elected in December, 1918, and met on February 4, 1919. The General Election had returned 478 supporters of the Coalition (334 Unionists; 133 Liberals; 11 Labour) and 229 Non-Coalition (63 Labour; 48 Unionists; 28 Liberals; 73 Sinn Feiners; 7 Nationalists; and 10 Independents), distributed as shown in the following table:—

	DISTRIBUTION OF MEMBERS.				PARTY STRENGTH (Jan. 1919).		
	Counties.	Boroughs.	Universities.	Total Members.	Coalition.	Non-Coalition.	Majority.
England	230	255	7	492	401	91	310 Coalition.
Wales	24	11	1	36	21	15	6 Coalition.
Scotland	38	33	3	74	56	18	38 Coalition.
Ireland	80	21	4	105	—	105	105 Non-Co.
United Kingdom ...	372	320	15	707	478	229	249 Coalition.

Only successful candidates who received the recognition of the Prime Minister and Mr. Bonar Law are included among the supporters of the Coalition. Thus, the Irish Unionists are omitted from the Ministerialists, although, like many other Non-Coalition members, they are in general agreement with the Government.

ALPHABETICAL LIST OF MEMBERS OF PARLIAMENT.

The following list gives Surname, Initials, Politics, Key Number of Seat on pp. 223-236, Name of Division, and Majority at Last Election of each of the 707 Members of Parliament.

Co. U. = Coalition Unionist; Co. L. = Coalition Liberal; Co. Lab. = Coalition Labour;
U. = Unionist; L. = Liberal; Lab. = Labour; Ind. = Independent; N.P. = National Party;
N.D.P. = National Democratic Party; N. = Nationalist; S.F. = Sinn Fein.

SESSION, 1920.

THE GOVERNMENT OF IRELAND.—After the defeat on Oct. 20, by 246 to 79, of a motion raising the question of reprisals, the House of Commons resumed the main task of the Session—the Government of Ireland Bill, the Committee stage of which had been interrupted by the adjournment. (*For provisions see pp. 553, 554.*) The third reading was carried by 183 to 52 on Armistice Day, when the spirit of the anniversary produced eloquent appeals for unity. The Lord Chancellor moved the second reading in the Upper Chamber on Nov. 23, and after three days' debate Lord Dunsen's rejection motion was defeated by 164 to 75 and the Bill was read a second time. Three days were given to the Committee stage and several important amendments were carried against the Government. The first, debated on Dec. 1, instituted a Senate in both Northern and Southern Parliaments, and was adopted by 120 to 36. A sequel was the insertion of a provision that the two Senates sitting together should constitute the Council of Ireland. On Dec. 6, the Peers omitted the clause giving the Lord Lieutenant under certain circumstances power to set up a system of Crown Colony Government; and added clauses providing for the composition of the two Senates. The report stage was taken on Dec. 13, and on the following day the third reading was agreed to without a division. The Commons accepted the amendment setting up the two Senates, but disagreed with that altering the constitution of the Council, and with a new clause empowering the setting up of a Legislative Assembly by Order in Council in the event of a Parliament not being duly constituted through a majority of its members failing to accept the constitution. The Lords acquiesced in most of these alterations, but insisted that the Senates should have a hand in the appointment of the Council, while in regard to the question of a legislative assembly a compromise was reached, limiting the right to set up such a form of government to the period of three years from June 1, 1921. The Royal Assent was accorded on Dec. 23, when Parliament was prorogued, and when a hope was expressed in the King's speech that the measure would finally bring unity and friendship.

TO RELIEVE UNEMPLOYMENT.—On the day the sitting was resumed, Oct. 19, the Prime Minister outlined the Government's measures for the relief of unemployment, which included the employment of ex-service men on housing, a large scheme of new arterial roads for London, and similar schemes in the country, and the admission of additional men in trades in which there had been a serious shortage of skilled labour. The Unemployment (Relief Works) Bill, given a second reading in the Commons on Nov. 18, and the Royal Assent on Dec. 3, enabled local authorities, and any appropriate Government department, to acquire and enter upon land compulsorily for the purpose of executing works of public utility with a view to finding immediate employment for the unemployed, its operation being limited to a year. On Dec. 21, a Bill was passed through all its stages in the Commons to waive the four weeks' contribution which was a precondition to the receipt of unemployment benefit under the new Unemployment Insurance Act, and the Royal Assent was given two days later.

COMBATING STRIKES.—While the miners' strike was in progress, the Government passed a

Bill to deal with the situation that might arise then, and in subsequent emergencies of a similar nature, Mr. Bonar Law stating that the measure had been drafted for some time. Under this the Government were given power to declare that "a state of emergency" existed if action had been taken, or was threatened, of such a nature as to be calculated, by interfering with the supply and distribution of food, water, fuel, light or with the means of locomotion, to deprive the community of the essentials of life. No proclamation of this kind might be enforced for more than a month, and it must be immediately placed before Parliament, which must reassemble within five days, if not sitting. Regulations for securing the essentials of life to the community, and giving powers for the preservation of the peace, might be made by Order in Council while a proclamation of emergency remained in force, but no form of compulsory military service or industrial conscription might be imposed, and no regulations made to make it an offence to take part in a strike or peacefully to persuade others to do so.

THE AGRICULTURE BILL.—Some controversy occurred between the two Chambers over the Agriculture Bill, the keynote of which, in the words of Sir Arthur Boscawen, was security all round—for the farmers by guaranteed prices, for the labourer by ensuring him a minimum living wage, and for the State by providing that land should be so cultivated as to produce a maximum amount of food. The Bill made the Corn Production Act permanent legislation, and established guaranteed prices for wheat and oats by a new plan, under which prices were ruled by the cost of production ascertained each year by Commissioners. The Agricultural Holdings Acts were also amended by providing compensation for disturbance. After being altered in Standing Committee, against the wishes of the Government, the third reading was secured in the Commons by 161 to 22 on Nov. 25, and the Upper Chamber gave a second reading on Dec. 8, by 123 to 85, deleted certain Government clauses in Committee, and agreed to the third reading on Dec. 20, a motion for rejection being defeated by 64 to 25. The Commons devoted an all-night sitting to the consideration of the Lords' amendments, and after vigorous opposition agreed, at the Government's request, to most of the changes made, the Royal Assent being obtained on Dec. 23.

THE DYESTUFFS INDUSTRY.—In the closing days of the Session, a Bill was passed to regulate the importation of dyestuffs in order to establish the industry in this country securely. Sir Robert Horne explained that certain classes of dyestuffs would only be admitted to this country under licences, no licence duty being charged but merely fees to pay administrative expenses. The textile industry, he said, had been threatened with disaster at the outbreak of war because it was cut off from practically its only supply of dyes. Under this pressure the Government first lent money and afterwards established companies, in which it took shares, and later gave pledges to the industry.

SESSION, 1921.

THE KING'S SPEECH.—With old-time pageantry the King opened the new Session on Feb. 15, the Queen and the Prince of Wales accompanying His Majesty in the House of Lords. In his Speech from the Throne, the King referred to the

coming visit of the Overseas Premiers and the inauguration of the new Councils in India. "The determination of the Government to reduce expenditure to the lowest level consistent with the well-being of the Empire" was intimated, and, referring to the situation in Ireland, the hope was expressed that in the near future the majority of the people there would repudiate violence and work the new Act, which conferred upon them the responsibilities of self-government, and provided the machinery whereby they could attain to Irish unity by constitutional means. The legislation promised included Bills extending the provision made under the Unemployment Insurance Act, dealing with the safeguarding of essential key industries, and unfair and abnormal industrial competition, re-organising the railways, and dealing with the sale of alcoholic liquor. In the Lords the Address in reply was moved by the Duke of Abercorn and seconded by Lord Gorell, and agreed to after a brief debate. Mr. J. C. C. Davidson moved and Mr. Fildes seconded the Address in the Commons, and the Prime Minister dealt with Mr. Asquith's enquiries regarding the Paris decisions, the coming London Conference, and the new Middle Eastern Department of the Colonial Office. Replying to Mr. Thomas, Mr. Lloyd George said the Government were not going to submit to threats of strikes in Ireland. On the following day an amendment on the subject of unemployment, moved by Mr. Clynes, was discussed, and after Dr. Macnamara had outlined the Government's proposals this was defeated on Feb. 17, by 262 to 84. An amendment introduced by Mr. Bottomley, regarding the policy of securing indemnities and reparation from the Germans, was rejected by 181 to 40 on the following day, and a third, suggesting that the telephone service should be placed under private enterprise, was withdrawn. The Address was agreed to on Feb. 21, after the rejection, by 257 to 88, of an amendment condemning reprisals in Ireland.

A NEW SPEAKER.—In accordance with his intimation upon his re-election at the commencement of the present Parliament, Mr. Lowther announced his resignation of the Speakership on April 25, after 38 years in the House and 26 in the Chair. On the following day the Prime Minister moved a vote of thanks to Mr. Lowther in a speech that admirably voiced the high regard in which the retiring Speaker was held by the whole Chamber. Mr. Stephen Walsh and Mr. Asquith added their tributes, and this resolution and a second, praying the King to confer upon Mr. Lowther "some signal mark of his royal favour"—both put to the House by the man to whom they referred—were carried unanimously and with loud acclaim. In his reply, the Speaker declared his belief that the House had increased in usefulness and authority since he entered it. Mr. Lowther quitted the chair and walked out of the Chamber amid continuous cheers, and later shook hands with every member present. On April 27, Lieut.-Col. F. B. Mildmay proposed, and Mr. Arthur Henderson seconded, the election of Mr. J. H. Whitley as Speaker, and he was unanimously elected after some protests against the manner in which the Government had appeared to abrogate the privilege of the Chamber to choose the occupant of the distinguished office. The King's formal assent to the appointment was signified on April 28,

following which Mr. Whitley took his seat for the first time. Subsequently a Bill was passed settling an annuity upon Mr. Lowther, to whom the King granted a Viscounty.

DECONTROLLING THE RAILWAYS.—One of the most important measures of the Session was the Railways Bill, intended to place the railways in a new position after the period of control. In moving the second reading in the Commons on May 26, Sir Eric Geddes said the Government had come to a settlement with the majority of the railway companies by which the Government would pay £60,000,000 to the companies on handing the lines back in August after the period of control, £9,000,000 of that sum being returned in the form of income-tax. That settlement had been approved by over 75 per cent. of the capital invested the railways. Explaining the Bill, the Minister of Transport said instead of putting the railways of the country into one great system, it was proposed that they should be formed into groups, by means of which, it was believed, far-reaching economies could be made. He thought that £25,000,000 would be the value of the economies possible in six or seven years. The Bill provided a safeguard against the oppression of a monopoly, and would give a real incentive for economy, both on the part of the trader and the railway management. The rejection was moved by Mr. J. R. Clynes on the ground that it failed to provide for the public ownership and control of the railways, and would prejudice their future acquisition by the State on a fair economic basis. On May 30, Sir Eric Geddes said the Bill was the only alternative to nationalisation which the Government had been able to find. The motion for rejection was defeated by 259 to 65, and the Bill was read a second time and referred to a Standing Committee. During a debate on an amendment to exclude Scotland from the operation of the Bill, Sir Eric, on June 14, said an understanding had been arrived at with the majority of the Scottish railways that in existing circumstances fusion should be on the basis of their intrinsic value as partners in a new alliance and combination. Progress was slow, only 11 clauses having been disposed of in as many days, and the amendments on the paper ran into hundreds. On July 4, Sir Eric Geddes said it was essential that the Bill should become law before the House rose, and as a consequence the Commons two days later passed a resolution dividing the Bill into two parts, a second committee dealing with the second section, and giving five days for the report stage and third reading. The two committees had completed the consideration by July 21, and when the Bill returned to the House on July 27, the Speaker ruled that a proposed new clause, empowering the railway companies to own and run road vehicles, was outside the scope of the Bill. Various new clauses were added at the invitation of the Government, and on Aug. 9 the report stage was concluded and the third reading carried, a motion for the rejection being defeated by 237 to 62. The discussion in the Upper Chamber was limited owing to the date upon which the Bill left the Commons, and on Aug. 19, when Parliament adjourned until Oct. 28, the Royal Assent was given to the measure, and to a Bill providing for the payment of £3,000,000 in settlement of the claims arising on the de-control of the Irish railways, the money to be distributed in

accordance with an agreement arrived at between the interested parties.

THE BUDGET.—Owing to the industrial situation engaging the whole of Sir Robert Horne's attention, Mr. Chamberlain introduced the Budget on April 25 (see p. 501), emphasising that whatever credit attached to the proposals belonged to his successor alone. Mr. Chamberlain said the foundations had been laid for steady recovery when industrial disputes were laid to rest, and we had made it clear that the country and the city would hold the very proud position as the premier financial centre of the world. The resolutions had all been agreed to on May 2, and the Finance Bill was read a first time. The second reading was granted on May 25, after the defeat, by 213 to 46, of an amendment calling for economy. The Committee stage opened on June 16, and was completed on June 14 with but slight amendments, one of which made provision as to the determination by special commissioners of claims for relief from United Kingdom income-tax in respect of Dominion income-tax. On report on July 19, the Government opposed an amendment extending the exemption from Corporation Tax to the surplus arising out of the trading of co-operative societies with their own members, but this was carried by 137 to 135. Mr. Chamberlain announced that as the money involved was insignificant compared with the object as a whole, the Government would accept the position. The third reading was agreed to on July 29, after the defeat by 194 to 43 of an amendment declaring that in view of the serious decline in public revenue the House desired a further statement of the financial position before proceeding with the measure. The Royal Assent was accorded on Aug. 4.

SAFEGUARDING INDUSTRY.—The first stage in assisting British industry opened on May 9, when Mr. Baldwin moved in Committee a series of resolutions providing for the imposition for five years of a customs duty of an amount equal to 3½ per cent. of the value upon imports of various specified articles in key industries, and also upon imported articles which are being sold at prices below the cost of production in this country. He said that what was wanted was the restoration of the collapsed exchanges. The Bill which would follow the resolutions would deal with dumping by levying a special import duty whenever it was established that dumping was going on on a substantial scale. Food and drink were excluded, and it was not intended to schedule raw materials. An amendment to limit the period of the duty to one year instead of five years, moved by Sir William Barton, was on the following day defeated by 269 to 79. The resolutions were carried on May 11, after an all-night sitting, during which a number of divisions were challenged. The debate on the second reading of the Bill based upon the resolutions opened on June 6, when Sir Donald Maclean, in moving the rejection, said the only result of the Bill must be to raise prices. He declared that it intensified bureaucracy and hampered trade. Mr. Baldwin said no Government could neglect to take some steps to protect employment in this country, with a future before us so full of doubt and uncertainty. On the following day the second reading was carried by 312 to 92.

In Committee a Government amendment was agreed to providing that the Committee to be set up for the purpose of enquiring into complaints of dumping should consist of five persons instead of three. This stage was completed on July 20, and the Report stage on Aug. 11. On the following day the Speaker gave his ruling that the Bill was a Money Bill within the meaning of the Parliament Act, and therefore the Upper Chamber could not amend it, and the third reading was carried after the defeat, by 176 to 54, of a motion for rejection introduced by Mr. Asquith. The Peers gave a second reading on Aug. 16, defeating Lord Emmott's motion for rejection by 68 to 43. In Committee two important amendments were carried against the Government, despite the Speaker's certificate, but the Commons disagreed with these on the ground that they were a breach of their ancient privileges, and the Lords, after a protest, accepted this rebuff, the Royal Assent being given on Aug. 19.

REPARATION FROM GERMANY.—As a consequence of the refusal of the German delegates to the London Conference to accept the Allies' terms, Mr. Lloyd George, on March 11, presented a Bill, which was read a first time, to provide for the application of part of the purchase price of imported German goods towards the discharge of the obligations of Germany under the Treaty of Versailles. Under the Bill the Treasury were empowered to prescribe the payment to the Commissioners of Customs and Excise of a portion, not exceeding 50 per cent., of the value of imported German goods. Moving the second reading three days later, Mr. Chamberlain said the proposal afforded a method of collecting reparation, measured according to Germany's capacity to pay, if Germany reimbursed her exporters. He thought that more than 40 per cent. of Germany's export trade would be affected. Unless Germany co-operated in carrying out the scheme there would be an economic blockade of Germany sufficiently severe to bring her to reason. The Prime Minister appealed to the House to help them to get the measure, which he described as a substitute for the clash of arms, and the second reading was secured without a division. In Committee, amendments were agreed to fixing March 31, 1921, as the date upon which the arrangement came into operation, and excepting goods imported before April 15, 1921, in pursuance of contracts entered into before March 8, 1921. The third reading was carried on March 18, after the defeat by 132 to 15 of a motion for rejection, and the Bill, after passing through the Lords, received the Royal Assent on March 24.

LICENSING REFORM.—What was described by a Government spokesman as a modest and useful instalment of licensing reform was brought forward late in the Session as the result of a round-table conference. The Bill, which applied to the whole of Great Britain, limited the number of hours during which liquor might be supplied, and provided that the sale should cease for at least two hours in the afternoon. As originally introduced the maximum number of hours of sale were nine per day in London and eight elsewhere on week-days, and five on Sundays, the earliest hour on weekdays being 11 a.m., and the latest 11 p.m. in the metropolis, and so or 10.30 p.m. elsewhere. Hotels and restaurants

were permitted to remain open an hour later for the consumption of meals with or without liquor. In moving the second reading on July 22, the Attorney-General said the Central Control Board was to be abolished, and the ownership and management of the property it had acquired were to be vested in the Home Secretary and the Secretary for Scotland. He said the Bill was a sincere effort to represent what was ascertained to be the highest common measure of agreement. Mr. Bottomley moved the rejection of the measure, but this was withdrawn, and the Bill was referred to a Standing Committee. The third reading was secured on Aug. 2. After passing through the House of Lords the Royal Assent was given on Aug. 17.

THE DECONTROL OF THE MINES.—The measure decontrolling the mines, which led to the great strike, was introduced by Mr. Bridgeman on March 4, and read a second time four days later by 277 to 72. The Secretary of Mines said that after the cessation of hostilities the only reason for continuing control was the difference between world-prices and the cost of production at home. The moment had arisen when that reason had gone. The Bill meant that all contracts as to wages and profits ceased on March 31. After it had been considered by a Standing Committee, an unsuccessful effort was made to postpone the date of decontrol until June 30, and the Royal Assent was given on March 24. The strike commenced while Parliament had adjourned for Easter, and on the reassembling on April 4 a message from the King was read, declaring that "a state of emergency" existed under the Emergency Powers Act, a formality which was repeated at the end of each month during which the stoppage continued. The course of the negotiations was outlined from day to day, and on April 8 the Prime Minister announced that in view of the threat of the suspension of the transport services the Reserves were called up and a Defence Force established. The terms of settlement were announced on June 28 by Mr. Lloyd George, who said he believed that a new era of co-operation would be opened in the industry. The nation felt that it was an essential condition of its existence, he claimed, that there should be peace throughout the world, and above all peace in all its industries. The Commons subsequently sanctioned the subsidy of £10,000,000, upon which the settlement was conditional.

AGRICULTURAL POLICY.—A reversal of the Government's agricultural policy, due to the demand for economy, was effected by the introduction of the Corn Production Acts (Repeal) Bill. Moving the second reading in the Commons on July 4, Sir Arthur Griffith-Boscawen said the result would be that agriculture would be decontrolled, that the guaranteed prices would come to an end, and that the Wages Board would disappear after the year's harvest, voluntary joint councils on the lines of the Whitley Councils being established in their place. The Government, he said, had been impelled by financial reasons to take this step. The bill which would have to be presented in respect of the guarantee this year would be from 15 to 25 millions, and perhaps they would have a bigger bill year by year. A Cabinet Committee had come to the conclusion

that the only fair and just way of dealing with the question would be to get rid of the policy of the Corn Production Acts, of the subsidy, of all vestige of control and of the Wages Board at the same time. That year's crop must be paid for, and they had made a bargain with the majority of the growers that they should pay a rent of £3 an acre for wheat and £4 for oats in January, instead of waiting for the guaranteed prices. Sir Robert Horne said that without the Bill they would be committed to not less than £30,000,000 a year for the next four years. The second reading was carried by 278 to 113 on the following day, and an attempt made before the Standing Committee to retain the Wages Board and a minimum wage was rejected by 29 to 12, a similar amendment being defeated by 202 to 73 on the report stage. The third reading was granted by 193 to 66 on July 25, and various amendments made by the Lords being disagreed with by the Commons, the Royal Assent was given when Parliament adjourned.

UNEMPLOYMENT INSURANCE.—The House of Commons gave a first reading on Feb. 21, and a second reading on the 23rd, to a Bill to increase the rates and period of benefit under the Unemployment Insurance Act, 1920, as promised in the King's Speech. Dr. Macnamara explained that under the new measure, men and women who had been employed for 20 weeks, and ex-service men who had been employed for 10 weeks, since Dec. 31, 1919, would be eligible for 16 weeks' benefit between the passing of the measure and the end of October, and another 16 weeks between the latter date and the beginning of July, 1922, thereafter insured persons being entitled to 26 weeks' benefit in each year. The cases of disabled ex-service men would be dealt with on their merits, the 10 weeks' qualification being waived if necessary. The benefits would be 18s. for men, 15s. for women, and half these amounts for boys and girls respectively; while the contributions of employed, employer and State would be increased, the accumulated sum in the Unemployment Fund being drawn upon. The third reading was secured on the following day after the acceptance in Committee of amendments moved by Liberal members to increase the benefits to 20s. for men and 16s. for women. The Upper Chamber gave a first and second reading on March 1, on the following day the third reading was obtained, and the Royal Assent was given on March 3. As a result of the coal strike calculations were upset, and on June 8 the Commons gave a first reading to a Bill reducing the benefits from the end of the month to the rates of 1920 Act—15s. for men and 12s. for women, with proportionate reductions for boys and girls—and increasing the contributions. Dr. Macnamara said they were paying benefit at the rate of £2,000,000 a week with an income from contributions of less than £350,000, the Unemployment Insurance Fund, which stood at 22½ millions in March, having fallen to 8½ millions. In view of the position the Labour Minister asked powers to give, if necessary, an extension of six weeks' benefit to the 16 in the previous Act. The second reading was carried on June 15, and the Bill was dealt with by a Standing Committee, passed through its remaining stages, and given the Royal Assent on July 1. Further Government action in connexion with unemployment is noted on p. 513.

Government and Public Offices.

ADMIRALTY, Whitehall, S.W. 1.

(See "Royal Navy," pp. 286-7.)

MINISTRY OF AGRICULTURE AND FISHERIES,

Whitehall Place, S.W. 1; 3 St. James's Square, S.W. 1; 43 Parliament Street, S.W. 1.

THE MINISTRY OF AGRICULTURE AND FISHERIES WAS constituted pursuant to the Ministry of Agriculture and Fisheries Act, 1919 (9 and 10 Geo. V. Ch. 92) which amended the Board of Agriculture and Fisheries Acts, 1889 to 1900. The Board of Agriculture for Great Britain was established in 1889. By the Board of Agriculture and Fisheries Act of 1903, the duties of the Fisheries Department of the Board of Trade were transferred to the Board of Agriculture, the designation of which was at the same time altered. The expression "agriculture" is defined to include "horticulture."

The administration of the *Ordnance Survey* and of *Kew Gardens* is under the control of the Ministry.

Estimates, 1921-2. £3,211,605.

Minister of Agriculture and Fisheries, *Lt.-Col. Rt. Hon. Sir Arthur Griffith Boscawen, M.P. £2,000

Private Secs., C. T. Houghton & A. Balfour.

Parliamentary do., Charles Williams, M.P. unpf

Parliamentary Secretary, The Earl of Ancaster, O.B.E. £1,200

Private Secs., D. B. Toye, O.B.E.

Permanent Secretary, *Sir F. L. C. Floud, K.C.B. £3,000

Private Sec., R. H. Franklin.

Chief Scientific Adviser, *Sir A. Daniel Hall, K.C.B., F.R.S. £2,200

Private Sec., H. H. Parker.

Second Secretary and Director-General of Land Department, *Sir L. Weaver, K.B.E. £2,200

Private Sec., A. W. Keeble

Principal Assistant Secretary (Fisheries Secretary), H. G. Maurice, C.B. £1,200 to £1,500

Assistant Secretaries, H. E. Dale, C.B.; A. T. A. Dobson, H. L. French, C.B., O.B.E.; C. Bryner Jones, C.B.E. (Welsh Secretary); E. B. Shine (also Principal Establishment Officer); R. J. Thompson, O.B.E. £1,000 to £1,200

Legal Adviser and Solicitor, F. A. Jones, C.B. £1,200 to £1,500

Assistant Legal Adviser and Solicitor, A. D. Stocks, O.B.E. £800 to £1,000

Principal Establishment Officer, E. B. Shine (also Assistant Secretary).

Principals, A. Dunbar; R. R. Enfield; Maj. E. Garner; Major A. S. Gage; H. H. Judson; G. F. Middleton, M.B.E.; E. W. Millard; E. L. Mitchell; A. W. Monro, C.B.; C. Nathan; H. G. Richardson; C. W. Sabin; Maj. Wynn Thomas; H. D. Vigor, M.B.E.; H. E. Ward; and C. R. T. Williams, O.B.E. (also Deputy Establishment Officer).... £700 to £900

First Class Clerks, R. H. Hooker; A. G. L. Rogers; G. W. Sneyd-Lloyd, L.S.O., O.B.E. £600 to £800

Assistant Principals, J. B. Baber; W. R. Black; R. H. Franklin; A. M. Lowe; H. Meadows; F. K. Milson; B. W. Phillips; A. W. Street, M.C.; D. B. Toye, O.B.E.; D. E. Vandepuer; V. E. Wilkins.....£200 to £500

Principal Finance Officer, G. Macey £850

Deputy Finance Officer, P. J. Langley, M.B.E. £550 to £650

Chief Veterinary Officer and Director of Veterinary Research, Sir S. Stockman, M.B.C.V.S. £1,000 to £1,200

Controller of Horticulture, W. G. Lohjott, O.B.E.....unpf.

Deputy Controller of Horticulture, H. V. Taylor, M.B.E. £500 to £700

Director of Plant Diseases, J. C. F. Fryer, M.A. £700 to £900

Dairy Commissioner, J. F. Blackshaw, O.B.E. £700 to £900

Chief Education Inspector, P. G. Dallinger, O.B.E. £800 to £1,000

Deputy Chief Education Inspector, J. G. Stewart £600 to £800

Chief Veterinary Inspectors, J. R. Jackson, M.B.C.V.S. £700 to £900

Assistant Veterinary Officer, J. McI. McCall, M.B., C.M., M.R.C.V.S. £500 to £700

Senior or Superintending Inspectors, A. H. Berry; G. P. Berry; E. G. Haygarth Brown; A. B. Bruce; A. V. Campbell; T. Close; A. D. Cotton; P. A. Francis, M.B.E.; E. T. Hainan; P. J. L. Kelland; P. L. Lowrie; A. G. Smith; W. G. Wragg

Live Stock Commissioner, F. N. Webb £850

Superintending Live Stock Officers, G. T. Dixon; R. N. Jones; C. T. A. Robertson..... £500 to £700

Director of Land Acquisition, S. Mager, C.B.E. £1,200

Chief Land Commissioner, H. V. Raffety £800

Principal Valuer, W. T. Howes £800

Inspecting Commissioner, F. E. N. Rogers £800

District Land Commissioners, A. Allsobrook; D. C. Barnard; J. H. Diggle; E. O. Fordham; F. Horne, O.B.E.; T. H. Sutton; T. J. Young £800 to £900

Chief Drainage Engineer, C. H. J. Clayton, M.B.E. £600 to £800

Director of Scientific Fishery Investigations, E. S. Russell, M.A., B.Sc. £1,200

Technical Adviser on Inshore Fisheries, H. Lyster Jameson, D.Sc. £1,000

Chief Inspector of Fisheries, H. S. Moss-Blundell, O.B.E. (temp.) (inclusive) £1,000

Principal Naturalists, J. O. Borley, O.B.E., M.A.; R. W. Dodgson, M.D. £650 to £750

Chief Insurance Officer, J. Thomson £550 to £700

Royal Botanic Gardens, Kew. (£38,939.)

Head Office.

Director, Lt.-Col. Sir D. Prain, C.M.G., C.I.E., M.B., F.R.S. £1,000 to £1,200

Assistant Director, A. W. Hill, Sc.D., F.R.S. £600 to £800

Assistant, J. Aikman £400 to £600

Executive Office.

Curator of Gardens, W. Watson, A.L.S. £400 to £600

Assist. do., W. J. Bean £400 to £600

Assistant, W. N. Winn £400 to £600

Herbarium and Library.

Keeper, Dr. O. Stapf, F.R.S. £500 to £700

Assistants, C. H. Wright, A.L.S.; S. A. Skan £400 to £600

Museum.

Keeper, J. M. Hillier £400 to £600

Assistant, J. H. Holland, F.R.S. £400 to £600

Jodrell Laboratory.

Assistant Keeper, L. A. Boodle, F.R.S. £400 to £600

Ordnance Survey Department, Southampton.

Director-General, Col. Sir Charles F. Close, B.E.E., C.B., C.M.G., F.R.S.

COLLEGE OF ARMS or HERALDS' COLLEGE, Queen Victoria Street, E.C. 4.

(See also Scottish and Irish Sections.)

The Herald's College was incorporated and endowed by Richard III. in 1484 as a College of Arms, presided over by the Earl Marshal, the other members being the then Kings of Arms, and the six Heralds, to regulate the granting and the bearing of Coat Armour, in addition to the ordinary functions of the Heralds. Their first residence was in Pulteney's Inn until the present site was granted by Queen Mary in 1554, the house being rebuilt as it now stands after destruction in the Great Fire. *Earl Marshal*, His Grace the Duke of Norfolk. *Deputy Earl Marshal*, Rt. Hon. Lord Edmund Bernard Talbot, G.C.V.O., D.S.O., M.P.

CHARITY COMMISSIONERS,

Ryder Street, St. James's, S.W. 1.

The Charity Commission was appointed by Act of Parliament in 1853 for the better administration of Charitable Trusts in England and Wales. In 1874 the powers previously exercised by the Endowed Schools Commissioners were temporarily transferred to the Charity Commission, and in 1879 the transfer was made permanent. The powers of the Commissioners over all endowments held for purely Educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act, 1899. The salaries, &c., amounted in 1920-21 to £24,629.

Chief Commissioner, J. F. Mills £1,500
Private Sec., F. B. Jackson
Second Commissioner, G. W. Wallace £1,500 to £1,500
Secretary, C. F. Ritchie £1,000

Parliamentary Commissioner, George R. Lane-Fox, M.P.

Assistant Commissioners and Principal Clerks, A. C. Kay, O.B.E.; J. E. C. Adams; W. F. Fox; E. Macpherson; H. D. S. Leake; G. B. Rooke; A. E. McLaren, O.B.E. £650 to £900
Accountant, Off. Trustees' Dept., F. H. Lewis

Asst. do., S. Hart £500 to £700
1st Class Clerks, R. E. Ford; C. N. Hope-Wallace, M.B.E.; F. B. Jackson; S. B. Turner £450 to £600
Clerk of Registration and Monuments, A. L. Guest.
Librarian and Clk. to Sec., H. B. Denham.
Clerk in charge of Accounts of Charities, H. P. Brown.
Assistant Draughtsman, A. V. Masham.
Staff Clerks, A. S. Hanbury; J. R. Smith £300 to £400

THE GOVERNMENT CHEMIST

(Government Laboratory),

13 Clement's Inn Passage, W.C. 2, and Custom House, Lower Thames Street, E.C. 3.

Asst. Sec., G. G. Mannell £700 to £900
Senior Clerks, J. H. Brackenberry; T. L. Hedley £550 to £700

COLONIAL OFFICE, Downing Street, S.W. 1.

The business of the Colonies was, until 1801, included in the functions of the Home Secretary, to be transferred in that year to the newly-created "Secretary for War." In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies (to relieve the War Secretary of Colonial business). The Colonial Secretary possesses an advisory power of veto on legislation of the self-governing Dominions, and is responsible for the government of the remaining Dominions beyond the Seas in inverse proportion to the amount of self-government granted to them. The salaries, &c., of the Colonial Office are estimated at £146,429 for 1921-22.

Principal Secretary of State for the Colonies, Rt. Hon. Winston Spencer Churchill, M.P. £5,000

Private Secs., E. H. Marsh, c.m.g.; Maj. Sir A. Sinclair, Bart. (*Military*); J. E. Stephenson; Lord Wodehouse m.c., m.p.; H. A. Beekenham.

Overseas Settlement Committee

(late Government Emigration Committee),

6, St. James's Square, S.W. 1.—(to 5. Sat. 10 to 1.30.)

H.M. Government have found it necessary to undertake closer responsibility in connexion with the movements of British subjects wishing to settle overseas within the Empire, or to emigrate to foreign countries, than they have exercised in the past. In order to assist them in carrying out their policy they appointed a Committee at first known as "The Government Emigration

Committee," now renamed "The Oversea Settlement Committee."

President, Committee of Management, The Secretary of State for the Colonies.

Chairman, The Parliamentary Under-Secretary of State for the Colonies.

Vice-Chairman, do., T. C. Macnaghten, c.b.e.

Secretary, G. F. Plant.

Imperial Institute.

South Kensington, S.W. 7

The Imperial Institute was erected as a memorial of the Jubilee of Queen Victoria (see page 254), and by the Imperial Institute (Management) Act of 1905 is under the management of the Secretary of State for the Colonies, assisted by an Executive Council composed of twenty-five members. The principal work of the Imperial Institute is the promotion of inter-imperial trade in raw materials, by investigations with a view to utilisation, by supplying information as to sources, quality and uses, and by exhibitions illustrative of the resources of the Empire.

Executive Council, Rt. Hon. Lord Islington, c.m.g., d.s.o. (*Chairman*); Rt. Hon. Viscount Burnham, c.b.; Rt. Hon. Lord Emmott, c.m.g., c.b.; Prof. Wyndham R. Dunstan, c.m.g., f.r.s.; A. Fiddian; Sir Algernon Pirbright; G. E. A. Grindle, c.b., c.m.g.; Sir Robert Kindersley, c.b.; D. O. Malcolm; Sir Owen Phillips, c.m.g., m.p.; Sir William Taylor, k.c.m.g.; Sir Richard Threlfall, k.m.p., f.r.s.; P. W. L. Ashley, c.b.; R. W. Matthew; Sir J. P. Hewett, c.b., c.b.e., c.b.; Sir L. J. Kershaw, k.c.s.i., c.b.; Sir A. D. Hall, k.c.b., f.r.s.; Sir R. W. Carlyle, k.c.s.i., c.b.; Sir George H. Perley, k.c.m.g.; Hon. Sir Edgar Walton, k.c.m.g.; Hon. Sir James Allen, k.c.b.; Hon. Sir Edgar Bowring; Sir Edward W. Dawson; Hon. F. F. L. Wood, m.p.

The following are the principal Committees of the Institute:—

Committee for Canada.

Hon. Sir George Perley, k.c.m.g. (*Chairman*); J. G. Colmer, c.m.g.; Sir Robert Kindersley, c.b.; J. H. Plummer; Sir Keith Price.

Committee for Australia.

Sir Gordon Campbell, k.b.; Capt. Sir R. Muirhead Collins, k.b., c.m.g.; E. V. Reid.

Committee for New Zealand.

Hon. Sir James Allen, k.c.b. (*Chairman*); W. Acton Adams; J. Coates; G. F. Gee; R. D. D. McLean; Alexander Michie; Sir James Mills, k.c.m.g.; W. H. Montgomery, c.b.; R. H. Nolan, c.b.

Committee for South Africa (including Rhodesia).

Hon. Sir Edgar Walton, k.c.m.g. (*Chairman*); A. Canham; D. O. Malcolm; C. W. S. Maude; W. Mosenthal; W. Soper.

Committee for India.

Sir Charles McLeod (*Chairman*); Sir Harvey Adamson, k.c.s.i.; A. Yusuf Ali, c.b.; Sir Charles Armstrong; Rt. Hon. Lord Cables; Sir Robert Carlyle, k.c.s.i., c.b.; Rt. Hon. Lord Carmichael, c.b., c.b.e., c.b.; D. T. Chadwick, c.b.; Sir John Hewett, c.b., c.b.e., c.b.; Sir L. J. Kershaw, k.c.s.i., c.b.; Sir George Sutherland.

In addition there are numerous Advisory Technical Committees, including Mineral Resources, Timbers, Silk, Rubber, &c., and a Committee on Raw Materials, with representatives of the Chambers of Commerce.

Director, Wyndham R. Dunstan, c.m.g., l.l.d., f.r.s.

Secretary, H. M. Lidderdale, a.a.

Assistant Secretary, Comm. Hon. Sereld Hay, c.b., e.

Liquidation Board.

Chairman, Sir N. Waterhouse, K.B.E.
Other Members, L. C. Cones; Sir S. Dannreuther, C.B.; F. J. H. Palmer

THE DUCHY OF CORNWALL.

Buckingham Gate, S.W. 1.

Cornwall was created a Duchy by Edward III. for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since that time been born Duke of Cornwall.

The Revenue of the Duchy of Cornwall in the year ended December 31, 1929, was £166,324, and was derived principally from Rents and Profits of Courts, £330,959; Annuity in lieu of Tin Coinage Duties, £21,227; and Dividends on Stock, £7,021. The Payments include £32,026 Outlay for the benefit of the Estate; £87,767 Deductions under various Acts; £28,487 Allowances,

Donations, and Charities; and £14,350 Expenses of Management. The sum of £42,000 was paid on account of His Royal Highness the Prince of Wales.

Prince of Wales's Council.

The Lord Clinton (Lord Warden of the Stannaries and Keeper of Privy Seal); The Lord Revelstoke, C.V.O. (Receiver-General); Earl Fortescue; Vice-Adm. Sir Lionel Halsey, C.V.O., K.C.M.G., C.B.; Douglas Macgarel Hogg, K.C. (Attorney General); Sir Godfrey Thomas, Bt., C.B.E.; Walter Peacock, C.V.O. (Sec. and Keeper of Records).

Officers of the Duchy of Cornwall.

Auditor, Sir Laurence E. Halsey, K.B.E.
Solicitor, R. E. Tucker
Assistant Secretary, C. Liddell
Clerk Receiver, H. Kirk
Deputy Receiver, A. E. Gillett
Sheriff, John de Cressy Troffry

THE DUCHY OF LANCASTER.

Office, Lancaster Place, Strand, W.C. 2.

Lancaster was elected into a Palatine Duchy by Edward III. for his son John of Gaunt in 1399, but in 1399 it became merged in the Crown through the accession of his son as Henry IV.

The Revenue of the Duchy of Lancaster was £59,000 in 1847, and amounted to £112,584 in the year ended December 31, 1929. The contributory items are Rents and Profits of Courts, £68,604; Royalties and Dues, £31,980; Expenditure, £9,444; Outlay for the benefit of the Estate; £29,089, deducted under various Acts of Parliament; £7,613 Allowances, Donations, and Charities; £2,000 Salary of the Chancellor of the Duchy; and £12,372 Expenses of Management. The sum of £43,000 was paid (for His Majesty's use) to the Keeper of His Majesty's Privy Purse.

Chancellor, Rt. Hon. Viscount Peel, C.B.E.
Private Sec., L. F. Fergusson
Vice-Chancellor, R. B. Lawrence, K.C.
Attorney-Gen., Joseph Herbert Cunliffe, K.C.
Receiver-Gen., Lt.-Col. Sir F. Ponsonby, K.C.V.O., C.B.
Auditor, F. W. Pixley
Clerk of Council & Registrar, Herbert E. Mitchell
Solicitor, Douglas Houstoun
Assistant Solicitor, Elliot A. C. Druce
Surveyor-Gen. and Deputy Receiver-Gen., T. Vaughan Prickard
Coroner, A. M. M. Forbes
Chief Clerk
Registrar, Preston and Manchester Dist., J. B. Blackburne and A. E. Stainthall, Joint Registrars
Do. Liverpool Dist., Roger W. Lowden
Constable of Lancaster Castle, Lord Ashton

THE COUNTY PALATINE OF DURHAM.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne, out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities; and Guthred, king of Northumbria, and Alfred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence of the exercise of palatine privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until resumed by the Crown in 1836. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their neighbor. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.

Chancellor, Edward Tindal Atkinson, K.C.
Attorney-General, Herbert F. Manisty, K.C.
Solicitor-General, Sir Henry Arthur Colefax, K.B.E., K.C.
Registrar of Chancery Court, A. O. Smith
Steward & Clerk of Halmotes, Stanford E. Downing
Deputy do., G. Aynaley Smith
Mining Surveyor, Sir A. N. Lindsay Wood, Bart.
Receivers, Smiths, Gore & Co.

Millbank, Westminster, S. W. 1.

The Ecclesiastical Commission for the Management of Church Property, as now existing, was incorporated in 1836, its constitution being amended in 1862 and 1868. The main function of the Commission (whose members are given below) is the management of the Estates of the Church in order to endow or augment benefices, &c.

kinson.

Whitehall, London, S. W. 1.

The Government Department of Education was, until the establishment of a separate office, a Committee of the Privy Council appointed in 1839 to supervise the dis-

tribution of certain grants which had been made by Parliament since 1894. The Act of 1896 established the Board of Education, with a President and Parliamentary Secretary, and created a Consultative Committee. The cost of administration was estimated at £20,000 in 1896-97, with £40,000 for Inspection and Examination.

EXCHEQUER AND AUDIT DEPARTMENT.

Victoria Embankment, E.C. 4.

The Comptroller and Auditor-General was appointed by Letters Patent under 29 & 30 Vict. c. 39 § 3 (1866), in place of the Comptroller-General of the Exchequer and the Commissioners for Auditing the Public Accounts, whose duties were handed over to him. The main functions of the office are: (a) Exchequer—To authorise issues from the Exchequer, not exceeding the amounts sanctioned by Parliament; to authorise borrowings in case of deficiency; to examine the daily Exchequer accounts of the Banks of England and Ireland, and the accounts of the Consolidated Fund. (b) Audit of Public Accounts:—To ascertain that money expended has been applied to the purpose for which the grant of Parliament was intended to provide; that the expenditure is supported by proper evidence of payment, and generally to verify the correctness of the Accounts and to report to Parliament thereon. The net expenses of the Department were estimated at £100,000 in 1921-22.

Compt and Aud.-Gen., Sir Malcolm G. Ramsay, k.c.b., £3,000

FOREIGN OFFICE, Downing Street, S.W. 1.

The Secretaryship of State for Foreign Affairs was created in 1782, superseding the ancient Secretary for the Northern Department of Europe (as the Office had been called since 1688). He is assisted by two Under-Secretaries (one Parliamentary, the other Permanent), two Assistant Under-Secretaries, eight Assistant Secretaries, a Legal Adviser, a Librarian, and a staff of Clerks. The chief functions, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £225,500 in 1921-22.

Principal Secretary of State for Foreign Affairs, Most

FORESTRY COMMISSION, -

22 Grosvenor Gardens, S.W. 1.

The Forestry Commissioners were appointed under the

Forestry Act (1909), and were created a Body Corporate

in April 1920. The Commissioners are charged with the

general duty of promoting the interests of forestry, the

development of afforestation and the production and

supply of timber in the United Kingdom. The Act trans-

ferred to the Commissioners the powers and duties of the

Board of Agriculture and Fisheries, the Board of Agri-

culture for Scotland, and the Department of Agriculture

and Technical Instruction for Ireland in relation to

forestry, and also the powers of those Departments

under the Destructive Insects and Fests Act, 1877 and

1907, so far as those powers relate to insects or pests

destructive only to forest trees and timber.

The net estimated expenditure on forestry operations,

&c. for the year 1921-22 is £400,000.

(Chairman, Maj.-Gen. Lord Lovat, K.T., K.C.M.G.,

K.C.V.O., C.B., D.S.O.)

Commissioners. Right Hon. F. Dyke Acland, M.P.;

Rt. Hon. Lord Clinton; L. Forester-Walker, M.P.;

T. B. Ponsonby, D.L.; R. L. Roblson, O.B.E.; Col

W. Stewart-Fotheringham; Sir J. Stirling-Maxwell,

Bart.

Assistant Commissioners, Hugh Murray, C.I.E., C.B.E.

(England and Wales); John Sutherland, C.B.E.

(Scotland); A. C. Forbes, O.B.E. (Ireland).

Secretary, A. G. Herbert

FRIENDLY SOCIETIES' REGISTRY,

17, North Audley Street, W. 1.

A Barrister was appointed in 1826 to certify the Rules

of Savings Banks, and in 1829 to certify those of

Friendly Societies. In 1846 he was constituted Registrar

of Friendly Societies. By the Friendly Societies Act,

1875, the Central Office of the Registry of Friendly

Societies was created, consisting of Chief Registrar

and the Assistant Registrars for England. It exercises

numerous and important functions under the Friendly

Societies Act, the Industrial and Provident Societies

Acts, the Building Societies Acts, the Trade Union

Acts, the Workmen's Compensation Acts, the Scientific

Societies Act, the Trustee Savings Banks and Post Office

Savings Banks Acts, the Loan Societies Act, the Shop

Clubs Act, and a great number of local and personal

Acts. Establishment expenses, 1920-21, £41,820.

Chief Registrar, G. Stuart Robertson, M.C., £1,200 to £1,500

Private Sec., G. H. Cooper.

Asst. Registrars, G. D. Barlow; John Fox, O.B.E.;

Digby L. F. Koe, £300 to £1,000

Principal Legal Assistant, H. P. Barker, £300 to £500

Head of Legal Branch, M. A. Mackinnon, M.C.

£350 to £500

Head of Returns and Statistics Branch, H. C. South,

£350 to £500

Head of Rules, &c. Branch, G. T. Knecht, L.S., £300 to £500

Head of Registers, &c., Branch, T. F. Dunning

£300 to £500

MINISTRY OF HEALTH, Whitehall, S.W. 1.

This Department was established by the Ministry of Health Act, 1919, to exercise in England and Wales powers with respect to Health and Local Government, and to it were transferred by the Act, subject to certain provisions (a) all the powers and duties of the Local Government Board, the Insurance Commission and the Welsh Insurance Commission; (b) the powers of the Board of Education relating to the health of expectant and nursing mothers and children under five, and to the medical inspection and treatment of children and young persons; (c) all the powers of the Privy Council and of the Lord President of the Council under the Midwives Acts, 1902 and 1928, and the powers hitherto exercised by the Secretary of State under Part I of the Children Act, 1901. There may also be transferred to the Minister certain specified powers and any other powers and duties in England and Wales of any Government Department which appear to relate to matters affecting or incidental to the health of the people.

REGISTRAR-GENERAL'S OFFICE

(ENGLAND AND WALES),

Somerset House, W.C.2.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1532, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 62. The first Registrar-General was appointed in 1836, his work being enormously increased by the Act of 1874, which made registration compulsory in England and Wales. The expenses of the Office for 1919-20 were estimated at £66,459 (Registry of Business Names, £1,625).

Registrar-General, S. P. Vivian £1,500
Private Sec., G. H. Tregear, M.B. £1,000
Assistant Registrars-General, T. T. S. de Jastrzebaki; W. L. Rind £500 to £1,000
Supt. of Statistics, T. H. C. Stevenson, M.D., C.B.E. £800 to £1,000
Senior Clerks, F. Bendle; C. W. Danby; F. Finch; G. V. Howell £550 to £700

HOME OFFICE, Whitehall, S.W. 1.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of Great Britain, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy.

Principal Secretary of State for Home Affairs, Rt. Hon. Edward Shortt, K.C., M.P. £5,000
Private Sec., A. Maxwell.

Asst. Private Sec., H. R. Boyd, C.B.E.
Parliamentary do., J. Long Sturrock, M.P. unsp.

BOARD OF INLAND REVENUE.

Somerset House, W.C. 2.

The appointment of Commissioners of Stamps dates from 1864 and of Commissioners of Taxes from 1799. By 4 and 5 Will. IV. c. 66, a consolidated Board of Stamps and Taxes was established, and by 22 and 23 Vict. c. 1 this Board was amalgamated with the Commissioners of Excise to form the Board of Inland Revenue. By 8 Edw. VII. c. 25 the administration of Excise was transferred to the Board of Customs. The present sources of "Inland Revenue" consist of Death Duties, Stamps, Taxes and Land Value Duties. Salaries and Expenses of the Board amounted in 1919-20 to £4,445,380.

Chairman, Rt. Hon. Sir John Anderson, k.c.b., f.c. £3,000

Surveyor, Harold Oxley, F.R.S.I.

IMPERIAL MINERAL RESOURCES BUREAU.

a Queen Anne's Gate Buildings, Westminster, S.W. 1.

The Bureau was incorporated by Royal Charter on the 24th June, 1919, and its purposes are: (i) To collect, co-ordinate, and disseminate information as to the resources, production, treatment, consumption and requirements of every mineral and metal. (ii) To ascertain the scope of existing agencies, with a view ultimately to avoid any unnecessary overlapping that may prevail. (iii) To devise means whereby existing agencies can, if necessary, be assisted and improved in the accomplishment of their respective tasks. (iv) To supplement these agencies, if necessary, in order to obtain any information not now collected which may be required for the purposes of the Bureau. (v) To advise on the development of the mineral resources of the Empire or of particular parts thereof, in order that such resources may be available for the purposes of Imperial Defence or Industry or Commerce.

Board of Governors.

The Board of Governors consists of representatives appointed by the Home and Overseas Governments, the President of the Board being Rt. Hon. A. J. Balfour, O.M., M.P., F.R.S.

Chairman of the Bureau (and Representative of the United Kingdom), Sir Richard Beddome, K.C.M.G., M.I.C.E., M.I.M.E., F.R.S., F.R.S. (*Dominion of Canada*), Wilket G. Miller, L.L.D., F.R.S.C. (*Commonwealth of Australia*), William Stanley Robinson.

(*Dominion of New Zealand*), (vacant). (*Union of South Africa*), (vacant). (*Dominion of Newfoundland*), Rt. Hon. Lord Morris, K.C.M.G., K.C. (*Free Churches*). (*Government of India*), Richard Dixon Oldham, F.R.S., F.S.A. (Nominated by the Secretary of State for the Colonies), John William Evans, A.C., F.R.S. (Appointed by the Lord President of the Council), Westgarth Forster Brown, M.I.C.E., M.I.M.E.; Frederick H. Hatch, M.I.C.E., M.I.M.E.; Wallace Thorneycroft, F.R.S., M.I.M.E.; Professor Thomas Turner, M.Sc., F.I.C., A.R.S.M.; Hugh F. Marriott, A.R.S.M., M.I.C.E.; Sir Herbert Jackson, A.R.S., F.I.C., F.R.S.

Secretary to the Bureau, Maj. W. M. Henderson-Scott, A.R.S.M., F.O.S.

The Bureau is advised by fifteen Technical Committees.

THE ROYAL MINT, Tower Hill, E. 1.

The Royal Mint, as now constituted, may be said to date from 1819, and the buildings from 1850, the latter being completed in that year at the cost of over £200,000. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The first known Master (or Warden) of the Mint dates from Henry I, and the last Warden was Lord Maryborough (1821-29), the last Master being Professor Thomas Graham, who died in 1869. The estimated administrative expenses amount to £23,100 for 1921-1922. Appropriations in aid, £23,250, leaving a net cost of £10.

Master and Worker, The Chancellor of the Exchequer. *Deputy Master and Comptroller, and Engraver of H.M. Seals (ad. int.)*, The Permanent Secretary to the Treasury.

Chief Clerk, F. L. D. Matthews £500 to £700
Sen. Clerk & Reg., D. J. Scourfield £400 to £500
Staff Clerk, S. A. Cole £400 to £500
Do., C. F. Barrett £300 to £400
Superintendent, Operative Department, W. J. Hooking, C.B.E. £700 to £900
Assistant, W. J. Drown; D. G. Spittle; H. W. L. Evans, O.B.E. £500 to £700
Chemist and Assayer, Sir T. K. Rose, D.Sc. £700 to £900
Assistant Assayers, S. W. Smith, D.Sc. £350 to £500;
J. Phelps, M.A., £350 to £500; W. A. C. Newman, B.Sc. £300 to £500
Curator and Librarian, W. J. Hooking, C.B.E. (add.) £50

Branches of the Royal Mint.

Sydney, New South Wales.

Deputy Master, J. H. Campbell £1,200

Superintendent (vacant) £700 to £900

Melbourne, Victoria.

Deputy Master, A. M. Le Souef £1,200

Superintendent, W. M. Robins, B.A. £600 to £900

Perth, Western Australia.

Deputy Master, J. F. Campbell £1,200

Superintendent, F. E. Allum £700 to £900

Ottawa, Canada.

Deputy Master, A. H. W. Cleave £1,000 to £1,500

Superintendent, J. Roe £750 to £1,000

THE BRITISH MUSEUM,

Bloomsbury, W.C. 1.

The British Museum may be said to date from 1753, when Parliament granted the sum of £50,000 to purchase the collection of books, &c., of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1847, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Act. Rules, &c., affecting the public, dates and times of opening, &c., will be found among "Places of Interest." The administrative expenses of the British Museum were estimated at £275,000 (including Natural History Museum) in 1921-22, and were met by a vote under "Education, Science, and Art," Class IV, of the Civil Service Estimates.

Director and Principal Librarian, Sir Frederic George Kenyon, K.C.B., T.D., F.R.S., Litt.D. £1,500
Assistant Secretary, A. B. Dyball, B.Sc. £500
Accountant, C. F. Cooke £350 to £700
Minor Staff Officers, J. Knowles; J. T. Isaac £50 to £200

Keeper of Printed Books, Alfred William Pollard, D.Litt. £1,000

<i>Deputy Keepers, Robert F. Sharp, B.A.; F. D. Sladen, B.A.; J. A. J. de Villiers, B.A.</i>	£500
<i>Superintendent of Reading Room, F. D. Sladen, B.A.</i>	£500
<i>Assistant Keepers, L. H. E. Taylor; H. Symons, B.A.; E. Wilson, M.A.; W. A. Marsden, B.A.; L. C. Wharton, B.A.; G. D. R. Tucker, M.A.; H. Thomas, M.A.; A. J. K. Ebdale, B.A.; J. V. Scholderer, M.A.; J. F. Johnson, M.C., B.A.; A. I. Ellis, M.A.; C. W. Hilley, M.A.</i>	£475 to £500
<i>Deputy do., W. T. Calman, B.Sc., F.R.S.</i>	£500
<i>Assistant Keepers, M. R. Oldfield Thomas, F.R.S.; R. Kirkpatrick; W. P. Pycraft; A. S. Hirst; P. R. Lowe, O.B.E.</i>	£475 to £500
<i>Assistant, J. G. Dollman, B.A.; N. B. Kinnear; G. C. Robson, B.A.; H. A. Baylis, M.A., D.Sc.; A. K. Totton, M.C.; M. A. C. Hinton</i>	£450 to £440
<i>Keeper of Entomology, C. J. Gahan, M.A., D.Sc.</i>	£500
<i>Assistant Keepers, Maj. E. E. Austen, D.R.O.; J. H. Durrant; G. J. Arrow</i>	£475 to £500
<i>Assistant, J. Waterston, B.D., D.Sc.; F. W. Edwards, B.A.; K. G. Blair, B.Sc.; N. D. Riley; F. Laing, M.A., B.Sc.; W. H. T. Tams</i>	£450 to £440
<i>Keeper of Geology, A. S. Woodward, LL.D., F.R.S.</i>	£500
<i>Deputy do., F. A. Bather, D.Sc., F.R.S.</i>	£500
<i>Assistant Keepers, C. W. Andrews, D.Sc., F.R.S.; W. D. Lang, Sc.D.</i>	£475 to £500
<i>Assistant, W. N. Edwards, B.A.</i>	£450 to £440
<i>Keeper of Mineralogy, Dr. G. T. Prior, M.A., D.Sc., F.R.S.</i>	£500
<i>Assistant Keeper, L. J. Spencer, D.Sc.</i>	£475 to £500
<i>Assistant, W. Campbell Smith, M.C., M.A., D.Sc.</i>	£450 to £440
<i>Keeper of Botany, A. B. Wendle, D.Sc., F.R.S.</i>	£500
<i>Assistant Keepers, A. Gepp, M.A.; E. G. Baker</i>	£475 to £500
<i>Assistant, J. Ramsbottom, O.B.E., M.A.; H. F. Wernham, B.A., D.Sc.; A. J. Wilmott, B.A.</i>	£450 to £440

<i>Keeper of Prints and Drawings, Campbell Dodgson, M.A., C.B.E.</i>	£500
<i>Deputy do. (in charge of the Sub-Dept. of Oriental Prints, &c.), R. Laurence Binyon, B.A.</i>	£500
<i>Assistant Keeper, A. M. Hind, M.A., O.B.E.</i>	£500 to £500
<i>Assistant, A. E. Popham, B.A.; A. D. Waley, B.A.; H. M. Hake, B.A.</i>	£450 to £440
<i>Keeper of Egyptian and Assyrian Antiquities, Sir Ernest A. Wallis Budge, LL.D., F.R.S.</i>	£500
<i>Deputy Keeper, H. R. H. Hall, D.Litt., M.B.E., F.R.S.</i>	£500

<i>Assistant, Sidney Smith, B.A.; C. J. Gadd, B.A.</i>	£450 to £440
<i>Keeper of Greek and Roman Antiquities, Arthur H. Smith, M.A., F.R.S.</i>	£500
<i>Deputy Keeper, H. B. Walters, M.A., F.R.S.</i>	£500
<i>Assistant, E. J. Forstyk, M.A., F.R.S.; F. N. Pryce, M.A.</i>	£450 to £440
<i>Keeper of British and Medieval Antiquities, O. M. Dalton, M.A., F.R.S.</i>	£500
<i>Deputy do., Reginald A. Smith, B.A., F.R.S.</i>	£500
<i>Assistant, A. B. Tonnochy, M.A.</i>	£450 to £440
<i>Keeper of Ceramics and Ethnography, Robert L. Hudson, B.A.</i>	£500
<i>Deputy do., T. A. Joyce, M.A., O.B.E.</i>	£500
<i>Assistant, H. J. Braunholtz, M.A.</i>	£450 to £440
<i>Keeper of Coins & Medals, G. F. Hill, F.R.S.</i>	£500
<i>Assistant Keeper, 2nd Class, John Allan, M.A.</i>	£475 to £500

<i>Assistant, G. C. Brooke, B.A.; Harold Mattingly, M.A.; E. S. G. Robinson, B.A.</i>	£450 to £440
<i>Solicitors, Messrs. Warrens, 5 Bedford Square.</i>	

THE LONDON MUSEUM, Lancaster House, St. James's, S.W. 1.

The London Museum was instituted, on the lines of the Carnavalet at Paris, for the conservation of the antiquities, &c., of London. The Collection was originally housed in Kensington Palace, and was re-opened in 1902 at Lancaster House. The cost of administration in 1909-10 was estimated at £4,400.

<i>Keeper, Secretary and Accounting Officer, F. A. Harman Owen, F.R.S.</i>	
<i>Asst. Keeper and Librarian, Lt.-Col. Hon. Maurice Brett, M.V.O.</i>	
<i>Inspector of Excavations, G. F. Lawrence.</i>	

THE NATURAL HISTORY MUSEUM, Cromwell Road, S.W. 7.

The Natural History Collections in the British Museum were removed to South Kensington and rearranged there in 1881, the new museum being opened to the public in 1882. The hours of opening, &c., will be found under "Places of Interest." The administrative expenses were estimated at £207,377 in 1902-03.

<i>Director, Sir Sidney F. Harmer, F.R.S., Sc.D., F.R.S.</i>	£5,200
<i>Assistant Secretary, G. F. Herbert Smith, M.A., D.Sc.</i>	£450 to £500
<i>Clerks, W. J. Anderson, T. Wooddise</i>	£200 to £400
<i>Assistant Keeper (Library), B. H. Soulbay, M.A.</i>	£475 to £500
<i>Keeper of Zoology, C. T. Regan, M.A., F.R.S.</i>	£5,200
<i>Deputy do., W. T. Calman, B.Sc., F.R.S.</i>	£500
<i>Assistant Keepers, M. R. Oldfield Thomas, F.R.S.; R. Kirkpatrick; W. P. Pycraft; A. S. Hirst; P. R. Lowe, O.B.E.</i>	£475 to £500
<i>Assistant, J. G. Dollman, B.A.; N. B. Kinnear; G. C. Robson, B.A.; H. A. Baylis, M.A., D.Sc.; A. K. Totton, M.C.; M. A. C. Hinton</i>	£450 to £440
<i>Keeper of Entomology, C. J. Gahan, M.A., D.Sc.</i>	£500
<i>Assistant Keepers, Maj. E. E. Austen, D.R.O.; J. H. Durrant; G. J. Arrow</i>	£475 to £500
<i>Assistant, J. Waterston, B.D., D.Sc.; F. W. Edwards, B.A.; K. G. Blair, B.Sc.; N. D. Riley; F. Laing, M.A., B.Sc.; W. H. T. Tams</i>	£450 to £440
<i>Keeper of Geology, A. S. Woodward, LL.D., F.R.S.</i>	£500
<i>Deputy do., F. A. Bather, D.Sc., F.R.S.</i>	£500
<i>Assistant Keepers, C. W. Andrews, D.Sc., F.R.S.; W. D. Lang, Sc.D.</i>	£475 to £500
<i>Assistant, W. N. Edwards, B.A.</i>	£450 to £440
<i>Keeper of Mineralogy, Dr. G. T. Prior, M.A., D.Sc., F.R.S.</i>	£500
<i>Assistant Keeper, L. J. Spencer, D.Sc.</i>	£475 to £500
<i>Assistant, W. Campbell Smith, M.C., M.A., D.Sc.</i>	£450 to £440
<i>Keeper of Botany, A. B. Wendle, D.Sc., F.R.S.</i>	£500
<i>Assistant Keepers, A. Gepp, M.A.; E. G. Baker</i>	£475 to £500
<i>Assistant, J. Ramsbottom, O.B.E., M.A.; H. F. Wernham, B.A., D.Sc.; A. J. Wilmott, B.A.</i>	£450 to £440

THE VICTORIA AND ALBERT MUSEUM, South Kensington, S.W. 7.

The history of the Museum may be said to begin in 1852, when the Museum of Ornamental Art was founded at Marlborough House. The collection consisted of certain objects which had been purchased at the 1852 Exhibition, "on account of the excellence of their art and workmanship," at a cost of £5,300, together with other specimens purchased for the use of the various Schools of Design since 1857, and dispersed among them. Additions have since been made by purchase, gift, and bequest. The older parts of the building were erected between 1850 and 1854; the new buildings were completed in 1909. The administrative expenses were estimated at £150,424 in 1901-02, and were met by a vote under Education, Science, and Art. The branch museum at Bethnal Green (administrative expenses 1901-02 £10,903) was opened in 1872. The buildings were removed from South Kensington, and re-erected on land purchased for the purpose locally.

<i>Director and Secretary, Sir Cecil H. Smith, C.V.O., LL.D.</i>	£5,200 to £5,300
--	------------------

SECRETARIAT.

<i>Secretary to the Advisory Council, H. A. Kennedy</i>	£400 to £500
<i>Museum Superintendent, E. Hart (with allowance £100)</i>	£400 to £500
<i>Asst. Head of Section, A. V. Fullerton</i>	£400 to £500

DEPARTMENT OF ARCHITECTURE AND SCULPTURE.

<i>Deputy Keeper, E. R. D. MacLagan, C.B.E., B.A.</i>	£500
<i>Assistant, and Class, R. P. Bedford</i>	£150 to £300

DEPARTMENT OF ORNAMENTS.

<i>Deputy Keeper, B. Rackham, M.A.</i>	£500
<i>Assistant, and Class, W. A. H. King, B.A.</i>	£150 to £300

<i>Assistant, 1st Class, B. S. Long, M.A.</i>	£500 to £500
<i>Assistant, and Class, F. W. Stokes, B.A.; A. K. Sabin</i>	£150 to £300

LIBRARY.

<i>Keeper, G. H. Palmer, B.A.</i>	£5,000
<i>Assistant Keepers, T. C. Grove; A. Van de Put</i>	£500 to £500
<i>Assistant, 1st Class, H. C. Andrews, M.A.</i>	£500 to £500

DEPARTMENT OF METALWORK.

Keeper, W. W. Watts, F.R.S.	£1,000
Deputy Keeper, H. P. Mitchell	£500
Assistant, 1st Class, A. J. Koop, B.A.; Maj. C. T. P. Bailey	£300 to £500

DEPARTMENT OF TEXTILES.

Keeper, A. F. Kendrick, B.A.	£1,000
Assistant Keeper, P. G. Treadell	£300 to £500
Technical Assistant, A. D. H. Smith, B.A.	£100 to £300

DEPARTMENT OF WOODWORK.

Keeper, Lt.-Col. E. F. Strange, C.B.E.	£1,000
Assistant, 1st Class, O. Brakett; H. Clifford-Smith, B.A., F.R.S.	£300 to £500

INDIAN SECTION.

Deputy Keeper, C. S. Clarke	£500
Assistant, 1st Class, A. J. D. Campbell	£300 to £500

DEPARTMENT OF CIRCULATION.

Deputy Keeper, R. F. Martin	£500
Assistant, 1st Class, Maj. E. W. Dennis; A. E. J. Turrona	£300 to £500

BETHNAL GREEN MUSEUM.

Assistant Keeper, T. A. Lehfeldt	£500 to £600
----------------------------------	--------------

NATIONAL LIBRARY OF WALES,
Aberystwyth.

Founded by Royal Charter, 1907, and maintained by annual grant from the Treasury. Contains valuable MSS. and rare printed books in Welsh and other Celtic languages. One of the six libraries entitled to certain privileges under Copyright Act. Open daily 10 to 5 Sat. 10 to 2.

Librarian, John Ballinger, C.B.E., M.A.

NATIONAL MUSEUM OF WALES, Cardiff.
Amgueddfa Genedlaethol Cymru.

Founded by Royal Charter, 1907, and maintained by Annual Grant from the Government and Museum rate from the Cardiff City Council. New building in course of erection. The collections consist of Welsh porcelain, English pottery, the Winton Collection of Continental porcelain, Ryke-Thompson collection of water-colour drawings, and important collections of paintings in oil and engravings, collections illustrating bygone Welsh domestic life and agriculture, Oreste of pre-Norman Monuments of Wales, and Natural History collections.

The Museum, in Trinity Street, is open free daily and on Sunday afternoons. The Director's Office, City Hall, Cardiff.

President, Rt. Hon. Lord Treowen, C.B., C.M.G.
Vice-President, Major David Davies, LL.D., M.P.
Treasurer, Hildv Evans Jones, J.P.
Director, Dr. Wm. Evans Hoyle, M.A.
Keepers (Archaeology) Dr. R. E. Mortimer Wheeler, M.C., M.A.; (Art) Isaac J. Williams; (Botany) Dr. E. N. Miles Thomas, F.R.S.; (Geology) Dr. F. J. North, F.R.S.; (Zoology) Dr. J. J. Simpson, M.A.
Secretary, A. H. Lee, M.C.

NATIONAL DEBT OFFICE,
29 Old Jewry, E.C. 3.

The National Debt Commissioners were appointed under 3 Geo. III. c. 32 (1786), by which a permanent Sinking Fund was to be established, and a sum of £500,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1825 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this is commonly known as the Old Sinking Fund. In 1875 the New Sinking Fund was set up by Sir Stafford Northcote (28-29 Vic., c. 46), and this, with the Old Sinking Fund, now mainly operates in reducing the Debt. The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Paymaster-General, and the Governor and Deputy-Governor of the Bank of England. The administrative expenses of the Board were estimated at £28,000 in 1924-25.

Comptroller-General, Sir Thomas L. Heath, K.C.B., C.V.O., F.R.S.	£5,000
Private Secretary, E. W. Kitson	£200
Assistant Comptroller, G. F. Ansell, C.B.E.	£300 to £500

Secretary, H. Weatherill, C.B.E., F.R.S.	£500 to £600
Chief Clerk, W. F. Douse	£300 to £500
Principal Clerks, H. Weatherill, C.B.E., F.R.S.; E. S. Jones	£300 to £500

Assistant do., J. J. Bree; A. L. Jockel; C. R. Hobbins; G. Rackham; H. R. Powell; H. R. Bay (Actg.)	£500 to £600
Brokers, Messrs. Mullens, Marshall, Steer, Lawford & Co.	£2,500

NATIONAL GALLERY,
Trafalgar Square, W.C. 2.

The National Gallery is the result of a Parliamentary grant of £500,000 in 1824 for the purchase and exhibition of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1868, 1887, 1889, and 1911. The cost of administration in 1923-24 was estimated at £24,167.

Director, Sir Charles John Holmes	£1,000 to £1,500
Assistant to Director, R. M. Gleadowe	£500 to £600
Keeper and Secretary, C. H. Collins Baker	£500
Chief Clerk and Asst. Sec., G. E. Ambrose, L.A.O.	£500

NATIONAL GALLERY OF BRITISH ART
(The Tate Gallery), Millbank, S.W. 1.

The National Gallery of British Art, better known as "The Tate Gallery," was opened in 1897 on the site of Millbank Gaol, the cost of erection £200,000, the building being opened in 1899 and enlarged in 1910. It was opened to the public in 1900.

Director, Charles Aitken	£1,000
Asst. Keeper, James B. Manson	£500 to £600

NATIONAL INSURANCE AUDIT DEPT.

Head Office, a Cambridge Gate, Regent's Park, S.W. 1. By the National Insurance Act, 1911, it is provided that the accounts of Approved Societies, Branches, and Insurance Committees shall be submitted to audit by auditors appointed by the Treasury. This Department was created by the Treasury Minute of August 6, 1911.

Chief Auditor, D. H. Boggis-Rolfe	
Deputy do. & Secretary, W. A. Middleton, C.B.E.	
Chief Inspector of Audit, M. W. Dixon (Actg. Sec.)	
Clerk in Charge of Accounts, R. McCormack	
Registrar, C. H. W. O'Brien, M.B.E.	
Inspectors of Audit, (7); Auditors, Cl. I. 14, Cl. II. 24 (47); Assistant Auditors, (28)	

NATIONAL PORTRAIT GALLERY,
St. Martin's Place, Charing Cr 22, W.C. 2.

The first grant to the institution was made in 1866; the collections being successively housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The present building was opened in 1896, £200,000 being contributed to its cost by Mr. W. H. Alexander. The amount for salaries and expenses, including a grant of £5,000 for purchase of portraits, was estimated at £7,211 in 1923-24.

Director, Keeper, and Secretary, James D. Milner, F.R.S.	£500
--	------

H.M. NAUTICAL ALMANAC OFFICE,
36 Lee Road, S.E. 3.

The "Nautical Almanac" was first published for 1767, by H.M. Admiralty, under whose control the office now remains. The expenses of preparation were estimated at £4,750 in 1902-23.

Superintendent, P. H. Cowell, D.Sc., F.R.S.	£600
Chief Assistant, B. F. Bawtree	£400 to £500
Assistants, J. A. Sprigge; W. F. Doak, M.A., F.R.S.; T. C. Hudson, B.A., F.R.S.	£300 to £400

OBSERVATORIES.

Royal Observatory, Greenwich.

The Royal Observatory was founded by Charles II. in 1675, the building, designed by Moore and Wren, being opened in 1694. The administrative expenses of the Observatory are estimated at about £1,500 annually.

Astronomer Royal, Sir F. W. Dyson, LL.D., F.R.S.	£1,000 to £1,500
Chief Assistants, J. Jackson, M.A., D.Sc., F.R.S.; H. S. Jones, M.A., D.Sc., F.R.S.	£500 to £700
Assistants, Andrew C. D. Crommelin, D.Sc., F.R.S.; C. Davidson, F.R.S.; W. Bower, F.R.S.; W. W. Bryant, B.A., F.R.S. (Magnetic and Meteorological)	£300 to £500
Junior do. (Higher Grade), H. Furner, F.R.S.; P. J. Melotte, F.R.S.; W. M. Witchall, D.Sc., F.R.S. (Acting Asst.)	£300 to £500
Clerical Assistant, D. J. R. Hiney, F.R.S.	£300 to £400

Royal Observatory, Cape of Good Hope.
Astronomer, S. S. Hough, M.A., F.R.S. £567 to £647
Chief Asst., J. K. E. Halm, Ph.D., F.R.A.S.

Assistants, W. H. Cox; J. Lant, D.Sc.; E. Woodgate £567 to £575
Assistants, W. H. Cox; J. Lant, D.Sc.; E. Woodgate £567 to £575

Other British Astronomical Observatories.

Armagh, Rev. W. F. A. Ellison, M.A.
Cambridge, Prof. A. S. Eddington, M.A., F.R.S. (Plumian Prof.); (Solar Physics), Prof. H. F. Newall, D.Sc. F.R.S.
Dunstun, (Royal Astronomer of Ireland).

Durham, Col. E. H. Grove-Hills, R.E., C.M.G., D.Sc., F.R.S.
Edinburgh (Royal Observatory), Prof. R. A. Sampson, D.Sc., F.R.S. (Astronomer Royal for Scotland); (Caiton Hill), Sir W. Peck.

Liverpool, W. E. Plummer, M.A.
Norman Lockyer (Salcombe Hill, Devon), Dr. W. J. S. Lockyer, Ph.D.

Oxford (University), H. H. Turner, D.Sc., F.R.S. (Savilian Prof. of Astronomy); (Radcliffe), Dr. A. A. Hambaut, D.Sc., F.R.S.

South Kensington (Imperial College), Prof. A. Fowler, F.R.S.

Stonyhurst College, Rev. A. L. Cortie, B.A.
Kodakun and Madras, John Evershed, F.R.S.
Helwan Observatory, Egypt, H. Knox-Shaw, M.A.

DEPARTMENT OF OVERSEAS TRADE (DEVELOPMENT AND INTELLIGENCE), (Joint Department of the Foreign Office and the Board of Trade).

33 Old Queen Street, S.W. 1.

City Branch Office, 73 Basinghall Street, E.C. 2.

This Department was formed during the autumn of 1917 as a joint Department under the Foreign Office and Board of Trade, and is represented in Parliament by a Parliamentary Secretary, who occupies the position both of Additional Parliamentary Under-Secretary of State for Foreign Affairs and of Additional Parliamentary Secretary at the Board of Trade. The Department is concerned mainly with the promotion and development of overseas trade, and comprises the former Department of Commercial Intelligence of the Board of Trade and a part of the Foreign Trade Department of the Foreign Office. It has, in addition, taken over certain functions formerly performed by the Foreign Office in connexion with commercial intelligence and with the Commercial Diplomatic and Consular Services. The cost of administration was estimated at £408,946 in 1921-22.

River Superintendent, F. J. Batty.

Harbour Masters, (Upper District) Capt. D. R. Buchanan, Old Swan Pier, E.C. 4; (Lower District)

Capt. F. W. Kershaw, N.E. 4, Gravesend.

POST OFFICE.

Chief Office, St. Martin's-le-Grand, E.C. 1.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1535, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue collecting departments, and, while efficiently discharging its multifarious duties, shows a large annual profit. It also receives large sums for duties and taxes on behalf of the Inland Revenue Department, for certain licences for the Customs and Excise Department and the County Councils, and for National Insurance on behalf of the National Health Insurance Commissioners and the Board of Trade. The Post Office also pays Old Age Pensions. The Penny Post was inaugurated in 1840, the Book Post in 1855, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1869, the Money Order Office in 1870, Postal Orders in 1880, the Parcel Post in 1885, and the Telephone Service in 1890. The administrative expenses of the Post Office (salaries, wages, etc.), only, were estimated at £4,975,000 in 1912-13.

Postmaster-General, Rt. Hon. F. G. Kellaway, M.P. £5,000

Private Secs., Lt.-Col. W. B. Vince, U.S.D., M.C., Miss A. M. Coope

Parliamentary Private Secretary, Maj. Hon. Oscar Guest, M.P. (unpaid)

Assistant P.M.G., Rt. Hon. H. Pike Pease, M.P. £1,000

Secretary to the Post Office, Sir G. Evelyn P. Murray, K.C.B. £2,000

Private Secretary, Lt.-Col. T. M. Banks, D.S.O., M.C. £2,000

Second Secretary, E. Raven, C.B. £2,000

Assistant Secretaries, F. J. Brown, C.B.E.; Brig.-Gen. F. H. Williamson, C.B.E.; J. T. Bell; A. R. Kidner; W. T. Leach; W. E. Parsons. £1,000 to £1,500

PRIVY COUNCIL OFFICE, Whitehall, S.W. 1.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, k.g. and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was reconstituted in 1792. At present it consists of certain eminent persons whose names are given on p. 368. Members of the Cabinet must be Privy Counsellors, and they principally form the acting Privy Council. The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, e.g., the Judicial Committee, the Board of Trade, &c. The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

Lord President of the Council, Rt Hon. Arthur James Balfour, o.s., m.p. £2,000

Private Sec., Maj. Hon. E. Lascelles, o.s., m.c. £1,500

Clerk of the Council, Sir Almeric W. FitzRoy, o.s.s., o.s.v.o. £1,500

Accountants, A. H. Craig; A. G. Feak; E. Hadfield; W. H. Whiteley; T. B. Henry £200 to £300

Income and Income Tax Department, F. W. Norledge, £200; S. A. Tansley (Assistant) £200 to £300

Cashier's Office, A. H. Cobbett, £200 to £300; G. E. Shelton (Assistant) £200 to £300

Securities Officer, A. J. H. Hughes, £200 to £300; H. Chown (Deputy) £200 to £300

Acceptance Officer, E. A. Lowndes, £200 to £300; F. A. Coe (Assistant) £200 to £300

Signing Officer, J. H. E. Higgins £200 to £300

Statistical Officer, H. A. Barnett £200 to £300

Officer in charge of Departmental Accounts, C. L. Thompson £200 to £300

Superintendent of Women Staff, Miss F. D. Garner £200 to £300

Lady Visitor, Miss S. G. Clark £200 to £300

MANCHESTER OFFICE, Albert Square, Manchester.

Deputy Public Trustee, T. M. Young £1,500 to £2,500

Principal Clerk, P. Archer £500 to £600

Trust Officers, G. P. Seed; A. A. Webster £200 to £300

Chief Accountant, F. E. Chapman £200 to £300

Accountant, W. R. Howrie £200 to £300

Chief Clerk of Property Department, E. A. Ashby £200 to £300

Chief Clerk, Securities Section, H. Gregson £200 to £300

Staff Officer and Cashier, R. Watson £200 to £300

PUBLIC WORKS LOAN BOARD,

Old Jewry, E.C. 2.

The Public Works Loan Board was created in 1847 for the purpose of advancing money to Municipal Authorities for Public Works. During the financial year 1900-01 the Commissioners approved loans amounting to £61,642,718, viz., £55,082,428 out of the Local Loans Fund and £6,560,290 out of the Land Settlement (Public Works Loan) Account. Of the total granted out of the Local Loans Fund the sum of £23,574,400 was for purposes of the Housing Acts.

The average annual amount of loans granted by the board during the period from 1875-6 (when the Commission was constituted in its present form) to 1899-00 was £2,504,000 per annum (the lowest amount previously granted being £49,921 in the financial year 1877-78, and the highest £20,000,000 in 1899-1900). The comparison with the total amount advanced by the board during the 25 years from its origin (in 1847) to 1900-01, standing for the total amount advanced during this period was only £20,434,000 as compared with £24,543,928 granted during the single financial year 1900-01; and when it is remembered that the 25 years referred to witnessed almost the entire development of local government in England, the comparison appears very more favourable. The advances made out of the Local Loans Fund

totalled £3,27,779, compared with £1,498,200 in 1929-30. The average rate of interest was—

1 to 5	per cent. in	1929-30
5 to 10	"	1929-30
10 to 15	"	1929-30
15 to 20	"	1929-30
20 to 25	"	1929-30
25 to 30	"	1929-30

Loans granted during the year to Local Authorities for the purposes of State-aided Housing Schemes amounted to £1,042,821. The sum of £2,990,054, advanced by the Commissioners under the Housing Acts, for providing dwellings for the working-Classes during the year, is made up as follows:—

(A) LOANS SECURED ON LOCAL RATES.

	England.	Scotland
(a) For State-aided schemes.....	£1,244,739	£75,261
(b) For non-State-aided schemes.....	4,000	..

(B) LOANS SECURED ON PROPERTY.

	England.	Scotland
(a) For State-aided schemes:	£	£
Public utility societies.....	954,688	29,628
(b) For non-State-aided schemes:		
Public utility societies.....	4,600	..
Individuals and Companies..	2,140	..
	979,428	29,628

Grand Total.....£5,990,054
No applications for loans for land settlement purposes were refused; the advances made out of the Land Settlement Account during the year totalled £6,900,793. Chairman, Hon. Herbert C. Gibbs.....unp.
Deputy-Chairman, Laurence Currie.....unp.
Secretary, H. G. H. Barnes.....£1,500
Asst. Secretary (Legal), D. F. Buckley £500 to £800
Asst. do. and Chief Clerk, H. A. Clark.....£500 to £800

QUEEN ANNE'S BOUNTY,

3 Dean's Yard, S.W. 1.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tenths" derived from the sees, dignities, and benefices, with a view to the augmentation of the insufficiently endowed livings. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed. "First fruits" represent one year's income of a benefice in the time of Henry VIII.; the "tenths" an annual sum of a tenth part of that income. The income from this source amounts to about £15,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants towards the relief of dilapidation assessments on benefices not exceeding £500 in net annual value. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, in certain cases for rebuilding chancels, and for dilapidations.

Secretary & Treasurer, William R. Le Fanu.

Chief Clerk, F. G. Hughes.

1st Class Clerks (Senior Division), John F. Sapsford; C. R. Rowland; E. Jump; D. Smeaton; W. Russell; W. J. P. Smith.

Do. (Junior Division), W. Holford; A. G. Spencer; S. D. Knight; J. H. Hurdman; W. J. Gimson; G. C. Baird.

Solicitor, W. G. Hannah.

Asst. Solicitors, E. J. Haro; N. H. Oldham.

Architect, Martin Skinner.

Accountants, M. J. Rogers.

Auditor, H. C. Garland, 41 Finsbury Pavement, E.C. 4.

DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH.

25 & 26 Old Queen Street, Westminster, S.W. 1.

The Committee of the Privy Council for Scientific and Industrial Research was appointed by Order in Council dated July 28, 1917, to direct, subject to such conditions as the Treasury may from time to time prescribe, the application of any sums of money provided by Parliament for the organization and development of Scientific and Industrial Research. The Committee of the Privy Council is now constituted as follows:—The Lord Pres-

ident, The Secretary of State for the Colonies, The Chancellor of the Exchequer, the Secretary for Scotland, the Chief Secretary for Ireland, The President of the Board of Trade, The President of the Board of Education, The Most Hon. The Marquess of Crewe, K.S., L.L.D., The Rt. Hon. Viscount Haldane of Ocean, K.C., O.M., The Rt. Hon. Lord Gainsford of Headlam, The Rt. Hon. Sir Arthur H. D. Acland, Bart., L.L.D., The Rt. Hon. Arthur Henderson, M.P. The Order in Council also appointed an Advisory Council to whom all proposals for researches stand referred. By Charter dated November 23, 1920, the official members of the Committee of the Privy Council were created a Body Corporate under the name of "The Imperial Trust for the Encouragement of Scientific and Industrial Research" to hold and dispose of money and other property for the purposes of the Committee. On December 13, 1926, a separate Department having its own Parliamentary Vote was created for the service of the Committee.

President of the Committee of the Privy Council, The Lord President of the Council.

Vice-Chairman of the Committee of Council, The President of the Board of Education.

Advisory Council, Sir William S. McCormick, L.L.D. (Chairman); Sir George T. Bell, B.A., F.R.S.; Sir John Cadman, K.C.M.G., D.Sc.; Prof. J. B. Farmer, F.R.S.; Sir Maurice Fitzmaurice, C.M.G., F.R.S.; W. B. Hardy, Sec.R.S.; Sir Henry A. Miers, D.Sc., F.R.S.; Sir John F. C. Snell, M.A., F.R.S.; Sir J. J. Thomson, O.M., F.R.S.; Professor J. F. Thorpe, C.B.E., F.R.S.; Sir Richard Threlfall, K.B.E., F.R.S.; Professor S. Young, F.R.S.

Staff of the Department.

Secretary, Sir H. Frank Heath, K.C.B.....£2,500

Private Secretary, A. F. Barnes....."

Principal Assistant Secretary (acting), Sir Francis G. Ogilvie, C.B.....unpaid

Assistant Secs., Lt. S. Lloyd, C.B.; H. T. Tizard.....£1,000 to £1,500

Controller of Records, C. R. Young, O.B.E., D.Sc.

Principals, L. C. Bromley; Maj. E. O. Henrich (late R.E.); A. L. Hetherington; W. A. M. Murray; P. J. Wheelton (Establishment Officer), and E. Barnard, D.S.O. (acting).

Assistant Principals, A. F. Barnes; I. G. Evans; J. W. Gentleman; G. R. D. Hogg; R. O. Oakes; A. Zalman.

Technical Officers, O. F. Brown; R. F. McKay; J. G. Mitchell; C. A. Spencer.

Co-ordinating Research Boards.

These Boards were established in 1920 (a) to provide for interchange of information between the various Government technical establishments concerning the special work which they undertake and the results achieved, so as to prevent duplication of work; though the Board should have no executive function as regards the work of these establishments; (b) to arrange for the communication of such information to interested persons outside the Government service when this can be done without detriment to the public interest; and (c) in the case of researches not otherwise adequately provided for to make the necessary arrangements to meet the requirements of Government Departments and others.

Chemistry Research Board.

Chairman, Sir Richard Threlfall, K.B.E., F.R.S.

Engineering Research Board.

Chairman, Sir Joseph E. Petavel, K.B.E., D.Sc., F.R.S.

Physics Research Board.

Chairman, Sir J. J. Thomson, O.M., F.R.S.

Radio Research Board.

Chairman, Admiral of the Fleet Sir Henry B. Jackson, G.C.B., K.C.V.O., F.R.S.

Building (Materials and Construction) Research Board.

This Board was established in 1920 to consider and direct the conduct of Research on Building Materials and methods of construction.

Chairman, The Marquess of Salisbury, K.G., G.C.V.O.

Director of Research, H. O. Weller, M.Sc.

Food Investigation Board.

Director of Food Investigation, W. B. Hardy, sec.M.A.

Fuel Research Board.

The Fuel Research Board was appointed by the Committee of the Privy Council in February, 1921, and is entrusted with the investigation of the nature, preparation, and utilisation of fuel of all kinds, both in the laboratory and, where necessary, on an industrial scale.

Director of Fuel Research, Sir G. Bell, F.R.S., D.Sc.
Assistant to the Director, C. H. Lander, M.Sc.
Fuel Research Station.
 East Greenwich, S.E. 25.

The Research Station, erected in 1927-28, by H.M. Office of Works, is designed and equipped to give effect to the Board's scheme of research which was described in their Report published by the Stationery Office in September, 1927.

Chief Engineer, Eng.-Comm. J. Fraser Shaw, M.A.
Acting Superintendent of Laboratories, J. C. King.

Geological Survey Board.

Chairman, Sir Francis G. Oglivie, C.B., LL.D.

Geological Survey of Great Britain and Museum of Practical Survey.

Jermyn Street, S.W. 1.

The Geological Survey and Museum was commenced in 1835; it was under the Science and Art Department from 1839 till 1900, when that Department became merged in the Board of Education. On Nov. 1, 1922, the administrative control of the Survey and Museum was transferred to the Committee of the Privy Council for Scientific and Industrial Research. The normal work of the Survey includes the preparation of geological maps and memoirs dealing with the general survey of the country, and with various economic aspects of that survey. The Museum of Practical Geology conserves and exhibits rocks, minerals and fossils which afford evidence for the published records of the survey or illustrate that survey. It is a function of the Museum to exhibit economic minerals from all parts of the world.

Director of Survey and Museum, J. S. Flett, D.Sc., LL.D., F.R.S.
 Assistant to Director, J. A. Howe, C.B.E., M.Sc.; W. Gibson, M.Sc.

Dist. Geologists, E. B. Bailey, T. C. Cannell, Ph.D.; R. G. Carruthers; H. Dewey; F. L. Kitchin, Ph.D.; M. MacGregor; B. Smith; W. B. Wright.

Petrographer, H. H. Thomas, Sc.D.

Geologists, E. M. Anderson, Sc.D.; C. N. E. Bromhead; G. A. Burnett; G. S. Cling; C. Hawker Dinham, M.A.; E. E. L. Dixon; T. Eastwood; V. A. Eyles; A. Fowler; D. Baldwin; S. E. Hollingsworth; G. W. Leach, D.Sc.; W. Llewellyn; J. Maden; F. Marsden; R. W. Pocock; H. H. Read, M.Sc.; J. E. Richey; T. Robertson; G. Ross; R. L. Sherlock, D.Sc.; J. B. Simpson; F. M. Trotter; C. B. Wedd; T. H. Whitehead; G. V. Wilson, M.Sc.; D. A. Wray.
Assistant Palaeontologists, O. P. Chatwin; J. Pringle.

Museum.

Curator and Librarian, W. F. P. McLintock.

Asst. Curator, A. F. Hallmond.

Asst. Librarian, C. F. Crook.

The National Physical Laboratory,

Teddington, Middlesex.

The National Physical Laboratory was founded in the year 1901 as a public institution for standardising and verifying instruments, for testing materials, and for the determination of physical constants. Prior to the year 1921 the property of the Laboratory was vested in the President and the Council of the Royal Society, and the Laboratory was controlled by a General Board and an Executive Committee, appointed by the President and Council of the Royal Society, and comprising representatives of the Society and of the great Technical Institutions. As from April 1, 1922, the responsibility for the maintenance of the National Physical Laboratory was undertaken by the Department of Scientific and Industrial Research.

The Laboratory comprises eight main sections:—
 (1) The **Physics Department** includes divisions for Heat and Thermometry, Optics, Sound, and Radiology.
 (2) The main divisions of the **Electricity Department** deal respectively with Electrical Standards, General Electrical and Magnetic Measurements, Alternating Current Tests and Research, Direct Current Measurements and Photometry.
 (3) The **Metrology Department** is responsible for the Laboratory Standards of length, area, volume, and mass, and among the various branches of work dealt with are the verification of standards of length, standard bars, surveying tape, the testing of engineers' gauges, including screw gauges, measurements of area, volume, and mass, the testing of barometers, hydrometers, tasimeters, watches and chronometers, and the highest class of scientific glassware for volumetric measurements. The glassware testing has recently been reorganised on an increased scale

owing to the growth in the manufacture of such ware in this country during the war. When the Ministry of Munitions was formed, the Laboratory was called upon to undertake the testing of the gauges for the Ministry; the work assumed very large dimensions, and a special building for the accommodation was provided. (4) The **Engineering Department** carries out research on general engineering problems, especially in relation to the strength and properties of materials under stress; it comprises a laboratory and experimental track for tests of road materials. (5) The **Aerodynamics Department** conducts researches on aircraft models and parts as required by the Aeronautical Research Committee of the Air Ministry; investigations on light alloys and other materials, engines and accessories, seaplane floats, fabrics, &c., are carried out in other departments, especially the Engineering, Metallurgy, and Electro-technics Departments, and the William Froude National Tank. (6) The **Department of Metallurgy and Metallurgical Chemistry**, in addition to researches on steels, and on aluminium and other alloys, is engaged on researches relating to Optical Glass. The equipment includes a rolling mill for the experimental working of alloys. The Metallurgical building was provided by Sir Julius Wernher in 1920. (7) The **William Froude National Tank**, the gift of Sir A. F. Wernher for the service of the nation, carries out tests and researches on ship and propeller models for the information of designers and naval architects. (8) **Secretariat.**

Chairman of the General Board and Executive Committee, The President of the Royal Society.

Vice-Chairman, Sir Arthur Schuster, F.R.S.

Director, Professor Sir Joseph Petavel, M.A., D.Sc., F.R.S.

Secretary, F. J. Selby, C.B.E.

Finance and Establishment Officer, A. Lumley.

Accountant, G. E. Bailey.

Librarian and Assistant to the Secretary, G. R. Edwards.

Physics Department.

Chief Assistant, J. A. Harker, O.B.E., D.Sc., F.R.S.

Principal Assistants, T. Smith; G. W. C. Kaye, O.B.E., D.Sc.

Senior Assistants, W. F. Higgins; E. Griffiths, D.Sc.; E. A. Owen, D.Sc.; J. Guild; A. Blackie (asst.).

Assistants, W. Hugo; J. S. Anderson; J. H. Schofield; A. H. Davis; Miss A. Everett.

Principal Observers, W. J. Boral; W. H. H. Brookes; G. Badderly; A. C. Cooper; A. G. Williams.

Electricity Department.

Superintendent,

Principal Assistants, E. H. Rayner, Sc.D.; G. W. O. Howe, D.Sc.

Senior Assistants, S. W. Melsom; D. W. Dye; J. W. T. Walsh.

Assistants, H. C. Booth; R. L. Smith-Rose; H. Buckley; L. Hartshorn; R. S. J. Spilsbury.

Metrology Department.

Superintendent, J. E. Sears, C.B.E.

Principal Assistant, S. W. Attwell.

Senior Assistant, F. H. Rolt, C.B.E.

Principal Observer, H. A. Dear.

Assistants, E. G. Constable; F. A. Gould; V. Stott; G. A. Tomlinson; A. J. C. Brookes; W. H. Johnson; W. G. Ridge; J. S. Clark; H. P. Bloxam.

Engineering Department.

Superintendent, T. E. Stanton, C.B.E., D.Sc., F.R.S.

Principal Assistant, C. Jakeman.

Senior Assistants, R. G. C. Batson; A. Bailey; J. H. Hyde.

Assistants, Miss D. Marshall; H. Gough; R. W. Fenning; H. J. Tapeell.

Aerodynamics Department.

Superintendent, R. V. Southwell.

Principal Assistant, E. F. Relf.

Senior Assistants, A. Fage; J. L. Naylor.

Assistants, L. W. Bryant; T. Lavender; H. B. Irving; W. L. Cowley; F. G. Simmons; R. Jones; R. A. Fraser; A. S. Batson; G. A. Hankins; E. Ower; C. N. M. Lock.

Department of Metallurgy and Metallurgical Chemistry.

Superintendent, W. Rosenhain, D.Sc., F.R.S.

Principal Assistant, S. L. Aronbut.

Senior Assistants, J. Murdoch; G. Barr, D.Sc.; D. Hanson.

Assistants, W. H. Whittier, J. L. Haughton, D.S.O.; T. E. Rooney, V. H. Scott; P. G. Ward; Miss K. Ringham; Miss M. L. V. Gayler; J. D. Grogan; N. P. Tucker; C. B. Marryat.

The William Frauds National Tank.

*Superintendent, G. S. Baker, O.B.E., M.M.S.N.A.
Senior Assistant, J. L. Kent.
Assistant, Miss E. M. Kenry.*

ROYAL COMMISSION FOR THE EXHIBITION OF 1881.

Office, 2 Lowther Gardens, Exhibition Rd., S.W.7.

(Incorporated by Supplemental Charter as a permanent Commission after winding-up the affairs of the Great Exhibition, in 1881. It has for its object the promotion of scientific and artistic education by means of funds derived from its Kensington Estate, purchased with the surplus left over from the Great Exhibition.)

President of the Royal Commission, H.R.H. the Prince of Wales, K.C.

Chairman, Board of Management, Viscount Escher, O.B.E., G.C.V.O.

Chairman, Science Scholarships Committee, Sir Richard Glazebrook, K.C.B., F.R.S.

Secretary to Commissioners, Evelyn Shaw, M.V.O.

THE NATIONAL SAVINGS COMMITTEE,

Princes House, Kingsway, W.C. 2.

President, Sir Robert M. Kindersley, O.B.E.

*Chairman, Rt. Hon. Lord Islington, G.C.M.G., D.S.O.
Vice-Chairman, Sir T. G. Chambers, K.B.E.; Sir W. Schooling, K.B.E.*

Members of Committee, Rt. Hon. G. N. Barnes, M.P.; Sir A. C. T. Beck, M.P.; Sir Joseph Burn, B.A.; T. L. Gilmour; R. F. Harwood, C.B.E.; Sir Hedley F. le Bas; Sir H. J. Mackinder, M.P.; Sir Arthur H. Marshall, K.B.E.; James Parker, M.P.; Sybil Viscountess Rhonda, D.S.O.; G. Stuart Robertson, K.C.; Stephen Walsh, M.P.; Hartley Withers; G. Anderson, M.B.E. (Trustee Savings Banks); Arthur Collins (Municipal Treasurers and Accountants); C. W. Crook (National Union of Teachers); R. M. Holland Martin, C.B. (Joint Stock Banks); Sir G. E. P. Murray, C.B.E. (Post Office); H. M. Richards, C.B. (Board of Education); Sir Aubrey Symonds, C.B.E. (Ministry of Health); Miss M. Musgrave Watson, M.B.E. (Women's Advisory Committee); Sir F. Shadforth Watts (Chairman, Mercantile Marine Advisory Committee on Savings).

Elected by National Assembly, Sir Thomas Smethurst, K.B.E. (Chairman); Sir George Royle, O.B.E. (Vice-Chairman); W. A. Platt, M.B.E.; W. H. Ashmole, M.B.E.; J. Mallaband; H. B. Morris; J. Voo; Mrs. Muirhead; E. Potts.

Secretary, L. Margerison, C.B.E.

Accounting Officer, J. R. Phillips, C.B.E.

Director of External Organisation, Evan Hughes, C.B.E.

Commissioners, J. E. Holden, O.B.E.; Lt.-Col. P. F. Hone, D.S.O.; Maj. H. S. Johnson, O.B.E.; S. G. Jones, O.B.E.; J. A. Munday, O.B.E.; E. W. Stranger, O.B.E.

Senior Clerks, T. Jordan; J. McMillan; R. D. Kingham, O.B.E.

Establishment Officer, W. H. Hare, M.B.E.

SCOTTISH OFFICE.

(See SCOTTISH SECTION, p. 345.)

STATIONERY OFFICE.

Prince's Street, Storey's Gate, S.W. 2; Gorse Street, Hollinwood, Lancs.; 25 Forth Street, Edinburgh; St. John's Road, Kingsbridge, Dublin; 2 St. Andrew's Crescent, Cardiff.

H.M. Stationery Office was established in 1786, and among its duties are the supply of books and stationery to Government Departments, and the superintendence and control of Government printing, &c. contracts. The Controller, under Letters Patent, is the King's Printer of Acts of Parliament, and in him is vested the Copyright in all Government publications. The administrative expenses were estimated at £40,000 for 1900-01.

Controller, W. R. Codling, C.V.O., O.B.E. £1,000

Private Secy., J. G. H. Roberts, O.B.E. £1,000

Deputy Controller, Lt.-Col. M. G. George £1,000

Asst. Controller, W. G. Wightman, L.S.O. £1,000

Director of Accounts, A. L. Screech, O.B.E. £500 to £500
Establishment Officer, J. B. Gotta, O.B.E. £500 to £500
Director of Supplies, G. F. Whiles, M.B.E. £500 to £500
Director of Printing and Binding, C. W. Howard, O.B.E. £500 to £500
Deputy do., A. J. Bign, M.B.E. £500 to £500
Assistant do., G. W. Riley, M.B.E.; E. V. Emery £500 to £500

General Manager, Printing Works, E. C. Bateman, M.B.E. £500 to £500

Assistant do., J. H. Whitehead; W. C. Cowell; J. Stone £500 to £500

Director of Publications, L. W. Hill £500 to £500

Supt. Duplicating and Distributing Branch, E. W. E. Liddington, O.B.E. £500 to £500

Director of Transport, I. A. H. Watson, O.B.E. £500 to £500

Chief Receiver and Examiner, D. S. Todd, B.A. £500 to £500

Supt. Northern Area Branch, E. H. Chapman, M.B.E. £500 to £500

Supt. Dublin Branch, H. E. Pitman £500 to £500

Supt. Edinburgh Branch, Lt.-Col. W. Ferguson, O.B.E. £500 to £500

Deputy Director of Accounts, G. H. Wright £500 to £500

Deputy Establishment Officer, L. S. Gray £500 to £500

Deputy and Assistant Heads of Divisions, etc., S. E. Lovatt; G. Melsaac; H. A. White (Manchester), £500 to £500; L. C. Dashfield; A. Hammond (Manchester), J. M. Newnham; R. J. Palmer; J. P. Stevenson, M.B.E.; E. J. Thompson, £500 to £500; E. C. Briggs, M.C.; P. Brownlow; A. Craddock (Manchester); T. C. D. Evans (Edinburgh); H. Goodall; R. M. Griffiths; A. L. Harris (Manchester); W. Hawkins; W. J. Langman; H. Phillips (Bolton); C. F. S. Plumbley; A. E. W. Rumbold; C. H. Stranger (Manchester); G. P. Thomson; R. J. S. Webber; J. A. Wright £500 to £500

Chief Examiner of Printers and Binders Accounts, W. E. Bishop, M.B.E. £500 to £500

Technical Officers, W. T. Archer; C. A. G. Riggs; F. Bridges; T. Brimelow (Edinburgh); T. B. Hurrow; F. E. Cawley; G. A. Eden; E. W. Garrod (Cardiff); D. G. Morrison; J. Paterson; H. G. Pearce; J. E. Penn; A. G. Pelly; W. J. Roberts; J. C. Rowden; F. E. Sewell; W. F. P. Stockham; C. B. Thornton (Manchester); H. C. Tuckey; H. E. Wade; J. E. H. Wilson (Dublin) £500 to £500

Examiners of Paper and Office Requisites, A. E. Dave; E. A. Dawe £500 to £500

Assistant do., E. J. H. Stallybrass; H. A. Bromley £500 to £500

JOINT SUBSTITUTION BOARD,

(Treasury and Ministry of Labour),

Montagu House Bungalows, Whitehall, S.W. 2.

Joint Members, J. H. McCraig (Treasury); A. W. Watson, C.B.E. (Min. of Labour).

Joint Secretaries, H. Parker, M.C.; F. N. Tribe, O.B.E.

THAMES CONSERVANCY,

2 Norfolk Street, Strand, W.C. 2.

The Conservation of the River Thames was granted to the Lord Mayor of London in 1487, and delegated to 22 Conservators in 1857, the powers being reconstituted in 1864. The Port of London Act, 1908, took over as from March 31, 1909, all rights, powers, and duties of the Conservators in respect of the river below Teddington.

Chairman, Rt. Hon. Lord Desborough, K.C.V.O.

Vice-Chairman, Sir Robert Buckell.

Secretary, F. W. Geary.

BOARD OF TRADE.

Great George Street, S.W. 1.

(See also Dept. of Overseas Trade, p. 262.)

A Board of Trade and Plantations was established by Charles II. in 1660, and in place of this body a Committee of the Council on Trade was established in 1702. The duties of this Committee (which, unlike the other Council Committees, has a president of its own) are to collect Trade Statistics, control the issue of Patents, keep the Standards of Weights and Measures, the non-legal machinery of Bankruptcy, the Registration of Joint Stock Companies, Gas Companies, Electric Light,

ing, Lighthouses, and Merchant Shipping, acting under the latter heading as Auditor of the accounts of the Trinity House and the Irish and Northern Lighthouse Authorities. In 1902 the powers and duties of the Ministry of Shipping were transferred to the Board of Trade. The administrative expenses were £1,500,000 in 1902-03.

President, Rt. Hon. Stanley Baldwin, M.P. £5,000
Private Secs., C. Patrick Duff; E. W. Reardon;
 J. C. C. Davidson, C.B., M.P. (Partly) (unpaid).
Chief Economic Adviser to H.M. Govt., Sir H.
 Llewellyn Smith, C.B.E.

Acting Commissioner and Secretary, Alan D. Erskine

£750

Asst. Secretary, Kenneth J. M. Teesdale, M.B.E. £350

TREASURY, Whitehall, S.W. 1.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1834. The Commissioners for executing the office of Treasurer of the Exchequer of Great Britain and Lord High Treasurer of Ireland consist of the First Lord, who, if a Commoner, is usually Leader of the House of Commons, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Parliamentary Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor opens and expounds to the House, these plans being accepted, modified, or rejected by the House. The amount estimated to pay the salaries and other expenses was £25,200 in 1922-23.

FIRST LORD OF THE TREASURY—

The Rt. Hon. David Lloyd George, O.M., M.P. (Prime Minister) £5,000

Private Secs. to Prime Minister, J. T. Davies, C.B.;

Staff Clerk, W. Johnson £500 to £500

TRINITY HOUSE, Tower Hill, E.C. 3.

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1534, under which "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to the Corporation of Trinity House, and until 1804 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day, the principal duty of the Corporation of Trinity House, as a Public Department, is the administration of the Lighthouse, &c. Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other marks in Scotland, Ireland, and the Channel Islands within the Commission, are also the chief Pilotage Authority in the United Kingdom, and in their capacity as a private corporation or guild they administer certain Charitable Trusts specifically dedicated to the relief of aged and distressed master mariners and their widows. The Acting Elder Brethren of the Corporation also sit with the Judges of the Admiralty

Division of the High Court of Justice, to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of the Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light Dues, levied on shipping using the ports of the United Kingdom. The accounts in connection with the Lighthouse Service are rendered to the Board of Trade, who have statutory control over the expenditure, and are submitted annually to Parliament. The accounts in connection with the Charitable Trusts are rendered to the Charity Commissioners. In addition to the public and trust funds which they administer, the Corporation have at their disposal certain private funds which are applied to the maintenance of their house on Tower Hill and to other corporate purposes. The Master of the Corporation at the present time is His Royal Highness the Duke of Connaught and Strathearn, K.G. There are ten Acting Elder Brethren, one of whom is a retired officer of the Royal Navy and the other nine are retired Commanders of the Mercantile Marine, and besides three Elder Brethren who have retired from the Active List there are a number of Honorary Elder Brethren, including His Majesty The King and other members of the Royal Family. The ten Acting Elder Brethren, one of whom always is Deputy Master, form the Board which carries out the public and corporate duties of the Trinity House.

ELDER BROTHERS.

H.M. The King; Master, Field-Marshal H.R.H. the Duke of Connaught and Strathearn, K.G.; Deputy Master, Capt. Sir H. Acton Blake, K.C.M.G., K.C.V.O.; Elder Brethren, H.M. The King; Rt. Hon. Vice-Chairman, Sir Edward Brabrook, C.B.

Secretary, W. S. Cameron.

UNEMPLOYMENT INSURANCE,

Office of the Unemployment, 47 Victoria Street, S.W. 1.

Unemployment, W. B. Yates £1,500
Registrar, C. F. Bickerdike £500

UNIVERSITY GRANTS COMMITTEE.

Storey's Gate, Westminster, S.W. 2.

The Committee was appointed by the Chancellor of Exchequer in July, 1920, to advise the Government as to the application of grants made by Parliament towards meeting the needs of University Education in the United Kingdom.

There has been a large increase in the number of University Students since the war of 1914-1918. Excluding the Universities of Oxford and Cambridge,

Trinity College, Dublin, and Guy's Hospital Medical School, which are not in receipt of annual grant aid, and also those institutions receiving grant for the first time in 1920-21, the figures for full time students compare as follows with those of 1913-14:-

	1913-14	1920-21
England	5,392	19,809
Wales	5,392	2,473
Scotland	4,429	20,000
Ireland	3,777	3,130

United Kingdom.....22,324 35,412
The increase is mainly due to the presence of ex-Service students. In the session 1920-21 there were nearly 17,000 ex-Service students in attendance at University institutions in the United Kingdom. Of these, rather more than 11,000 were attending institutions covered by the table.

Chairman, Sir William McCormick.

Other Members, William Bateson, F.R.S.; Sir Dugald Clerk, K.B.E., F.R.S.; Sir J. J. Dobble, F.R.S.; Miss S. M. Fry; Sir Wilmot Herringham, K.C.M.G., C.B.; Sir F. G. Kenyon, K.C.B.; Sir Stanley Leathes, K.C.B.; Sir J. J. Thomson, C.M., F.R.S.

Secretary, W. R. Buchanan Riddell.

VOLUNTARY HOSPITALS COMMISSION.

Ministry of Health, Whitehall, S.W. 1.

Appointed July, 1921.

IMPERIAL WAR MUSEUM,

Crystal Palace, S.W. 19.

Curator and Secretary, Charles Foulkes, F.S.A. £700

WOODS, FORESTS, AND LAND REVENUES,

Whitehall, S.W. 1.

Administrative expenses, 1922-23, £48,000.

THE CROWN LANDS.—The Land Revenues of the Crown in the United Kingdom have been collected on the public account since 1760, when George III. surrendered them in return for a fixed annual payment or *Civil List*. At the time of the surrender the gross revenues amounted to about £60,000, and the net return to about £12,000.

In the year ended March 31, 1923, the total Receipts by the Commissioners were £1,576,297, of which amount £43,029 was derived from Crown Rents, £73,821 from Windsor Park and Woods, £208,094 from Royal Forests and Woodlands, and £59,500 from the Mines. The Expenditure was £549,234. The sum of £66,000 was paid to the Exchequer in 1922-23 as *Surplus Revenue*, being a net sum from which no deductions have to be made for administration.

Commissioners, The Minister of Agriculture and Fisheries, ex-officio, *unp.*; Sir Geo. Granville Leveson Gower, K.C.B. £1,500

The Revenue departments all show increases:

	1902-03.	1901-02.
Customs and Excise	5,543,372	5,675,900
Inland Revenue	7,307,080	8,054,750
Post Office	60,570,122	67,765,287

Totals

GROWTH OF GOVERNMENT SALARIES.

The average monthly payments for salaries and bonus in the Government offices in 1901 and 1902-03 respectively, are shown in the following table:—

	1902-03.	1901-02.	
	Salaries.	Salaries.	Bonus.
Admiralty	28,663	113,834	40,666
Agriculture and Fisheries	9,700	33,000	20,700
Colonial Office	4,839	7,640	4,800
Education	22,220	44,301	33,841
Food Department	—	44,000	—
Home Office	15,800	39,000	25,200
India Office	8,400	27,400	7,000
Irish Office	2,000	5,000	1,500
Labour	—	390,000	284,000
Museums	6,500	9,807	7,493
Post Office	1,348,000	1,798,000	2,603,000
Scottish Office	1,251	1,617	1,570
Trade	26,974	66,100	22,400
Transport	—	19,400	9,400
War Office	66,100	203,300	44,300
Works, Office of	12,000	37,500	27,500

PAYMENT OF MEMBERS.

The payments to Members of the Legislatures of various countries are shown in the following table:—

Australia, £1,000 per annum.* ⁶
Canada, \$4,000 per session.* ⁶
France, 27,000 francs per annum.* ⁷
Germany, 12,000 marks per annum.*
Great Britain, £400 per annum.
Italy, 15,000 lire per annum (Lower House).*
New Zealand, Upper House £350, Lower House £500 per annum.* ⁶
South Africa, £400 per annum.* ⁶
Sweden, 3,500 kroner per annum.*
United States, \$7,500 per annum.*

JUDICIAL STATISTICS.

Appellate proceedings fell from 1,508 in 1902 to 1,005 in 1903, and 1,206 in 1904. In the High Court of Justice the proceedings began numbered in 1903 42,302, and in 1904 60,130, the figures for 1904 being 80 per cent. more than in 1903. The greater part of the increase occurred in the King's Bench Division, in which proceedings began increased from 33,781 in 1903 to 47,590 in 1904. In the Chancery Division the figures increased from 4,771 to 5,636.

A large proportion of the actions and suits instituted are terminated without trial. In the King's Bench Division out of about 40,000 actions commenced in 1904 judgment was signed in 10,420 cases in default of appearance or other default by the defendant, and in 2,684 cases there were summary judgments for plaintiff without trial. About 25,000 cases were settled out of court, and in only 2,128 cases were actions set down for trial. The distribution between the different Assize Towns of the actions for trial on Circuit is very unequal. Out of the 831 actions no less than 576, or 68 per cent., were set down for trial at only five of the Assize Towns, namely, Manchester (225), Birmingham (128), Leeds (100), Liverpool (82), and Cardiff (41). The only other Assize Town with twenty or more actions for trial was Lewes (22). At thirty-three Assize Towns there were not more than five actions for trial, including seven towns at which there was none.

CRIMINAL STATISTICS.

A further increase in crime is recorded in the year 1902-03, although the figures still bear no relation to the conditions of pre-war years. Following a steady decline during the continuance of hostilities, the number of persons imprisoned rose by 11,034 to a total of 39,787 in 1902-03, and in 1903-04 there was a further increase of 9,925 to an aggregate of 49,712.

	Average for five years ended—	On indictment.	Convicted summarily.	Total convictions.
1903-04	7,702	189,308	167,122	
1902-03	9,081	177,488	186,569	
1913-14	8,762	150,000	158,782	
1918-19	3,770	49,208	53,068	
Year 1902-03	5,128	30,891	36,019	
" 1903-04	5,418	38,498	43,916	

* With allowances for travelling in addition.

† Compulsory contributions to Widows and Orphans Fund.

‡ Deductions for non-attendance.

COST OF ADMINISTRATION.

The aggregate cost of the Administration of Law and Justice for the year ending March 31, 1922, is £24,707,486, as compared with £14,707,486 for the year ended March 31, 1920, an increase of £10,000,000.

Vice-President, Maj.-Gen. Sir G. F. Ellison, k.c.m.g., c.n.
General Manager, J. C. Goff.
General Secretary, E. H. Cherry.

Greenwich Hospital Department.

34 Old Queen Street, S.W. 1.

The total estimated income of Greenwich Hospital for 1913-14 is £448,379, as compared with £436,823 last year. To this figure is added £5,000, being the balance available from surplus income in the previous year for transfer to Navy votes towards the cost of providing age and increased age pensions. The total estimated expenditure is £450,251, as against £441,229 in the previous year, leaving a surplus income of £1,228. Of the total figure it is estimated that £130,378 will be spent on Greenwich Hospital pensions to seamen and marines, including Greenwich Hospital Canada pensions, pensions to widows and the education of children, and £79,982 will be devoted to the Royal Hospital School.

Director, A. W. Smallwood, c.n.e. £1,200

NOTE.—Except where otherwise shown, Naval and Marine Officers at the Admiralty are in receipt of Naval Pay-allowance.

LIGHTHOUSES AND PILOTAGE.

In 1912-13 the receipts of the General Lighthouse Fund were £705,734, made up of £448,283 Light Dues collected and £257,451 Government grant; the expenditure was £754,054, principally upon maintenance of Lighthouses (£107,946), of Lightships (£147,721) and of Steam Vessels (£147,764). The Pilotage Receipts were £668,095 in 1913 (latest return) made up principally of £668,535 from Pilotage Rates. The Expenditure in 1913 was £700,281, of which £597,882 was paid to Pilots and £102,399 to Pilots' Benefit Fund.

FLAG OFFICERS OF THE ROYAL NAVY (ACTIVE LIST).

Admirals of the Fleet.

Viscount Jellicoe of Scapa, G.C.B., G.M., G.C.V.O., LL.D. Governor-General of New Zealand (born 1859)	April 3, 1899

THE NAVY ESTIMATES, 1921-22.

£82,479,000 net; Decrease on 1920-21, £8,500,000.

The Navy Estimates for the financial year 1921-22 provide for a gross sum of £91,286,866 and a net sum of £82,479,000 as compared with £90,872,300 net in the year 1920-21. Provision is made for 121,700 officers and men instead of 127,500 in 1920-21.

Four new vessels are to be laid down, and the cost of each vessel will probably be about £8,000,000, as compared with £6,000,000 in the case of *H.M.S. Hood*. Though the expenditure is larger, the size of these four vessels will be restricted, so as not to involve the country in heavy outlay on the provision of larger docks—stationary or floating—than are now available.

Of the ships begun during the Great War, four light cruisers, four destroyers, one submarine, two aircraft-carriers, and a hospital ship will be completed in the ensuing financial year.

The number of capital ships in full commission, which was thirty-eight at the opening of

the War, is reduced to sixteen; one flotilla of destroyers now with the Atlantic Fleet is placed in reserve; one light cruiser each is withdrawn from the North American and South African Squadrons, and the South American Squadron is temporarily abolished. In spite of the reduced strength at sea, fuel and lubricating oils are estimated to cost £20,350,000.

Apart from the battle cruisers *Australia* and *New Zealand*, no capital ships mounting 12-inch guns are to be retained in the effective fleet of the Empire, which will comprise only vessels carrying the 13.5-inch or 15-inch gun. The *New Zealand* and *Australia* are already in reserve.

The *Laurentic* was sunk off the coast of Ireland during the War while carrying to Canada gold to the value of £4,996,378. When the accounts for 1922-23 were closed £1,320,568 had been recovered. The expenses amounted to £1,014.

SHIPS OF THE ROYAL NAVY (July 4, 1921).

(Including the Royal Australian, New Zealand, and Canadian Navies.)

Arranged in their various classes.

Battleships.

Type. Ships of Type.
Queen Elizabeth.—Malaya, Barham, Vallant, Warspite, Queen Elizabeth.
Turkish.—Erin.
Royal Sovereign.—Royal Sovereign, Royal Oak, Revenge, Resolution, Ramillies.
King George V.—Ajax, Centurion, King George V.
Orion.—Conqueror, Thunderer, Monarch, Orion.
Iron Duke.—Emperor of India, Banbow, Marlborough, Iron Duke.
Colossus.—Hercules, Colossus.
Neptune.—Neptune.
St. Vincent.—Collingwood, St. Vincent.
Hellerophon.—Temeraire.

Battle Cruisers.

Super-Hood.—Four building.
Hood.—Hood.
Queen Mary.—Tiger.
Lion.—Princess Royal, Lion.
Indefatigable.—Australia, New Zealand.
Renown.—Repulse, Renown.

Cruisers.

Courageous.—Courageous, Glorious.
Devonshire.—Antrim
"E".—Emerald, Enterprise, Adelaide.
"D".—Delhi, Dunedin, Danao, Dauntless, Dragon, Durban, Despatch, Diomed.
Birmingham.—Hawkins, Vindictive, Effingham, Fro-bisher, Raleigh.
Carlisle.—Cairo, Calcutta, Carlisle, Colombo, Capetown.
Ceres.—Cardiff, Coventry, Curlew, Ceres, Curaçoa.
Caledon.—Caledon, Calypso, Curadoc.
Centaur.—Concord, Centaur.
Gambrian.—Cambrian, Canterbury, Constance, Castor, Champion, Calliope.
Caroline.—Comus, Conquest, Carysfort, Cordelia, Caroline Cleopatra.
Arctura.—Royalist, Inconstant, Phaëton, Galatea, Undaunted.
Chatham.—Hirringham, Lowestoft, Southampton, Dublin, Brisbane, Sydney, Melbourne, Chatham.
Weymouth.—Yarmouth, Dartmouth, Weymouth.
Arctura.—Aurora.

Torpedo-Boat Destroyers.

Admiralty "V" 58; *Thornycroft "V"* 6; *Admiralty "S"* 54; *Thornycroft "S"* 5; *Yarrow "S"* 6; *Admiralty "MR"* 8; *Admiralty "R"* 34; *Thornycroft "R"* 6; *Yarrow "R"* 6; *Parramatta* 6; *Thornycroft "M"* 1; Total, 121.

Aircraft Carriers.

Furious, Argus, Pegasus, Ark Royal, Hermes, Eagle.

Typical Ships.

Type.	Tons.	Main Armament.
<i>Queen Elizabeth</i> (1914)	27,500	8 15-inch
<i>Turkish</i> (1914)	27,500	8 15-inch
<i>Royal Sovereign</i> (1915)	26,750	8 15-inch
<i>King George V.</i> (1912)	23,000	10 13 1/2-inch
<i>Orion</i> (1911)	22,500	10 13 1/2-inch
<i>Iron Duke</i> (1914)	25,500	10 13 1/2-inch
<i>Colossus</i>	20,000	10 12-inch
<i>Neptune</i> (1911)	19,000	10 12-inch
<i>St. Vincent</i> (1910)	19,250	10 12-inch
<i>Bellerophon</i> (1909)	18,600	10 12-inch

Battle Cruisers.

<i>Super-Hood</i> (1921)	42,000	8 16-inch
<i>Hood</i> (1918)	41,800	8 16-inch
<i>Queen Mary</i> (1914)	27,000	8 15 1/2-inch
<i>Lion</i> (1912)	26,350	8 13 1/2-inch

<i>Renown</i> (1916)	26,500	6 15-inch

Cruisers.

<i>Courageous</i> (1916)	18,600	4 15-inch
<i>Devonshire</i> (1905)	10,850	4 7 1/2-inch, 6 6-inch
<i>"E"</i> (1919)	5,560	9 6-inch
<i>"D"</i> (1918)	4,650	6 6-inch
<i>Birmingham</i> (1918)	9,750	7 7 1/2-inch
<i>Carlisle</i> (1918)	4,190	5 6-inch
<i>Ceres</i> (1917)	4,190	5 6-inch
<i>Caledon</i> (1916)	4,120	5 6-inch
<i>Centaur</i> (1916)	3,750	5 6-inch
<i>Gambrian</i> (1916)	3,750	4 6-inch
<i>Caroline</i> (1914)	3,750	4 6-inch
<i>Arctura</i> (1914)	3,500	3 6-inch
<i>Chatham</i> (1913)	5,400	8 6-inch
<i>Weymouth</i> (1911)	5,250	8 6-inch
<i>Arctura</i> (1913)	3,500	2 6-inch

Flotilla Leaders.

Admiralty type, 7; Thornycroft type, 5; *Marksmen* type, 5; total, 17.

Submarines.

"R," 6; "M," 3; "L," 38; "K," 7; "H," 23; "E," 14; "J," 6; "CH," 2, total, 92.

Sloops, various "A" type, 30.

Gunboats, 3. River Gunboats, 26.

THE AIR PROGRAMME, 1921-22.

UNITED KINGDOM:

Reserve	3 squadrons.
Co-operation with Fleet	5 squadrons.
Co-operation with Army	3 squadrons.

OVERSEAS:

Army of Occupation (Rhine)	1 squadron.
India	6 squadrons.
Iraq	6 squadrons.
Egypt	7 squadrons.
Aden	1 flight (1/2 squadron).
Mediterranean	1 squadron (seaplanes).
	1 flight (for Aircraft Carrier).

ORDER OF WAR MEDALS.

THE Army Council has given instructions that stars and medals approved for service during the Great War will be worn in the following order:—1914 Star or 1914-15 Star; British War Medal; Mercantile Marine War Medal; Victory Medal; Territorial Force War Medal; India General Service Medal (for operations against Afghanistan, 1919).

THE KING'S PRIZE.

THE King's Prize at Bialay, 1920, was won by Sergt. F. H. Morgan, Witwatersrand Rifle, with a score of 281. In 1921 the winner was Armourer-Sergt. J. Cunningham, late R.A.O.C.

NAVIES OF THE POWERS.

On July 1, 1921, there were sixteen capital ships in full commission in the United States Navy. The United States Fleet was then being redistributed, but as far as can be judged, the number for the fiscal year to July 1, 1922, will average approximately the same. Japan had eighteen capital ships in full commission. This figure did not include one battleship attached to gunnery school, nor one battle cruiser attached to torpedo school.

The figures of capital ships in commission for the British Empire were: Battleships 13, battle cruisers 3.

The number of capital ships laid down since the battle of Jutland was:—

	Built.	Building.
United States	1	...
Japan	1	...
British Empire.....	0	...

The United States battle cruiser *Ranger* is not counted as building, as she had not actually been laid down at the time.

The number of capital ships projected but not laid down, so far as was known, was: United States 1, Japan 10, British Empire 4.

BALANCE OF NAVAL POWER.

Position of the three leading Powers in capital ships in 1921 and as it will exist in 1924:—

	1921.	1924.
Great Britain	32 ships	32 ships
Displacement 808,200 tons	...	808,200 tons
Battle guns	284	284
Foot-tons energy 19,080,000	...	19,080,000
United States.....	17 ships	33 ships
Displacement 467,250 tons	...	1,117,850 tons
Battle guns.....	188	340
Foot-tons energy 11,989,176	...	28,597,176
Japan.....	11 ships	17 ships
Displacement 319,140 tons	...	543,140 tons
Battle guns.....	108	164
Foot-tons energy 7,480,000	...	13,415,400

THE WORLD'S SUBMARINES.

(May, 1921)

	Built	Building
Great Britain	92	8
U.S.A.	107	41
Brazil	3	nil
Chile	6	nil
Denmark	12	5
France.....	49	5
Germany	nil	nil
Italy	51	nil
Japan	24	15
Netherlands.....	13	2
Norway	4	2
Peru	2	2
Portugal.....	4	nil
Spain	4	6
Sweden	10	8
Russia	36	23

The British vessels exclude those earmarked for disposal, and include six Commonwealth vessels and two Dominion of Canada vessels. Four of the forty-nine French submarines have been condemned. Italy, the return for which excludes vessels earmarked for disposal, projects building four, and in the case of Russia the twenty-three in the course of construction include "one assembling, two in cases at Nikolaev, twenty Petrograd—uncertain."

WARSHIP LOSSES IN THE WAR.

The total Allied losses to the date of the Armistice (Nov. 11, 1918) are stated at 803,000 displacement tons; those of the enemy at 415,000 displacement tons. The Scapa Flow "losses" are not included in the enemy total.

Class.	U.K.	U.S.A.	France.	Italy.	Japan.	Germany.	Austria-H.
Battleships	13	—	4	3	1	1	3
Battle Cruisers.....	3	—	—	—	—	—	—
Cruisers	25	1	5	2	4	24	2
Monitors	0	—	—	1	—	—	3
Destroyers	64	2	14	10	3	72	5
Torpedo Boats.....	10	—	8	5	—	51	4
Submarines	59	1	14	8	—	216	8
Small Craft	27	—	9	—	—	—	—

* Exclusive of the "High Seas Fleet" scuttled in Scapa Flow, June 21, 1919.

NAVAL CASUALTIES IN THE WAR.

Casualties to all ranks of Royal Navy and Royal Naval Reserve, including Mercantile Marine Reserve while serving in H.M. ships and merchant ships, but excluding casualties of the Royal Naval Division and British Mercantile Marine losses:—

	Officers.	Men.
Killed in action or died of wounds	2,074	20,735
Died	400	11,433
Wounded in action	549	3,961
Injured	256	392
Missing	—	2
Prisoners of War.....	211	824
Interned	51	170

Total

The Army.

THE WAR OFFICE.

Whitehall, S.W. 1.

The business of the War Office proper appears to have been originally entrusted, about 1800, to a Committee of the Privy Council; the Clerk in attendance on that Committee being the Secretary at War. The Secretary at War had immense power in military matters, as holding the purse; but neither the Commander-in-Chief nor the Board of Ordnance was subject to him. In 1794, a Secretory of State was first appointed. The Office of Secretary at War was not terminated at this date, but, from 1805, it was amalgamated with that of Secretary of State for War until, in 1802, it was formally abolished by Act of Parliament.

In 1802, the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1804 by the appointment of a Secretary of State for the Colonies.

In 1805, the Commissariat Office, which was only a semi-military branch of the Army with headquarters at the Treasury, was transferred to the War Department; the Board of Ordnance was abolished, after an existence

of more than three centuries; and the Board of General Officers and the Army Medical Department were also successively absorbed into the War Department. The year 1870 witnessed the final welding into one War Office of the civil administrative functions of the Secretary of State and the military administrative functions hitherto exercised at the Horse Guards. In that year, the War Office Act vested the direct and immediate control of every branch of Army administration in the Secretary of State. Before the appointment of a Secretary of State, the military control of the Army was, to a very great extent, in the hands of the Commander-in-Chief, who was subordinated to the Secretary of State from 1805 until the abolition of the Office in 1904. In 1904, an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. Statutory powers were transferred by the Army (Annual) Act of 1909 (9 Edw. VII. C. 3).

The Army Council, War Office, Whitehall, S.W. 1.

Secretary of State for War (President of the Army Council), The Right Hon. Sir Laming Worthington-Evans, Bart., M.P.

Principal Private Secretary, Kenneth Lyon, O.B.E.; *Personal Private Secretary*, E. Allden

Assistant do., E. B. B. Speed, M.C.

Parliamentary do., Capt. D. H. Hacking, O.B.E., M.P.

Military Secretary, Lt.-Gen. Sir A. J. Godley, K.C.B., K.C.M.G.

Under-Secretary of State (Vice-President), Lt.-Col. Sir Robert A. Sanders, Bart., T.D., M.P.

Chief of the Imperial General Staff, Field-Marshal Sir H. H. Wilson, Bart., O.C.B., D.S.O.

Adjutant-General to the Forces, Lt.-Gen. Sir G. M. W. Maodonogh, K.C.B., K.C.M.G.

Quarter-Master-General to the Forces, Lt.-Gen. Sir T. E. Clarke, K.C.B., K.C.M.G.

Master-General of the Ordnance, Lt.-Gen. Sir J. F. Du Cane, K.C.B.

Deputy Chief of the Imperial General Staff, Lt.-Gen. Sir P. W. Chetwode, Bart., K.C.B., K.C.M.G., D.S.O.

Parliamentary & Financial Secretary, Lt.-Col. Hon. G. F. Stanley, C.M.G., M.P.

Joint Secretary of the War Office (Secretary of the Army Council), Sir H. J. Creed, K.C.B., C.V.O.

THE REGULAR ARMY.

The Regular Army consists of the following units:—

Cavalry.

Household Cavalry.—1st and 2nd Life Guards and the Royal Horse Guards ("The Blues").
Cavalry of the Line.—1st, 2nd, 3rd, 4th, 5th, 6th and 7th Dragoon Guards; 1st and 2nd Dragoons; 3rd, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th and 16th Hussars; 9th, 10th, 11th, 12th and 13th Lancers; and 6th Dragoons.

Royal Regiment of Artillery.

Royal Horse Artillery.—Batteries, distinguished by letters.

Royal Field Artillery.—Batteries, distinguished by numbers.

Royal Garrison Artillery.—Companies, distinguished by numbers.

Corps of Royal Engineers.

The Corps consists of Electric, Field, Fortress, Postal, Printing, Railway, Signal and Survey Companies, Bridging Train, etc.

Infantry Regiments.

The Foot Guards.—The Grenadier Guards (3 Battalions); the Coldstream Guards (3 Battalions); the Scots Guards (2 Battalions); the Irish Guards (2 Battalions); the Welch Guards (1 Battalion).

Line Regiments.—49 English Regiments (2 Battalions each, except the Worcestershire Regt., the King's Royal Rifle Corps, the Middlesex Regt., the Rifle Brigade, and the Royal Fusiliers, which each have 4 Battalions); 3 Welch Regiments (2 Battalions each); 10 Scottish (5 Highland and 5 Lowland) Regiments (2 Battalions each); and 8 Irish Regiments (2 Battalions each); with the West India Regiment (2 Battalions) and the West Africa Regiment (1 Battalion).

The Machine Gun Corps.

Alexandra Palace, Wood Green, N. 22.

Consisting of Infantry, Cavalry, and Motor Units

The Tank Corps.

Alexandra Palace, Wood Green, N. 22.

The Labour Corps.

Wheeler Gate, Nottingham.

The Royal Army Service Corps.

Woolwich Dockyard.

The Royal Army Medical Corps.

Crookham Camp, Aldershot.

The Army Dental Corps.

Woking.

The Royal Army Ordnance Corps.

Red Barracks, Woolwich.

The Royal Army Veterinary Corps.

Imperial House, Tothill Street, Westminster, S.W. 1.

The Royal Army Chaplains' Department.

War Office, S.W. 1.

Queen Alexandra's Imperial Military

Nursing Service.

Under the Presidency of Queen Alexandra.

The Royal Army Pay Corps.

War Office, S.W. 1.

The Army Educational Corps.

War Office, S.W. 1.

Corps of Military Accountants.

War Office, S.W. 1.

THE ROYAL MARINES.

The Royal Marines (raised in 1664) consist of the Royal Marine Artillery and the Royal Marine Light Infantry. The force appears in the official Navy List as well as in the official Army List, but it is administered solely by the Admiralty. In the table of precedence in the Army the Royal Marine Light Infantry ranks between the Royal Berkshire Regt. (the 49th Foot) and the Royal West Kent Regt. (the 50th Foot).

THE AUXILIARY FORCES.**THE MILITIA.**

In 1907 the "Old Constitutional Force" known as the "Militia" was transformed into the "Special Reserve," but the following Militia units were retained:—The Royal Malta Artillery, the Bermuda Militia Artillery, the Channel Islands Militia, and the Malta Militia. In 1921 terms "Special Reserve (and Extra Reserve) Battalions" were abolished, and "Militia" restored. The force now comprises the following units:—

Cavalry.—3 Regiments (N. and S. Irish Horse and King Edward's Horse)

Artillery.—R.F.A. and R.G.A.

Royal Engineers.—All branches.

Infantry.—The 3rd Battalions of Infantry Regiments of the Line (with the exception of the 4-battalion regiments noted above, where the Militia Bn. is the 5th), and in some cases the battalion next in numerical order is specially retained as Militia.

THE TERRITORIAL ARMY.

In 1907 the "Yeomanry" and the "Volunteers" were transferred into the Territorial Force, which included English, Welsh, and Scottish Cavalry; Royal Horse, Royal Field, and Royal Garrison Artillery; Royal Engineers; Infantry; Royal Army Service Corps and Royal Army Medical Corps. In 1921 the title was changed to "Territorial Army."

STRENGTH OF THE ARMY.

Army Estimates of the effective and non-effective services for 1921-22 show the number of men on the Establishment of the Army, exclusive of India, at 341,000, but in the course of the financial year 1921-22 this number is expected to fall to about 235,000, including Colonial and Native Indian troops serving outside India.

This figure compares with 225,000 in 1920-21.

Including permanent staff, the regimental establishment of the *Territorial Army* numbers 218,433 of all ranks, distributed as under:—

<i>Cavalry</i>	7,957	Tank Corps.....	980
<i>Artillery</i>	39,448	R.A.S.C.....	5,901
<i>Engineers</i> ...	9,064	R.A.M.C.....	10,080
<i>Signals</i>	8,530	R.A.O.C.....	782
<i>Infantry</i>	134,710	R.A.V.C.....	92

On July 16, 1921, the actual strength of the Territorial Army was 6,652 officers and 703,734 other ranks. The number of recruits enlisted from April 9 to July 16 was 27,380; and, in addition, of the 22,306 Territorials who were discharged on their enlistment into the Defence Force, 12,661 had rejoined the ranks. The Territorial Army was thus 5,230 stronger than when the Defence Force was formed on April 8, 1921, for the "special emergency" arising out of the coal stoppage.

DISTRIBUTION OF THE FORCES.

The approximate distribution of the British Army on April 1, 1921, was as follows:—

Home	140,523
Colonies	12,290
Rhine and Plebiscitary Areas... ..	14,200
Constantinople.....	4,300
Egypt	10,300
Palestine.....	4,500
Iraq (Mesopotamia)	14,300

In addition, there were 62,600 Colonial and native Indian troops in Mesopotamia, 3,200 in Palestine, 7,730 in Egypt, and 5,050 in Constantinople.

COST OF THE ARMY.

The anticipated net expenditure is £106,315,000, and the total establishment provided for is 341,000 officers and men:—

Maintenance of standing Army:

Home and abroad, except Middle East	£40,570,100
Middle East	19,781,500
Territorial and Reserve Forces	9,396,000
Educational establishments and hospital depôts	14,072,400
War Office, staff of commands, &c. . .	4,149,900
Terminal and miscellaneous charges and receipts.....	15,416,850
Half-pay, retired pay, pensions, and civil superannuation	6,777,700

In respect of the forces abroad the total sums provided are: The Rhine, £3,124,700 (recoverable from Germany); Constantinople, £3,117,000; Egypt, £5,944,100; Palestine, £4,219,200; Iraq (Mesopotamia), £2,398,700.

To meet the cost of the Army Reserve £1,387,000 is provided. It is estimated that the maximum number of Reservists drawing pay as such in 1921-22 will be 86,000. The maximum strength of the Territorial Army is put at 210,000 officers and men (exclusive of permanent staff), against 233,000 last year. The net estimated cost is £7,573,300, made up as follows:—

Permanent staff	£1,135,100
Grants to county associations	1,106,000
Buildings and ranges	421,000
Cost of training.....	2,050,800
Bounties, &c.....	599,000
Miscellaneous charges	2,271,550

THE ARMY AND THE WAR.

The total number of men recruited in the three kingdoms from Aug. 4, 1914, to Nov. 11, 1918, was 4,970,902. The contributions of the various countries and the percentage of enlistments to population were as under:—

	Numbers Recruited	Percentage of Total Popul'n.	Male Popul'n.
England	4,006,158	11 '57	24 '04
Wales	272,924	10 '96	21 '52
Scotland	557,618	11 '50	23 '71
Ireland	134,202	3 '07	6 '14

The number of men granted exemption was 2,741,988, of whom 2,169,707 were classed as in reserved occupations.

At Oct. 1, 1918, the aggregate strength of the Army, including the Territorial Force, but exclusive of Dominion and Indian troops, was 3,836,265, of whom 147,736 were officers. The maximum strength was attained at the beginning of 1918, when the total stood at 3,387,649—154,777 officers and 3,232,872 other ranks.

The distribution of the Army on Oct. 1, 1918, was as follows:—

	All ranks.		All ranks.
Home	1,427,069	Egypt.....	199,842
Colonies	16,995	Mesopotamia	111,283
India	83,878	Russia	3,547
France	1,763,980	East Africa ...	8,737
Italy	73,735		
Salonica	149,189		

Total strength 3,836,265

Casualties in all theatres of operations from Aug. 14, 1914, to Sept. 30, 1919, totalled 2,471,152.

	Officers.	Other ranks.
Killed	33,337	540,170
Wounded	74,082	1,569,387
Missing	9,362	244,814

Totals

Of the last category, 5,215 officers and 149,093 men, reported as prisoners of war, were released.

WAR CASUALTIES.**ALLIES AND ENEMIES.**

Mr. Austen Chamberlain stated in the House of Commons on May 4, 1921, that the following were the approximate number of casualties suffered by the combatants in the Great War:—

British Empire.

	Deaths.	Wounded.
Great Britain	743,702	1,693,262
Canada	56,625	149,732
Australia	59,330	122,171
New Zealand	16,136	40,729
South Africa, Newfoundland and Colonies	8,822	15,153
Total, Dominions	140,923	357,785
India	61,398	70,859

Total, British Empire 946,023

Allied and Associated Countries.

	Deaths.	Wounded.
France	1,385,300	No record
Belgium	38,172	44,686
Italy	460,000	947,000
Portugal	7,222	13,751
Rumania	335,706	No record
Serbia.....	127,535	133,148
U.S.A.	115,660	205,690

'Enemy Countries.

Germany	2,050,466	4,202,028
Austria-Hungary	1,200,000	3,620,000
Bulgaria	101,224	152,400
Turkey	300,000	570,000

WAR MEDALS.

The total number of war medals issued during the period July 24, 1919, to Sept. 5, 1921, are as follows:—

1914 Star.—Officers, 17,050; other ranks, 331,000.

1914-15 Star.—Officers, 31,600; other ranks, 1,224,000; Dominions, 275,000.

British War Medal.—Officers, 50,000; other ranks, 2,037,000; Dominions, 760,000.

Victory Medal.—Officers, 50,000; other ranks, 1,048,000; Dominions, 396,000.

Totals: 1914 Star, 348,000; 1914-15 Star, 1,530,600; British War Medal, 2,847,000; Victory Medal, 2,394,000.

The War Office Medals Branch (A.G.10) is at 27, Pilgrim-street, London, E.C. 4.

GENERAL OFFICERS OF THE ARMY.

(Active List.)

Field Marshals.

H.R.H. the Duke of Connaught and Strathearn, K.O., K.T., K.P., G.C.B., G.C.M.G., G.C.I.E., G.C.V.O., G.R.E., Colonel Grenadier Gds. and R.A.S.C., and Colonel-in-Chief The Inniskillings, H.L.L., R. Dub. Fus. Rifle Brig. and R.A.M.C., Personal A.D.C. to the King	June 26, 1909
Rt. Hon. Lord Grenfell, G.C.B., G.C.M.G., Col. Comdt. K.R.R.C.	April 11, 1903
Rt. Hon. Lord Methuen, G.C.B., G.C.M.G., G.C.V.O., Col. Scots Gds. (Constable of the Tower of London)	June 19, 1911

F. C. Halahan, C.M.G., D.S.O., M.V.O. Jan. 1, 1921. Aug. 1, 1919

METEOROLOGICAL OFFICE.

The Meteorological Office was established as a Department of the Board of Trade in 1854. Changes have been made from time to time in the management, and in 1919 the Office was attached to the Air Ministry. The control is vested in a Director and Committee appointed by the Air Council. The Executive Committee of the Royal Society is an Advisory Committee for geophysical subjects. The work of the Office includes:—The collection and discussion of meteorological observations from oceans and land areas all over the world; the maintenance of a number of stations for daily telegraphic reports upon which gale warnings and forecasts are based; the maintenance of observatories for the study of weather, with which are associated other geophysical subjects; and the maintenance of stations in various parts of the country for the supply of meteorological information and other requirements of aircraft. The responsibility for the work of the British Rainfall Organisation was transferred to the Meteorological Office in July, 1919.

President of Committee, Maj.-Gen. Sir F. H. Sykes,
C.B.E., K.C.B., C.M.A. (Member of Air Council, Con-
troller-General of Civil Aviation).

Director of Meteorological Office, G. C. Simpson, C.B.E.,
D.S.C., F.R.S.

Assistant Directors, Dr C. Chree, F.R.S. (Observatories);
R. G. K. Lempfert, C.B.E., M.A. (Contributive
Stations), Lt.-Col. E. Gold, D.S.O., F.R.S. (Forecast).

Superintendents, Commr. L. A. Brooke-Smith, R.D.,
R.N.W. (Marine), J. S. Dines, M.A. (Forecast); Maj.
A. H. R. Goldie, M.A. (Local Centres); Capt. D.

Bruent, M.A. (Army); F. J. W. Whipple, M.A.
(Statistics); R. Corless, O.B.E., M.A. (Instruments);
M. de C. Salter (British Rainfall Organisation);

Commr. L. G. Carbett, R.N. (Navy).
Secretary of Advisory Committee on Atmospheric
Pollution, J. S. Owens, M.D., A.M.I.C.E.

Superintendents of Observatories.

Central (Ken), Dr C. Chree, F.R.S.
Magnetic (Eskdalemuir), A. Clifton Mitchell, D.S.C.,
F.R.S.E.

Western (Valencia, Co. Kerry), L. H. G. Dines, M.A.,
A.M.I.C.E.

Aerological (Benson, Oxon), W. H. Dines, F.R.S.

CIVIL AVIATION.

RETURNS supplied voluntarily by civil aerial
transport firms in the United Kingdom for the
year 1920 show that for Great Britain and on the
Continental route 26,803 flights were made,
and 11,534 machine hours were flown, the mile-
age totalling approximately 958,000. The number
of passengers carried was 42,296, and the weight
of goods carried amounted to 136 tons. During
this period 163 pilots were licensed and 194
aircraft were registered.

The following figures show the proportion of
accidents over the whole period:

Total accidents reported	30
Approximate number of machine miles flown per accident	31,900
Approximate number of machine flights per accident	893
Approximate number of machine hours flown per accident	354

During the period under review four pilots
were killed and eight injured, and ten passengers
were killed and six injured. A third party was
injured by being struck by a propeller.

The Church of England.

The sums appended to the various offices are the full incomes derivable from the estates and revenues of the Church. The Deans and Chapters of certain Dioceses (marked * in the following pages) preferred several years ago to retain in lieu of fixed annual money payments, estates estimated at that time to produce the same annual income. VOLUNTARY OFFERINGS OF THE CLERGY. — In the year ended Dec. 31, 1929, the sum of £50,732,428 was contributed for Church work, the sum of £5,498,464 being for General Purposes and £5,339,994 for Parochial Purposes.

MEMBERS OF CONVOCATION.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop.

The Right Rev. the Lords Bishops of Bath and Wells; Birmingham; Bristol; Chelmsford; Chichester; Coventry; Ely; Exeter; Gloucester; Hereford; Lichfield; Lincoln; London; Norwich; Oxford; Peterborough; Rochester; St. Albans; St. Edmundsbury and Ipswich; Salisbury; Southwark; Southwell; Truro; Winchester; Worcester.

Registrar, F. H. Lee.

Apparitor-General, H. T. A. Dashwood.

THE BOYS' BRIGADE. (Incorporated.)

THE senior boys' organisation; founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of military and religious training. Every Company is connected with a Church or other Christian body. Many of the Battalions and Companies are now recognised as Cadet Units. The total strength is 60,000 officers and boys. *Sec., R. S. Peacock, 34 Paternoster Row, E.C. 4.*

CHURCH LADS' BRIGADE.

An appendage of the religious influence of the Parish Church; was founded in 1891, and combines a military organisation with moral and religious instruction. It is estimated that 500,000 lads have had the advantage of the Brigade's training, and to-day there are 2,327 Companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters, Aldwych House, Catherine Street, W.C.2. Brigade Chaplain and Secretary, Rev. Edgar Rogers, M.A.*

Lower House.

Prolocutor, Rt. Rev. Bishop Ryle, D.D., Dean of Westminster.

The Very Rev. the Deans; the Venerable the Archdeacons; and the Elected Proctors.

Actuary, Guy Bowman.

PROVINCE OF YORK.—Upper House.

President.—The Most Rev. the Lord Archbishop.

The Right Rev. the Lords Bishops of Bradford; Carlisle; Chester; Durham; Liverpool; Manchester; Newcastle; Ripon; Sheffield; Sodor and Man; Wakefield.

Lower House.

Prolocutor, Rt. Rev. the Bishop of Beverley, D.D.

The Very Reverend the Deans of the Province; two Archdeacons from each Diocese, and the Elected Proctors. **Registrar,** A. V. Hudson.

BOY SCOUTS. (Incorporated.)

A Movement initiated and organised by Lieut.-General Sir Robert Baden-Powell, Bart., K.C.B., K.C.V.O., Chief Scout, to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance; inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene.

During the War some 100,000 Boy Scouts were employed on war work, over 100,000 joined the Colours, and a continuous service of coast-watching under the Admiralty was maintained. The Movement has taken root in all parts of the British Empire, and nearly every other country has adopted it.—*Imperial Headquarters, 25 Buckingham Palace Road, S.W. 2.*

ST. PATRICK'S NATIONAL CATHEDRAL, DUBLIN.

Dean and Ordinary, Very Rev. Charles Thomas Ovenden, D.D.

GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. L. A. Pooler, D.D.; J. A. Maconchy; Major E. H. C. Wellesley.

Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), A. F. Maude,

52 St. Stephen's Green E., Dublin; Asst. Sec. Canon R. A. Kernan B.D.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, as one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 23 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a Board of Nomination, consisting of 7 persons, viz.:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on 31 Dec., 1920, was only £102,073, charged with annuities to 40 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £9,787,357, made up of Commutation £102,073, Parochial Sustentation £7,002,341, Episcopal Sustentation £563,685, General Synod Funds £593,765, and Miscellaneous purposes £1,627,566.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £8,818,065. The interest of the Diocesan and Parochial Sustentation Fund is approximately £347,000. The total amount of assessment for stipend paid by parishes, 1920, was £116,104, and the total amount paid for stipends under Diocesan Schemes was £319,676.

The number of members of the Church of Ireland, by the Census of 1921, was 524,375, or 12.0 per cent. of the entire population.

The Church of Scotland.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the Universities and Royal Burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 Synods and 84 Presbyteries, and there are about 1,825 ministers and licentiates engaged in ministerial work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland; the number of communicants at the close of 1920 was 739,251. The sum of £601,058 was raised in 1920 for church and missionary purposes. Within the last 50 years 500 chapels, at a cost of over £1,830,000, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,457. There are in addition 248 churches and mission stations, in all of which worship is regularly conducted.

Until 1560 the Church of Scotland was Roman Catholic, but in that year the Scots Parliament abolished the jurisdiction of the Pope, proscribed the Mass, and ratified a Confession of Faith drawn up by John Knox and other divines. In it all essential articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature, and should be altered when they began to foster superstition. The *First Book of Discipline*, published in 1560, abolished the imposition of hands in the ordination of the clergy, but

superintendents were appointed to appoint ministers and to plant and erect kirks. The Church, so reformed, was governed by a General Assembly composed of the Superintendents, ministers, and lay commissioners. A *Second Book of Discipline* was sanctioned by the Scots Parliament in 1581. Presbytery was settled in 1590. The restoration of the rights of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1620, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI. alarmed the people, and the attempt of Charles I. to impose on the Church a Book of Canons and a Liturgy was met by the *National Covenant* and the restoration of Presbyterian forms, which culminated in the *Westminster Confession of Faith* in 1646. At the Restoration the Church again became Episcopal, but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. ii.) the Church of Scotland was secured in its Presbyterian form, and the very first official act of a sovereign of the British Empire on his accession is to take an oath to maintain inviolably this settlement. In 1921 Parliament passed the *Church of Scotland Act, 1921*, to declare the lawfulness of certain articles declaratory of the constitution of the Church of Scotland. The articles have been framed with a view to facilitating union among Presbyterian Churches in Scotland.

LORD HIGH COMMISSIONER, The Duke of Sutherland.

MODERATOR (1922), Rev. John Smith, D.D., Partick.

Principal Clerk, Rev. David Paul, D.D., Edinburgh.

Depute Clerk, Rev. J. A. McClymont, O.B.E., D.D.

Procurator, Hon. Wm. Watson, K.C.

Agent, A. L. Menzies, W.S., 54 Castle St., Edinburgh.

Parliamentary Solicitor, A. H. Spens, London.

OTHER PRESBYTERIAN CHURCHES.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 64 Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1920, there were 1,484 congregations and 45 preaching stations. The total membership was 520,680, and there were 2,058 Sunday Schools, with 127,622 scholars and 22,130 teachers. In 15 Foreign Mission Fields there are 382 European Mission Agents and 5,917 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £1,455,222.—*Moderator* (1921-2), Rev. Dr. Philip.—*Offices*, 221 George Street, Edinburgh; and 232 St. Vincent Street, Glasgow.

(2) *The Presbyterian Church in Ireland*.—According to the Census of 1911, the members of the various Presbyterian churches in Ireland were 429,876. The largest of these, under the superintendence of the General Assembly, consists of 36 presbyteries, 615 ministers, 561 congregations, with 205,462 communicants, 91,071 families, 7,099

Sabbath-school teachers, and 99,993 scholars. During the year 1920-21 this branch contributed by congregational effort £382,177 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £473,829. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 13 professors and 2 lecturers, and has 35 ministerial with 3 medical missionaries in foreign parts.—*Moderator*, Rt. Rev. W. J. Lowe, D.D., Belfast. *General Secretary*, Rev. J. H. Morton, M.A., Church House, Belfast.

(3) *The Presbyterian Church of England* has 13 presbyteries, 352 congregations, 8 preaching stations, and 83,710 members. It has a Theological College (Westminster College, Cambridge), and supports 80 missionaries abroad, including 40 women. In 1920 the amount raised for all purposes was £413,822. *Moderator*, 1921-2, Rev. Ivor J. Robertson, M.A., Regent Sq.—*Church Offices*: 7 E. India Ave., E.C. 3. *Gen. Sec.*, Rev. W. Lewis Robertson, M.A. *Fin. Sec.*, Percy Graham, P.C. *Office*, 21 Warwick Lane, Paternoster Row, E.C. 4.

(4) The less numerous divisions are: *The Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church; the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Methodist Churches.

UNDER the general designation of **METHODISTS** are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revs. John and Charles Wesley. The most numerous and influential of them are—

WESLEYAN METHODISTS.

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first Conference, consisting of six clergymen and four laymen, was held in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. This figure, however, is probably an over-estimate, and is therefore open to correction. The latest statistics are: Ministers, 56,494; local preachers, 97,531; members and probationers, 10,386,972; Sunday schools, 94,857; officers and teachers, 922,361; scholars, 9,128,637; churches and other preaching places, 100,130. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleys are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. The Wesleyan Conference will be held at Sheffield in 1922.—*Pres.*, Rev. J. A. Sharp; *Sec.*, Rev. John E. Wakerley.

THE PRIMITIVE METHODISTS.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings," the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleys they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. S. Horton.

THE UNITED METHODIST CHURCH.

3. *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists, which hitherto had been separate from and independent of each other. These were:—

The Methodist New Connexion, which owed its origin in 1797 to the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the

Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

The United Methodist Free Churches, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828; the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 200,000 members seceded to found a new denomination.

An Act of Parliament was secured in 1907 to authorise the union of these three denominations into one, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline.—*President*, Rev. W. Treffry; *Secretary*, R. Norman.

INDEPENDENT METHODISTS.

4. *Independent Methodists*.—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.—*President*, W. A. Hindley.

WESLEYAN REFORM UNION.

5. This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original reformers who seceded from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties.—*Secretary*, Rev. E. Bromage, Sheffield.

FINANCES.

Finances.—The Wesleys raised in 1920-21 £287,950 to sustain their very extensive missionary operations. At the same time their Home missionary income was £49,777. The *Primitive Methodists* raised £2,628 for new chapels, and the *United Methodist Church* £32,448 for their missions.

The number of Members is for the United Kingdom; of Chapel and Scholars, Great Britain only.

	Ministers	Lay Preachers.	Members	On Probation.	Chapels	Sunday Scholars.

The Calvinistic Methodist (Presbyterian) Church of Wales.

THE CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is in federation with the Presbyterian Church of England, the United Free Church of Scotland, and the Presbyterian Church of Ireland. It is also a constituent of the Pan-Presbyterian Council or Alliance. It has foreign missions in Assam, India, and in Brittany.

In 1900 the body numbered—churches, 1,483; chapels and other buildings for Sunday-school branches, 1,779; ministers and preachers, 1,156; elders, 7,079; communicants, 187,220; on probation, 1,592; Sunday-school teachers and officers, 24,151; teachers and scholars, 189,807; adherents (including communicants), 326,415.

Contributions in aid of the Ministry in 1900, £206,418. For various religious purposes (including the ministry), £505,949.

One of the features of the Welch churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language used generally in these schools.

The English branch of the Church has 380 chapels and preaching stations, with 32,730 communicants and 89,317 adherents (including communicants). All the rest are Welch.

The churches in Assam number 522; communicants, 18,114; adherents (including communicants), 58,494. The adherents in Brittany are few.

Moderator (South Wales) Synod, Rev. W. D. Rowlands, Carmarthen; (*North Wales*), Prof. J. O. Thomas, M.A., Bala.

Moderator of General Assembly, Rev. J. Ceredig Evans, Khasia.

Secretaries, Revs. Griffith Parry Williams, M.A., Mold, and Evan Price, Ebbw Vale.

Statistical Secretaries, Revs. John Jones, Brynrodyn, and D. E. Thomas, Llanstephan.

The Independents and the Baptists.

THE INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902, and in 1900 nine districts were formed, each under a Moderator. There are 51 county and other Associations in England and Wales, with 4,701 churches and preaching stations containing 1,727,442 sittings; the number of ministers in the British Isles is 3,062. *Chairman of the Congregational Union of England and Wales*, 1901-22, Rev. A. J. Viner; 1922-23, Rev. Thomas Yates. *Secretary*, Rev. Richard J. Wells. *Chief Clerk*, C. Stancliff. *Office and Publication Department*, 22, Memorial Hall, Farringdon Street, E.C. 4.

The *Council of Huntingdon's Connexion*, with 40 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Secretary*, E. Dolby

Shelton. *Offices*, 41, Holborn Hall, Gray's Inn Road, W.C. 1.

The BAPTISTS are, in all respects but one, similar to the Congregationalist; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1823. In the British Isles there were, in 1900, 4,182 chapels and 2,072 pastors. The members numbered 405,104, Sunday-school teachers 54,243, and Sunday scholars 512,365. In the United States the "members" alone number 7,504,447. *President of the Baptist Union*, 1901-22, Rev. J. C. Carlile, C.B.E., D.D. *Secretary*, Rev. J. H. Shakespeare, D.D. *Office*, Baptist Church House, Southampton Row, London, W.C. 1.

Minor Religious Denominations.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 345 chapels and other places of worship. *Gen. Sec.*, Rev. S. H. Mellone, D.Sc., Essex Hall, Essex Street, W.C. 2. The Society of Friends (Quakers), consists of 29,049 members and has 300 places of worship in Great Britain, with 29 places of worship in Ireland and 2,281 members. *Central Office (Great Britain)*, 136 Bishopsgate, E.C. 2, (Ireland), 6 Eustace Street, Dublin. The Churches of Christ have 14,777 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,719 teachers, and 16,811 scholars. The Moravian Church (*Offices*, 32 Fetter Lane, E.C.) has in the U.K. 43 congregations and preaching stations, with 3,680 communicants. The Catholic Apostolic Church has above 80 churches; the New Church (Swedenborgian), 75 societies, with about 6,700 registered members; the Latter-Day Saints (Mormons) have 22 churches. The Brethren, or Plymouth Brethren (divided into two bodies, "Open" and "Exclusive") number about 80,000, of whom five-eighths belong to the "Open" body. The Reformed Episcopal Church originated in the U.S.A. (1873) and is now working on Evangelical lines in U.S.A., Canada, Great

Britain and India. *Presiding Bishop*, Rt. Rev. F. Vaughan, D.D.; *Bishop of Southern Diocese*, Rt. Rev. J. Louis Fenn, LL.D.; *Gen. Sec.*, Rev. W. Welby Prior, B.D., Trinity Rectory, Southend-on-Sea; *Southern Diocesan Sec.*, Rev. P. T. Norris, B.A., Harlesden. The Old Roman Catholic Church: *Archbishop in Great Britain*, Most Rev. Bernard Mary Williams, The Edge, Stroud, Glos. The Greeks (*Great Archimandrite*, Very Rev. C. Pagonis, St. Sophia's Vicarage, Moscow Road, W. 2) have churches in London, Manchester, Liverpool, and Cardiff. The Armenians have churches in London and Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; and there is a mosque for Moslems.

The Jews.—Among the inhabitants of the United Kingdom are about 300,000 Jews, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz. *Chief Rabbi's Office*, Mulberry Street, Commercial Road, E. 1. The Jews support their own poor. Their number throughout the world is computed at fourteen millions.

The Roman Catholic Church.

In *England and Wales* there are 4 Archiepiscopal and 23 Episcopal Sees; in *Scotland* 2 Archiepiscopal and 4 Episcopal Sees; in *Ireland* 4 Archiepiscopal and 24 Episcopal Sees. In the *British Empire* there are 38 Archiepiscopal and 122 Episcopal Sees, with 54 Vicariates and 9 Prefectures.

The *Catholic Directory* of 1922 estimates the Catholic population of *England and Wales* (1920) at 2,925,475, *Scotland* (1920) 546,000, *Ireland* (Census figures 1921) 3,242,670. The figures for *India* (1911) are 1,904,286, *Ceylon* (1911) 339,300, *Canada* (1920) 3,268,837, *Australian Commonwealth* (1921) 956,804, *New Zealand* (1916) 151,603 and *Union of South Africa* (1911) 91,035, the total for the *British Empire* being 13,814,404; and the Catholic population of the world is estimated at 316,822,975.

THE SALVATION ARMY was founded by General William Booth (b. 1829, d. 1912). In Dec., 1920, the number of *Officers, Cadets and Employés* was 25,217, of *Corps and Outposts*, 12,211, *Local Officers*, 74,466. The number of countries occupied was 73, and of languages used 46. Connected with the Salvation Army are numerous philanthropic institutions, including 116 Industrial Homes for Fallen Women, 39 Maternity Homes and 96 Children's Homes, 186 Slum Posts, 15 Prison-Gate Homes, 228 Shelters and Cheap Food Depôts for the Homeless, 173 Workshops and Factories, 99 Labour Bureaux, 22 Farms, &c. More than 40,000 open-air meetings are held weekly, and a still larger number in the various halls of the organisation. At a large number of

police courts, many gaols, and some convict establishments, Salvation Army officers are constantly in touch with prisoners, both of the first-offender class and confirmed criminals. In many instances men and women of both classes are taken into the care of the Army at the prison gate. Magistrates sometimes commit first offenders to the care of the Army instead of to prison. The total raised during "Self-Denial Week" in 1921 amounted to £167,842. Balance-sheets and statements for account relating to the General Funds or to the Social Funds can be obtained, post free, from 101 Queen Victoria Street, E.C. 4.—GENERAL, Bramwell Booth (1922), Queen Victoria Street, London, E.C. 4.

THE UNIVERSITY OF OXFORD.

OXFORD UNIVERSITY TERMS 1921-1922.

Whitehead; (*Engineering*), Dr. H. C. H. Carpenter; (*Economics*), Prof. Graham Wallas.

Organisation of Teaching.

On January 1, 1907, University College was transferred to the University, of which it now forms an integral part in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. On January 1, 1910, King's College was, in respect of all its Departments except that of Theology, transferred to the University, of which it now forms an integral part, in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. The

Theological Department of the College remains a "School of the University" in the Faculty of Theology. Other Institutions maintained by the University are the Brown Animal Sanatory Institution in Wandsworth Road, the Physiological Laboratory in the University buildings at South Kensington, Goldsmiths' College at New Cross, the Francis Galton Laboratory for National Eugenics at University College, the Ratan Tata Department of Social Science and Administration at the London School of Economics and Political Science, and Institute of Historical Research in Malet Street.

TEACHING STAFF.

The numbers of the "Appointed" and "Recognised" Teachers in the several Faculties are as follows:—

Theology, 6 and 21; *Arts*, 60 and 172; *Laws*, 4 and 9; *Music*, 1 and 21; *Medicine*, 22 and 356; *Science*, 58 and 224; *Engineering*, 12 and 78; *Economics*, 21 and 15.

DEANS OF THE FACULTIES, 1920-22.

Theology, Rev. Prof. S. W. Green, M.A.
Arts, Prof. Sir Sidney Lee, LL.D., Litt.D., F.B.A.
Laws, H. J. H. Mackay, M.A., LL.B.
Music, T. F. Dunhill, A.R.C.M.
Medicine, H. J. Waring, M.S., M.B., F.R.C.S.
Science, A. N. Whitehead, Sc.D., LL.D., F.R.S.
Engineering, Prof. E. G. Coker, D.Sc., F.R.S.
Economics, Prof. L. C. A. Knowles, Litt.D.

UNIVERSITY COLLEGE, Gower Street, W.C. 1.
Chairman of Committee, vacant.
Provost, Sir Gregory Foster.

KING'S COLLEGE, Strand, W.C. 2.
Chairman of Delegacy, Viscount Hambleden.
Principal, Ernest Barker, LL.D.

KING'S COLLEGE FOR WOMEN.
Household and Social Department,
Camden Hill Road, W. 8.
Dean, Miss Lane-Claypon, M.D., D.Sc.

GOLDSMITHS' COLLEGE, New Cross, S.E. 14.
Warden, T. Rayment, M.A.

SCHOOLS OF THE UNIVERSITY.

In the Faculty of Theology:—

New College, Hampstead (Congregational).
Principal, Rev. A. E. Garvie, D.D.

Hackney College, Hampstead (Congregational).
Principal, Rev. P. T. Forsyth, D.D.

Regent's Park College, N.W. (Baptist).
Principal, Rev. H. Wheeler Robinson, M.A.

King's College (Theological Department),

York Gate, Marylebone Road, N.W. 1.**

[The R.A.M. was founded in 1822 by Lord Burghersh (afterwards Earl of Westmorland) for the cultivation of the science of music. The average number of students attending in 1921 was 750. There are 100 Fellows (F.R.A.M.), 599 Associates (A.R.A.M.), and 8,369 Licentiates (L.R.A.M.), of whom 22 Associates and 381 Licentiates were elected in 1920.]

President, H.R.H. the Duke of Connaught, K.G.
Chairman of Committee, Sir E. E. Cooper, Bart.
Principal, Sir A. C. Mackenzie, Mus.D., F.R.A.M.
Lady Superintendent, Mrs. Russell, A.R.A.M.
Secretary, J. A. Creighton.

**ROYAL COLLEGE OF MUSIC (1883),
Prince Consort Road, South Kensington, S.W. 7.**

Patron, H.M. The King.
President H.R.H. The Prince of Wales, K.G.
Director, Sir Hugh Percy Allen, Mus.Doc.
Hon. Secretary, George A. Macmillan, D.Litt.
Registrar, Claude Aveling, M.A.

**ROYAL IRISH ACADEMY OF MUSIC,
Westland Row, Dublin.**

Secretary, C. E. Grahame-Harvey.

**GUILDHALL SCHOOL OF MUSIC (1880)
John Carpenter Street, E.C. 4.**

[The School grants a diploma of Licentiatehip (L.G.S.M.) and of Associateship (A.G.S.M.), open to students of eight terms' standing and over.]

Principal, Landon Ronald.
Secretary, H. Saxe-Wyndham.
Lady Superintendent, Mrs. Hemming.
Professors, 130 in number.

**BLACKHEATH CONSERVATOIRE OF
MUSIC, S.E. 3.**

Principal, George Mackern, F.R.A.M.
Secretary & Supt., Edith S. Dealy.

**INCORPORATED LONDON ACADEMY OF
MUSIC, 21 Princes Street, Cavendish Sq., W. 1.**

Hamstead Conservatoire, and Finsbury Park.
Principal, T. H. Yorke Trotter, M.A., Mus.D.
Secretary, R. Beauchamp.
Business Manager, L. F. Wintle, LL.B.

**LONDON COLLEGE OF MUSIC,
Gt. Marlborough Street, W. 1.**

Principal, Frederick J. Karn, Mus.B.
Director of Examin., G. Augustus Holmes
Secretary, A. Gambler Holmes.

TONIC SOL-FA COLLEGE, 26 Bloomsbury Square, W.C. (1875).

President, Sir Walter Parratt, C.V.O., Mus.D.
Secretary, Walter Harrison, M.A., Mus.B.

TRINITY COLLEGE OF MUSIC (1872),

Mandeville Place, Manchester Square, W.

Chairman of Board, Sir Fredk. Bridge, C.V.O., Mus.D.
Secretary, C. N. H. Rodwell.

ROYAL COLLEGE OF ORGANISTS.

Kensington Gore, S.W.

President, Dr. C. Macpherson.
Hon. Sec., Dr. H. A. Harding.
Registrar, Thomas Shindler, M.A., LL.B.

ROYAL MANCHESTER COLLEGE OF MUSIC (1893).

Ducle St., Oxford Rd., Manchester.

Patroness, H.M. Queen Alexandra.
President, Sir Thomas Beecham, Bart.
Principal, Dr. Adolph Brodsky.
Registrar, Stanley Withers.

ROYAL MILITARY SCHOOL OF MUSIC,

Kneller Hall, Twickenham.

Commandant, Col. J. A. C. Somerville, C.M.G.
Adjutant & Qr.-Mr., Lt. Col. G. Wilson, D.S.O.
Senior Director of Music, Lieut. H. E. Adkins, Mus. Bac.

ROYAL NAVAL SCHOOL OF MUSIC,

Eastney Barracks, Portsmouth.

Superintendent, Maj. J. G. Horne, R.M.L.I.
Musical Director, Lieut. J. G. Welsh, M.B.E., R.M.
Quarter-Master, Lieut. A. E. Whiting, R.M.L.I.
Company Officers, Lt. W. E. Faithfull, C. E. Maton.
Superintending Clerk, L. P. Donne, R.M.B.

VICTORIA COLLEGE OF MUSIC,

138 Holland Park Avenue, London, W. 11.

Principal, J. H. Lewis, Mus.D.
Chairman, J. M. Bentley, Mus.D.
Director of Music, Churchill Sibley, Mus.D.
Registrar, J. G. Cooper, Mus.D.
Secretary, H. Portman Lewis.

NAVAL.**ROYAL NAVAL COLLEGE, Greenwich.**

President, Adm. Sir F. C. Tudor, K.C.B., K.C.M.G.
Captain, H. H. Smith, D.S.O., R.N.
Commander, K. M. Bruce, D.S.O., R.N.
Medical Officer, Surg.-Commr. Percival M. May, R.N.
Store Officer, Cashier, &c., Pay-Commander W.D.T. Morrish, R.N.
Secretary, A. Backhouse.
Staff Clerk, A. Wotton.
Civil Engineer, H. F. Bowen, A.M.I.C.E.
Curator of Museum, Shipwright-Commander J. T. Berry, R.N. (ret.).

STAFF COLLEGE.

Director, Capt. Hon. A. E. Plunket-Ernie-Erle-Drax, D.S.O., R.N.

ROYAL NAVAL COLLEGE, Dartmouth.

Captain, F. A. Marten, O.M.G., C.V.O.
Commander, H. Hext Rogers, M.V.O., O.B.E.
Headmaster, C. E. Ashford, C.B., M.V.O., LL.D.

ROYAL HOSPITAL SCHOOL, Greenwich.

Supt., Captain E. M. C. Cooper Key, M.V.O., R.N.
Headmaster, S. B. Hewitson, B.Sc.

Royal Navy.

FOR MEN :—H.M.S. *Albemarle* (gunnery), *Duncan* (gunnery), *Argonaut*, *Vestal*, *Vindictive*, *Niger*, *Dryad* (Navigation School Ship), and *Harrier* (tender to *Dryad*).

FOR BOYS :—H.M.S. *Flagard* (4 ships, for boy artificers, Portsmouth), *Ganges* (3 ships, and Shotley Training Establishment, Harwich), *Impregnable* (3 ships, Devonport), *Indus* (5 ships, for supernumerary artificers, Devonport), *Powerful* (3 ships, Devonport); and Marine Society's Ship *Warspite* and National 'Refuges Ship *Arethusa* (see Societies).

SCHOOL OF ORIENTAL STUDIES

London Institution, Finsbury Circus, E.C.
Chairman of Governing Body, Sir John P. Hewett, G.C.S.I., K.B.E., C.I.E.
Director, Prof. Sir E. Denison Ross, C.I.E., Ph.D.
Secretary, Miss C. L. Clegg.

TECHNICAL EDUCATION.

In addition to the Institutions enumerated below there are Faculties of Engineering at the Universities of Birmingham, Bristol, Cambridge, Durham, Leeds, Liverpool, London, Manchester, and Sheffield; Wales: St. Andrews, Glasgow, and Edinburgh; Dublin, National University of Ireland, and the Queen's University of Belfast.

I.—UNDER LONDON COUNTY COUNCIL.

The principal technical institutes maintained or aided by the L.C.C. are the following :—
Institutes entirely maintained by the L.C.C.
BEAUFORT INSTITUTE, Prince's Road, Vauxhall Street, S.E. 1.—*Principal*, Dr. A. Ritchie-Scott.
CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Rd., S.E. 2.—*Principal*, S. Thorogood.
CAMPDEN SCHOOL OF ART, Dalmeny Avenue, N. 7.—*Principal*, (vacant).

CENTRAL SCHOOL OF ARTS AND CRAFTS, Southampton Row, W.C.—*Principal*, Fred V. Burridge.

CLAPHAM SCHOOL OF ART, Edgely Road, High St., Clapham, S.W. 4.—*Principal*, T. McKeggle, A.R.C.A. (hon.).

HACKNEY INSTITUTE.—*Principal*, Percy R. Kirk, M.A., A.M.I.C.E.

(a) *Hackney Institute*, Dalston Lane, E. 8.

(b) *Hackney Institute*, St. John Cass's branch, Cassland Road, E. 9.

HAMMERSMITH SCHOOL OF ARTS AND CRAFTS, Lime Grove, Shepherd's Bush, W. 12.—*Principal*, John Williams.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.—*Principal*, W. Huntington, B.Sc.

PADDINGTON TECHNICAL INSTITUTE, Saltram Crescent, W.—*Principal*, A. G. Cooke, M.A.

PUTNEY SCHOOL OF ART, Oxford Road, Putney.—*Principal*, J. Bowyer.

SCHOOL OF BUILDING, Ferndale Road, Brixton, S.W. 4.—*Principal*, H. W. Richards.

SCHOOL OF ENGINEERING AND NAVIGATION, High Street, Poplar, E.—*Principal*, H. A. Garratt, A.M.I.C.E. Sec., D. H. Flynn.

SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, 6 Bolt Court, Fleet Street, E.C. 4.—*Principal*, A. J. Bull, M.Sc.

SHOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton, N.—*Principal*, Shadrach Hicks.

TRADE SCHOOL FOR GIRLS (L.C.C. Hammersmith), Barrett Street, Oxford Street, W.—*Headmistress*, Miss E. E. Cox, B.A.

TRADE SCHOOL FOR GIRLS, Queen Square, Bloomsbury, W.C.—*Headmistress*, Miss A. Crawley.

WESTMINSTER TECHNICAL INSTITUTE, Vincent Square, S.W., with which is incorporated the WESTMINSTER SCHOOL OF ART.—*Principal*, J. Stuart Ker, B.Sc.; *Head* (Sch. of Art), Walter Bayes.

Polytechnics aided by the L.C.C.

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.—*Principal*, Robt. H. Pickard, D.Sc., F.R.S.

BOROUGH POLYTECHNIC, Borough Road, S.E. 1.—*Principal*, C. T. Millis, M.I.Mech.E.

CITY OF LONDON COLLEGE, White Street, Moorfields.—*Principal*, Sidney Humphries, B.A., LL.B.

NORTHAMPTON POLYTECHNIC, 22 St. John Street, E.C. 1.—*Principal*, R. M. Walsley, D.Sc.

NORTHERN POLYTECHNIC, Holloway Rd., N. 7.—*Principal*, R. S. Clay, D.Sc.

REGENT STREET POLYTECHNIC, 399 Regent Street, W. 1.—*Director of Education*, Major Robert Mitchell, C.B.E.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate.—*Principal*, C. A. Keane, D.Sc.

SOUTH-WESTERN POLYTECHNIC, Manresa Road, Chelsea, S.W.—*Principal*, S. Skinner, M.A.

WOOLWICH POLYTECHNIC, William Street, Woolwich, S.E. 18.—*Principal*, A. F. Hogg, M.A.

Technical Institutes, &c., aided by the L.C.C.

ALBANY INSTITUTE DOMESTIC ECONOMY SCHOOL FOR GIRLS, Albany Street, Deptford.—*Headmistress*, Mrs. Landels.

BERMONDSEY SETTLEMENT, Farncombe Street, Jamaica Road, S.E.—*Warden*, Rev. J. Scott Lidgett, D.D.

COLLEGE FOR WORKING WOMEN, 7 Fitzroy Street, W. 1.—*Hon. Secretary*, Mrs. H. F. Plant.

CORDWAINERS' TECHNICAL COLLEGE, 48 Bethnal Green Road, E. 1.—*Principal*, F. Y. Golding.

FINSBURY TECHNICAL COLLEGE, Leonard Street, City Road, E.C.—*Dean*, Prof. Eccles, D.Sc.

F.A.E., M.I.E.E.

GOLDSMITHS' COLLEGE, New Cross, S.E. 14.—*Warden*, T. Raymond, M.A.

HEROLD'S INSTITUTE, Drummond Road, Bermondsey (Branch of the Borough Polytechnic).—*Principal*, C. T. Millis, M.I.Mech.E.

LEATHERSELLERS' COMPANY'S TECHNICAL COLLEGE, 176 Tower Bridge Road, S.E.—*Principal*, Dr. J. Gordon Parker, F.I.C.

MORLEY COLLEGE, Waterloo Road, S.E.—*Vice-Principal*, Miss C. I. Brennan.

NEWCOMEN'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVICE, Newcomen Street, Borough, S.E. 1.—*Lady Principal*, Miss R. A. Roberts.

ROYAL SCHOOL OF ART NEEDLEWORK, Exhibition Road, S.W.—*Principal*, Miss E. Bradshaw.

SAILORS' HOME, Dock Street, E. (School of Nautical Cookery).—*Secretary*, Payr.-Lt.-Comm. A. E. Loder, R.N.R.

ST. BRIDE FOUNDATION PRINTING SCHOOL, Bride Lane, Fleet Street, E.C.—*Principal*, J. R. Riddell.

SCHOOL OF WOOD-CARVING, 39 Thurloe Place, S.W. 7.—*Secretary*, J. Bailey.

TOYNBEE HALL, 28 Commercial Road, E. 1.—*Warden*, J. J. Mallon.

WANDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W. 18.—*Principal*, D. W. Griffiths, B.Sc., A.M.I.M.E.

WORKING MEN'S COLLEGE, Crowndale Road, N.W. 1.—*Superintendent*, G. O. Lowry, B.A.

Schools of Art aided by the L.C.C.

BLACKHEATH, LEE, LEWISHAM AND GREENWICH, *Tempy. premises*, Lee Terrace, Blackheath, S.E. 3.—*Principal*, J. Howard Hale.

ST. MARTIN'S, 107 Charing Cross Road, W.C.—*Headmaster*, J. E. Allen.

In addition to the above schools there are Art Schools or Classes attached to all the Polytechnics, except the Northern Polytechnic, and to Goldsmiths' College. Schools of Art are also conducted by the City and Guilds of London Institute at Finsbury Technical College and at the South London Technical Art School, 122-124 Kennington Park Road (see below).

CORDWAINERS' TECHNICAL COLLEGE, 42, Bethnal Green Road, E. 1.—*Principal*, F. Y. Golding.

CRYSTAL PALACE (School of Practical Engineering).—*Principal*, J. W. Wilson, M.Inst.C.E.

EAST LONDON COLLEGE (see University of London).

FARADAY HOUSE ELECTRICAL ENGINEERING COLLEGE (Southampton Row, W.C. 1).—*Princ.*, A. Russell, D.Sc.

INSTITUTE OF CERTIFICATED GROCERS (Incorporated), 4 Cullum St., E.C. 3.—*Sec.*, C. L. T. Beeching.

POLYTECHNIC SCHOOL OF ENGINEERING (Electrical, Civil, Motor, Aero, and Mechanical), 307-311 Regent Street, W.—*Headmaster*, Henry J. Spooner, M.I.Mech.E.

SCHOOL OF MOTOR BODY AND CARRIAGE BUILDING (Balderton St., W.).—*Headmaster*, Ernest Bailey.

SOUTH OF ENG. COLL. OF PHARMACY (286 Clapham Rd., S.W. 9).—*Principal*, H. Lucas, F.C.S.

TRADES' TRAINING SCHOOLS, 153 Great Titchfield Street, W. 1.—*Director*, Sir Banister Fletcher, F.R.I.B.A.

WILLEDEN POLYTECHNIC, Priory Park Road, N.W. 6.—*Principal*, A. J. Bird.

ENGLISH TECHNICAL COLLEGES.

ACCRINGTON (Munic.).—*Princ.*, J. P. Ackroyd, B.Sc.

ASHTON-UNDER-LYNE (Heginbottom).—*Principal*, G. W. Handforth, B.A.

BACUP AND RAWTENSTALL.—*Headmaster*, E. H. Holden, M.Sc.

BANBURY (Munic.).—*Headmaster*, R. Luscombe, B.A.

BARNLEY (Higher Techn. Sch. and Sch. of Art).—*Princ.*, D. Paton Grubb, B.Sc.

BARROW-IN-FURNESS.—*Princ.*, David Hardman, M.Sc.

BATH (Munic.).—*Principal*, A. G. Day, A.M.I.M.E.

BATLEY (Techn., Art Sch. and Contn. Sch.).—*Principal*, N. B. Ratcliffe, M.Sc.

BIRKENHEAD (Holt Techn. Sch., Tranmere).—*Princ.*, J. E. L. Barnes, M.I.M.E.

BIRMINGHAM (Munic. Techn. Sch.).—*Princ.*, W. E. Sumner, D.Sc.

„ (Victoria St.—For Jewellers and Silver-smiths).—*Headmaster*, A. J. Gaskin.

„ (Tech. Sch., Handsworth).—*Princ.*, W. E. Harrison, B.Sc.

„ (Techn. Sch., Aston).—*Princ.*, C. A. White, M.B.E., M.Sc.

BLACKBURN (Munic.).—*Princ.*, F. J. Harlow, B.Sc.

BLACKPOOL.—*Princ.*, D. T. Setterington, B.Sc.

BOLTON (Munic.).—*Director*, F. Wilkinson, C.B.E., F.G.S.

BOOTLE (Munic.).—*Princ.*, Laurence Small, B.Sc.

BOURNEMOUTH (Munic.).—*Princ.*, H. Painter, B.Sc.

BRADFORD (Techn. Coll.).—*Princ.*, H. Richardson, M.Sc.

BRIERLEY HILL, STAFFS (Techn. Inst.).—*Princ.*, H. B. Cronshaw, B.A.

BRIGHOUSE (Techn. Sch.).—*Sec.*, A. W. Hoyle, B.Sc.

BRIGHTON (Munic.).—*Princ.*, W. Mansergh Varley, M.A.

BRISTOL (Merchant Venturers'.—See "English University Colleges."

BURNLEY (Munic.).—*Princ.*, W. Munn Rankin, B.Sc.

BURTON-ON-TRENT (Munic.).—*Princ.*, R. Wilkinson, B.A.

CAMBORNE (Sch. of Metalliferous Mining).—*Princ.*, Alex. Richardson, M.I.M.M.

CANTERBURY (Sidney Cooper).—*Princ.*, J. Ogden.

CARLISLE (Tullie House).—*Princ.*, W. T. McIntire, B.A.

CHAILEY, Sussex (Heritage Craft Schools).—*Founder & Hon. Sec.*, Mrs. C. W. Kimmins.

CHATHAM.—*Princ.*, I. Kern, M.A.

CHELLENHAM.—*Director*, F. W. Dickenson, M.A.

CHESTERFIELD (Munic.).—*Princ.*, W. W. Wayne, B.A.

CHORLEY (Munic.).—*Head Master*, C. H. Glew.

COLCHESTER.—*Princ.*, G. C. Holland.

COLNE (Munic.).—*Princ.*, W. Rothwell.

COVENTRY (Munic.).—*Princ.*, D. R. MacLachlan, B.Sc., A.M.Inst.C.E.

CREWE (Technical Inst.).—*Princ.*, J. Smith, M.B.E., M.Eng.

CROYDON (Central, S. Norwood, and Thornton Heath Polytechnic).—*Princ.*, W. Thomson, M.A.

DARLINGTON (Techn. Coll.).—*Princ.*, J. W. Angles, M.Sc.

DARWEN (Munic.).—*Princ.*, R. Robert, B.Sc.

THE HEAD MASTERS' CONFERENCE (Secy., W. A. Bulkeley-Evans, C.B.E., M.A., 5, Paper Buildings, Temple, E.C. 4).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. The annual meetings are, as a rule, held in December, alternately (a) at some school represented on the Conference, (b) at London or some University town.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS, 20, Gordon Square, W.C. 1. (Joint Hon. Secs., R. F. Cholmeley, O.B.E., M.A.; W. Jenkin Thomas, M.A.).—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.
